THE BREAD AND OTHER BAKERY PRODUCTS INDUSTRY IN CANADA, 1945

A report on the bread and other bakery products industry is presented here-with. The total number of firms reporting was 2,860, and were located by provinces as follows: Prince Edward Island, 12; Nova Scotia, 85; New Brunswick, 77; Quebec, 1,051; Ontario, 1,054; Manitoba, 126; Saskatchewan, 84; Alberta, 117; British Columbia, 251; and Yukon and the Northwest Territories, 3.

Hotels, restaurants and public institutions which bake their own bread are not required to report their operations, and statistics relating to these are, therefore, not included.

In Canada for many years breadmaking was for the most part a domestic art, but with the development of towns and cities the baking of bread gradually passed from the domestic circle to the family baker. This continued for a long period, until the beginning of the present century; a new phase was marked. With the advent of mechanical power and automatic processes, also the improvement in transportation, the bread industry has made rapid progress within the last decade. In 1944 bakers were required for the first time to give information on the types of vehicles used in distributing their products. For detailed statistics for the number of motor and horse-drawn vehicles, see page 23.

The 2,860 establishments classified in this category in 1945 reported 29,045 employees who were paid \$38,328,474 in salaries and wages, and produced goods which had a selling value of \$132,518,212. They also spent \$62,829,434 for materials, most of which were of domestic origin.

The upward trend in the operations of the industry continued during 1945. The value of products increased by \$6,787,791 or 5.4 per cent as compared with the previous year. There was also an increase of 1,515 in the number of persons employed and \$3,164,338 in the salaries and wages paid.

The principal products of the industry, as indicated by their values, were in order of their importance as follows: Bread, \$73,328,279, pies, cakes, cookies and pastries, \$42,138,577; and buns, \$14,864,345. For details, see Table 3.

Another feature of interest in the present report is the information on distribution of sales. It will be of interest to note that in Canada 49.4 per cent of the sales were wholesale, including sales to restaurants, institutions, etc.; 29.6 per cent, retail, house to house; and 21.0 per cent retail, through own stores. For detailed statistics see page 22.

Of the 2,860 firms in Canada, 2,286 were under individual ownership; 334 were under partnership; 229 under incorporated companies and 11 under co-operatives. The total production for these firms amounted to \$132,518,212. At the time of publishing this report figures for 1945 showing the breakdown by types of ownership were not ready.

THE BREAD AND OTHER BAKERY PRODUCTS INDUSTRY IN CANADA, 1945

Because of the perishable nature of the products made in the Bread and Other Bakery Products industry, a speedy distribution is very necessary. Therefore, this industry lends itself readily to a survey of the distribution of production.

It is interesting to note that in a survey made in 1945, 47.4 per cent of the products were distributed through wholesale channels, (including restaurants and institutions); 29.6 per cent sold through retail (house to house) sales, and 21.0 per cent through stores operated in conjunction with the bakeries.

The Province of Quebec differs from the other provinces in that the greater distribution was thorough retail sales, (house to house). These sales being 46.9 per cent; wholesale, (including restaurants and institutions) 41.6 per cent; and retail through own stores 11.5 per cent. Ontario showed sales through wholesale, including restaurants and institutions 42.8 per cent; retail (house to house), 31.8 per cent and retail thorough own stores 25.4 per cent. The other provinces showed that distribution was mainly through wholesale channels. See table below for detailed information.
