STOCKS OF CANNED FRUITS AND VEGETABLES ON HAND
(Including Honey)

July 1, 1952

The Dominion Bureau presents its report on the stocks of Canned Fruits and Vegetables held by canners, wholesale dealers and chain store warehouses, July 1, 1952. The report is now sectionalized into: A - Canned Fruits, pages 2-8; B - Canned Vegetables, pages 9-15; C - Other Canned Products, pages 16-22 and D - Honey, page 25. Beginning last quarter, Inventories of Vinegar, Mayonnaise, Sandwich Spread, Peanut Butter and Prepared Mustard are included on pages 23-24.

Table 1, in each division, presents quarterly data over a two-year period, ending always with the current quarter. In the present report figures are included for 1950, up to July 1, 1952 quarter. In addition, slight revisions in January 1, 1950 figures were necessitated by incorrect reporting in this specific quarter.

Canned fruits inventories decreased to 5,008,785 dozen containers at July 1, 1952 from 6,826,005 containers held at April 1, 1952. There were approximately 1,500,000 dozen containers more than were reported one year previously at July 1, 1951, when 3,525,319 dozens were reported. The fruits whose inventory showed major increases compared with July 1, 1951 are reported in dozens of containers as follows: Peaches, 850,358; Pears, 313,122; Cherries, 121,483; Plums and Gages, 112,066.

Canned Vegetables inventories decreased approximately 3,300,000 dozen containers in the last quarter. On April 1, 1952, 12,583,878 dozens were reported compared with the July 1, 1952 figure of 9,298,102 dozens which holdings were about 1,500,000 dozens more than were reported one year ago when 7,731,860 dozen containers were reported on July 1, 1951. Major increases in holdings, compared with the same quarter last year, appear, respectively, in dozens of containers as follows: Peas, 1,380,979; Green Beans, 515,884; Beets, 338,238; Tomatoes, 135,508. In the same period Baked Beans had decreased 494,204 dozen; Corn by 127,007 dozen; and Mixed Vegetables by 150,180 dozen.

It may be noted that the reporting firms are required to show only the number of dozens of cans or other containers, specified according to sizes. This is done to expedite reporting and the conversion of the different sizes to net weight of contents is carried out in the Bureau. See Tables 5, 6 and 7 of each respective section for the weights of products reported in Tables 1, 2 and 3.
