REPORT ON THE STOCKS OF CANNED FRUITS AND VEGETABLES

ON HAND JULY 1st. 1948.

The Dominion Bureau of Statistics presents herewith the report on stocks of canned fruits and vegetables held by canners, wholesale dealers, and chain store warehouses, as at July 1, 1948. In order that the significance of these holdings may be more properly assessed, table I gives not only the number of dozen containers of each important item held July 1, 1948, but also holdings on the same date in the previous year, July 1, 1947, and at the end of the previous quarter, April 1, 1948.

Stocks at July 1, 1948 would be largely holdings from the 1947 pack, and the decrease in canned fruit holdings from 3,164,536 dozen at April 1, 1948, to 1,994,942 dozen at July 1, 1948, represents the continued disposal of the 1947 pack. However, it is noteworthy that the July 1, 1948 holdings exceeded the stocks held one year previously, to the extent of 1,293,971 dozen. Pears, plums and peaches were among the important items contributing to the larger holdings, showing increases respectively of 368,533 dozen, 295,585 dozen, and 260,258 dozen.

Stocks of vegetables declined from 9,414,464 dozen held at April 1, 1948 to 5,423,001 dozen held at July 1, 1948. Here again, though to a lesser degree, holdings were greater at July 1, 1948 than at the same date in the previous year. However, an increase of 1,097,367 dozen in the stocks of baked beans was due to the very considerable increase in the production of this item in 1947, when restrictions on the use of tin for this purpose were removed.

It may be noted that reporting firms are required to show only the number of cans or other containers, specified according to sizes. This is done to expedite reporting, and the conversion of the different sizes to net weight of contents is carried out in the Bureau of Statistics. See tables 5, 6 and 7 for weights of the products reported in tables 1, 2 and 4.
