QUARTERLY TOBACCO AND TOBACCO PRODUCTS STATISTICS

With the 1967 issues of "Quarterly Tobacco and Tobacco Products Statistics" the Bureau has introduced a new table 12 entitled: "Excise Tax Collections on Tobacco Products".

In order to clarify the nature of the data in table 11 the title has been changed from: "Tax-paid Withdrawals of Tobacco Products for Consumption in Canada as indicated by the sale of Excise Revenue Stamps" to: "Production of Tobacco Products as indicated by the Use of Excise Duty Stamps".

Considerations leading to these changes are as follows:

The Department of National Revenue collects revenues on tobacco products from two main sources:-

1. Excise duty. The collection of excise duty is represented by the sale of excise duty stamps which are placed on the packages of cigarettes, cigars, etc., at the time of production. Hence the calculations shown in table 11, based on the use of excise duty stamps, are indicative of the production of these products.

2. Excise tax. At the time that these products are shipped (or sold) by the manufacturers the Department of National Revenue levies an excise tax. Hence the revenues collected from the excise tax, as presented in table 12, are more indicative of the shipments (or sales) of tobacco products for consumption. Since a time-lag of up to sixty days is permitted between the time that the tax is levied (products shipped) and the revenue is collected, data as presented in this table should be used only as an indicator of shipments.
