REPORT ON THE STOCKS OF CANNED FRUITS AND VEGETABLES

ON HAND JANUARY 1, 1949.

The Dominion Bureau of Statistics presents herewith the final report on the stocks of canned fruits and vegetables held by canners, wholesale dealers and chain store warehouses at January 1, 1949. Table 1. includes the inventory of each important item for the present quarter compared to one year ago as well as the previous quarter, October 1, 1948. This report includes data already submitted in the preceding PRELIMINARY publication together with a few necessary revisions.

Canned Fruits stocks increased from 3,573,584 dozen containers at October 1, 1948 to 4,166,726 dozen containers at January 1, 1949, reflecting, as well, slightly heavier holdings than the 3,942,882 dozen containers reported at January 1, 1948. In the present quarter, canners held 2,500,723 dozen containers while wholesalers and other dealers stocked 1,666,003 dozen containers.

While the stocks of Canned Vegetables decreased slightly from 19,459,062 dozen containers at October 1, 1948 to 18,466,731 dozen containers at January 1, 1949, there was a general increase in holdings over January 1, 1948 when 11,595,907 dozen containers were reported. Compared to October 1, 1948, decreased holdings were general except for Baked Beans etc. and Carrots. However, major increases in inventories over January 1, 1948 are recorded in dozen tins as follows: Peas, 2,986,214; Tomatoes, 2,581,636; Corn, 1,198,203 and Baked Beans etc., 365,600.

It may be noted that the reporting firms are required to show only the number of cans or other containers, specified according to sizes. This is done to expedite reporting and the conversion of the different sizes to net weight of contents is carried out in the Bureau. See Tables 5, 6, 7, for the weights of products reported in Tables 1, 2 and 4.
