(Issued May 10, 1937 at 4 o'clock p.m.)

Dominion Statistician:	R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Chief, Agricultural Branch:	T. W. Grindley, Ph.D.
In Charge, Dairy and Cold Storage Statistics:	P. H. Ferguson, M.Sc.

STOCKS OF DAIRY AND POULTRY PRODUCTS

Creamery butter reported in cold storage warehouses and creameries at May 1, 1937 amounted to 5,546,417 pounds. Making an estimate to cover the holdings of firms that failed to report, this figure is increased by 426,460 pounds giving a grand total of 5,972,877 pounds. Of this amount 2,643,562 pounds were held in cold storage warehouses and 3,329,315 pounds in creameries. Estimated stocks shown in the Canada totals are included in the figures by provinces. Comparing the grand total as at May 1, 1937 with stocks reported at the same date of the previous year, an increase of approximately 1.1 million pounds or 23.8 per cent is shown, and compared with the grand total at the first of the previous month, there was a decrease of 3 million pounds or 33.9 per cent. The holdings of new firms added to the list since July 1, 1936 amounted to approximately 64 thousand pounds. Stocks of butter in the custody of railways, at terminals and in transit which are separately reported in this statement, amounted to 308,000 pounds as compared with 140,000 pounds a year ago.

Dairy butter stocks reported at May 1, 1937 amounted to 59,437 pounds. Compared with the same date last year these stocks represent an increase of about 22 thousand pounds or 60.9 per cent, and in comparison with the corresponding figure for the previous month, a decrease of approximately 16 thousand pounds or 21.8 per cent is recorded.

Stocks of cheese reported in cold storages and dairy factories at May 1, 1937 amounted to 15,282,100 pounds. With the addition of 100,794 pounds to cover outstanding firms there is shown a grand total of 15,382,894 pounds. Compared with the same date last year these stocks represent an increase of approximately 1.2 million pounds or 8.6 per cent, and with the total of the previous month a decrease of approximately 3 million pounds or 16.3 per cent. Stocks contributed by new firms which were added to the list since January 1, 1937 amounted to approximately 2.4 million pounds.

The reported holdings of cold storage eggs on May 1, 1937 were 3,662,053 dozens. These holdings represent an increase of approximately 1.4 million dozens as compared with those reported at the same date last year, and an increase of approximately 3.2 million dozens in comparison with the stocks reported at the first of the previous month. Fresh eggs amounted to 869,589 dozens which includes 3,758 dozens of estimated stocks. Comparing these stocks with those reported at the same date of the previous year an increase of approximately 248 thousand dozens is recorded, and with the previous month an increase of approximately 165 thousand dozens. Frozen eggs reported at May 1, 1937 amounted to 2,797,173 pounds. These holdings represent an increase of approximately 1.5 million pounds or 113.8 per cent over the stocks in store at May 1, 1936 and an increase of approximately 348 thousand pounds or 14.2 per cent as compared with those reported at the first of the previous month. Unclassified stocks of eggs in transit amounted to 147,300 dozens compared with 176,760 dozens a year ago.

Concentrated whole milk products amounted to 7,036,996 pounds on May 1, 1937. In comparison with the quantities reported at the same date in 1936 there was an increase of approximately 1.1 million pounds or 18.6 per cent, and compared with the holdings at the first of the previous month an increase of approximately 705 thousand pounds or 11.1 per cent. Stocks of concentrated milk by-products were reported as 1,066,083 pounds, representing decreases of approximately 202 thousand pounds from the same date last year and approximately 100 thousand pounds from the holdings reported at the first of the previous month.

Stocks of poultry amounted to 8,157,387 pounds including an estimate of 90,721 pounds. These stocks represent a decrease of approximately 1.4 million pounds or 20.3 per cent, over the same date last year and a decrease of approximately 2.6 million pounds or 24.2 per cent as compared with the stocks shown at the first of the previous month. Transit stocks were 66,000 pounds as compared with 44,000 pounds shown a year ago.

Out of a total of 2,797 firms 312 failed to send in their returns in time for the figures to be included in this statement.

Production of butter and cheese formerly included in this report is being published as a separate statement.

WASHINGTON, D. C.

Report of the Committee on the Investigation of the
Economic Conditions of the Cotton Industry

Presented to the Senate and House of Representatives at the Session of 1917-1918
by the Committee on the Investigation of the Economic Conditions of the Cotton Industry

REPORT OF THE COMMITTEE ON THE INVESTIGATION OF THE
ECONOMIC CONDITIONS OF THE COTTON INDUSTRY

The Committee on the Investigation of the Economic Conditions of the Cotton Industry, organized by Senate Resolution No. 10, passed July 1, 1917, and House Resolution No. 10, passed July 1, 1917, has the honor to submit herewith its report. The Committee was organized to investigate the economic conditions of the cotton industry, and to report thereon to the Senate and House of Representatives. The Committee has held numerous public hearings, and has received many suggestions from the public. It has also conducted extensive research into the various phases of the cotton industry, and has prepared this report as a result of its investigations.

The Committee has found that the cotton industry is one of the most important of the United States, and that it is one of the most highly organized and efficient. It has found that the industry is one of the most important of the United States, and that it is one of the most highly organized and efficient. It has found that the industry is one of the most important of the United States, and that it is one of the most highly organized and efficient.
