SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

ABBREVIATIONS

n.e.s.: Not elsewhere specified.

S.I.C.: Standard Industrial Classification.

NOTES TO USERS

1. "Explanatory Notes" on selected statistical terms may be found at the back of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.
2. Principal statistics of establishments classified by size group, based on total employed, were omitted from industry reports for the years 1968-1971 and principal statistics of establishments by type of organization were last published in the 1967 industry reports. However, this information is available on request from the Manufacturing and Primary Industries Division. In the case of an extensive request, involving a large number of industries or years, it may be necessary to levy a charge.
3. Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

ABRÉVIATIONS

n.c.a.: Non classé(e)s ailleurs.

C.T.I.: Classification type des industries (titre français du système de classification industrielle de 1960).

C.A.E.: Classification des activités économiques (titre français du système de classification industrielle de 1970).

NOTES AU LECTEUR

1. On trouvera à la fin de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.
2. Les tableaux renfermant les statistiques principales des établissements par tranche de taille mesurée par les effectifs ont été supprimés des publications de 1968 à 1971. Les statistiques principales des établissements selon la forme juridique ont été données pour la dernière fois dans les publications de 1967. On peut toutefois obtenir ces renseignements en s'adressant à la Division des industries manufacturières et primaires. Les demandes élaborées visant un grand nombre d'industries ou d'années pourront entraîner la facturation des frais.
3. Il suffit au lecteur qui désire connaître la valeur de la production (activité manufacturière) d'additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

1973

Definition of the Industry

This industry covers establishments primarily engaged in manufacturing bread, cakes, pastries and similar "perishable" bakery products.

Hotels, restaurants and public institutions which bake for their own requirements are classified in the 1970 Standard Industrial Classification as service establishments and as such are not included in this publication. Chain and department stores operating bakeries and merchandising the products thereof within their respective establishments are not included.

Some types of establishments primarily engaged in making a single kind of product, such as doughnuts from a purchased mix, and selling for consumption on or off the same premises are deemed to be a restaurant and are not included.

Where the chain and department stores maintain separate accounts for their baking operations, the manufacturing is included.

Review of 1973

Despite a price increase in the cost of hard wheat flour averaging about 19% over 1972, the industry in 1973 advanced almost 11% measured by the value of shipments of own manufacture. A modest overall increase in the cost of materials and supplies of 7.3% coupled with an average production wage increase of 12.2% did not prevent the value added by manufacturing activity advancing an impressive 13.8% or more than double the rate of 1972.

Rapidly rising sugar prices (up 33% over 1972) did not appear to adversely affect the industry as whole. This is because the output of sweet goods from the industry tends to play a minor product role as compared to the principal product namely bread and rolls. These are more effectively insulated from raw material price fluctuations than are sweet goods. As a result, rising commodity markets have had a more serious effect on the small baker who tends to concentrate his output more heavily in the specialty sweet goods items.

In this regard, it is interesting to note from Table 3 that 70% of the establishments in this industry employ less than 10 people while 87% employ less than 20.

Beginning in 1973, no estimate of the bread produced by small establishments not reporting detail has been included in the data for bread in Table 7. In 1972, both the quantity and value of bread was advanced about 12% to attempt to measure this activity. For more detailed figures, please consult the footnote in Table 7.

Définition de l'industrie

Cette branche d'activité comprend les établissements qui s'occupent principalement de la fabrication du pain, des gâteaux, des pâtisseries et d'autres produits périssables de boulangerie ou de pâtisserie.

Les hôtels, restaurants et établissements publics qui fabriquent ces produits pour répondre à leurs propres besoins sont classés, aux fins de la Classification des activités économiques de 1970, "Établissements de service" et, en tant que tels, ne figurent pas dans la présente publication. Les grands magasins et les magasins à succursales multiples qui exploitent des boulangeries-pâtisseries et en écoulent les produits n'y figurent pas non plus.

Certains genres d'établissements qui s'occupent principalement de fabriquer un seul type de produit, par exemple des beignes préparés à partir d'un mélange acheté, qui les vendent au consommateur sur les lieux mêmes ou à l'extérieur, sont considérés comme restaurants et ne figurent pas dans le présent rapport.

Dans le cas des grands magasins et des magasins à succursales multiples qui tiennent des comptes distincts sur l'exploitation d'une boulangerie-pâtisserie, les activités de celle-ci sont comprises dans l'univers de la présente publication.

Revue de 1973

Malgré une augmentation du prix de la farine de blé dur d'environ 19 % par rapport à 1972, la valeur des livraisons de produits de propre fabrication en 1973 a progressé de presque 11 %. Le faible accroissement (7.3 %) du coût des matières et des fournitures ainsi que l'augmentation de (2.2 %) de la moyenne des salaires de la production n'ont pas empêché la valeur ajoutée par la fabrication de progresser fortement (13.8 %), soit plus du double du taux de 1972.

La hausse rapide des prix du sucre (+ 33 % par rapport à 1972) ne semble pas avoir affecté l'ensemble de l'industrie. Cela provient du fait que la production de produits sucrés ne joue qu'un rôle secondaire par comparaison aux produits principaux comme le pain, les petits pains et les brioches. Mais ces derniers sont mieux protégés contre les fluctuations des prix des matières brutes que ne le sont les produits sucrés. Il s'ensuit que la hausse enregistrée sur le marché des produits a affecté plus sérieusement les petits établissements de boulangerie qui ont tendance à axer leur production en grande partie sur les produits sucrés.

Dans le même ordre d'idée, il est intéressant de noter, au tableau 3, que 70 % des établissements de cette industrie emploient moins de 10 personnes alors que 87 % en emploient moins de 20.

À partir de 1973, les données sur le pain, au tableau 7, ne comprennent pas d'estimation pour le pain produit par les petits établissements ne déclarant pas en détail. En 1972, la quantité et la valeur du pain avaient été majorées d'environ 12 % dans le but de mesurer cette activité. Pour des chiffres plus détaillés, veuillez vous reporter au renvoi au bas du tableau 7.

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment — Smallest operating unit capable of reporting certain specified input and output data; usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity — Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture — Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters' work on own ore valued at imputed charge to mine.

Value added — Net output as measured by gross output less purchased commodity inputs used and contract work by others.

(a) **Value added, manufacturing activity:** Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

(b) **Value added, total activity:** Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages — Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use; beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Inventories — Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity, value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units — Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillés; se reporter aux "Notes au lecteur".

Établissement — Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

Grands établissements

Coût des matières et fournitures, du combustible et de l'électricité — De manière générale, concerne uniquement la consommation de produits achetés, au prix franco. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication — Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignation au Canada sont prises en compte dans les stocks. En ce qui concerne l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, les fabricants de matériel ferroviaire roulant ainsi que l'industrie de construction et réparation de navires, la valeur de la production remplace les livraisons dans les tableaux relatifs aux statistiques principales. Pour déterminer la valeur du travail effectué par une fondene intégrée sur du minerai lui appartenant, on calcule le coût qu'il faudrait imputer à la mine.

Valeur ajoutée — Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

(a) **Valeur ajoutée, activité manufacturière:** valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

(b) **Valeur ajoutée, activité totale:** comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'oeuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires — Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés; ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc., versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks — Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignation.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires — Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970).
