REPORT ON THE STOCKS OF CANNED FRUITS AND VEGETABLES

ON HAND OCTOBER 1st, 1948.

The Dominion Bureau of Statistics presents herewith the report on the stocks of canned fruits and vegetables held by canners, wholesale dealers and chain store warehouses at October 1st, 1948. The inventory of each important item at this date is given in Table 1, which also contains holdings for the quarter ending October 1st, 1947 as well as at the end of the previous quarter, July 1st, 1948.

The stocks of canned fruits increased from 1,994,942 dozen containers at July 1st, 1948 to 3,573,584 dozen at October 1, 1948, reflecting the heavier 1948 crops, the greater part of which have already been processed but which have not yet reached the wholesale level. Present inventories of canners are more than 1,500,000 dozen containers better than the July 1st, 1948 quarter when 891,498 dozen were held.

The general increase of nearly 7,000,000 dozen in canned vegetables, 12,726,573 dozen at October 1, 1947 to 19,459,062 dozen at October 1, 1948, was largely accounted for by a very abundant crop in 1948. The principal increases in inventory were registered by tomatoes, peas, corn and baked beans when October 1, 1948 stocks of these items were larger than the previous quarter by 2,640,397 dozen, 2,299,460 dozen, 1,065,713 dozen and 1,031,811 dozen respectively.

It may be noted that the reporting firms are required to show only the number of cans or other containers, specified according to sizes. This is done to expedite reporting and the conversion of the different sizes to net weight of contents is carried out in the Bureau of Statistics. See tables 5, 6, 7, for weights of products reported in Tables 1, 2 and 4.

REPORT ON THE STOCKS OF CANNED FRUITS AND VEGETABLES

TABLE 1. Stocks of Canned Fruits and Vegetables held by canners, wholesale dealers and chain store warehouses on October 1, 1948, showing quantities of major items, by dozen units, together with comparable data for October 1, 1947 and July 1, 1948.
