Seven months ending July 1939	2,084,300	87,656
Seven months ending July 1938	3,663,400	141,045

NOTES.

In the first thirty-two weeks of the present year Canada's ten sugar refineries manufactured 489,370,866 pounds of sugar, a gain of about 4 per cent over the output in the same period of 1938. The recent trend in sugar manufacturing indicates a greater use of domestic supplies, the production of cane sugar having declined, while that of beet sugar registered a gain. About 14 per cent of total production is now derived from sugar beets grown in Canada, from some 45,300 acres yielding 500,000 tons of beets.

The apparent per capita consumption in 1938 was 93.68 pounds, compared with 92.69 pounds, and 99.15 pounds in 1937 and 1936, respectively.

RAW SUGAR.

The amount of raw sugar in refineries throughout Canada on January 1, 1939 was 78,038,093 pounds, while the quantity received during the period from January 1 to August 12 was 529,806,646 pounds, making 607,844,739 pounds for manufacture. Meltings and sales of raw sugar account for 513,883,343 pounds, leaving 93,961,396 pounds on hand in the refineries on August 12, 1939, compared with 125,500,539 pounds at the end of the last four-week period ending July 15, and 134,301,092 pounds on the same date of last year.

In reference to the decrease of 40,339,702 pounds from the corresponding date of 1938 it may be pointed out that on August 13, 1937, the refineries had only 57,688,968 pounds of raw sugar on hand. On the corresponding date in 1938 the stock was increased to 134,301,098 pounds, an increase of 76,612,130 pounds. This was the second largest stock in the last ten years, the 1936 stock alone being greater, at 145,316,447 pounds. These two years were, therefore, abnormal ones, 1936 being the year of the largest production while 1938 was the second largest. The ten-year average stock was 95,745,644 pounds; thus, the stock on hand of 93,961,396 pounds on August 12, 1939, may be said to be normal.

REFINED SUGAR.

The stocks of refined sugar (cane and beet) in the refineries on January 1, last totalled 255,074,475 pounds. The amount since manufactured into granulated sugar was 432,826,984 pounds, and into yellow and brown 56,543,882 pounds, totalling 489,370,866 pounds for the period, from January 1 to August 12, 1939, - a grand total of 744,445,341 pounds. Sales for domestic consumption and for export of granulated for the above period were 539,855,225 pounds, and of yellow and brown, 67,748,561 pounds, accounting for 607,603,786 pounds. The stock on hand, together with small amounts purchased, was 136,917,395 pounds, compared with 132,662,543 pounds shown in the previous report, and with 140,237,571 pounds on the same date a year ago. Thus, refined sugar stocks show an increase of 4,254,852 pounds over the figures published in the Bureau's last report on July 15, and a decrease of 3,320,176 pounds compared with the same date a year ago.
