SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

ABBREVIATIONS

- n.e.s.: Not elsewhere specified.
- S.I.C.: Standard Industrial Classification.

NOTES TO USERS

1. "Explanatory Notes" on selected statistical terms may be found at the back of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.
2. Principal statistics of establishments classified by size group, based on total employed, were omitted from industry reports for the years 1968-1971 and principal statistics of establishments by type of organization were last published in the 1967 industry reports. However, this information is available on request from the Manufacturing and Primary Industries Division. In the case of an extensive request, involving a large number of industries or years, it may be necessary to levy a charge.
3. Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

ABRÉVIATIONS

- n.c.a.: Non classé(e)s ailleurs.
- C.T.I.: Classification type des industries (titre français du système de classification industrielle de 1960).
- C.A.É.: Classification des activités économiques (titre français du système de classification industrielle de 1970).

NOTES AU LECTEUR

1. On trouvera à la fin de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.
2. Les tableaux renfermant les statistiques principales des établissements par tranche de taille mesurée par les effectifs ont été supprimés des publications de 1968 à 1971. Les statistiques principales des établissements selon la forme juridique ont été données pour la dernière fois dans les publications de 1967. On peut toutefois obtenir ces renseignements en s'adressant à la Division des industries manufacturières et primaires. Les demandes élaborées visant un grand nombre d'industries ou d'années pourront entraîner la facturation des frais.
3. Il suffit au lecteur qui désire connaître la valeur de la production (activité manufacturière) d'additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

1974

Definition of the Industry

This industry covers establishments primarily engaged in manufacturing bread, cakes, pastries and similar "perishable" bakery products.

Hotels, restaurants and public institutions which bake for their own requirements are classified in the 1970 Standard Industrial Classification as service establishments and as such are not included in this publication. Chain and department stores operating bakeries and merchandising the products thereof within their respective establishments are not included.

Some types of establishments primarily engaged in making a single kind of product, such as doughnuts from a purchased mix, and selling for consumption on or off the same premises are deemed to be a restaurant and are not included.

Where the chain and department store maintain separate accounts for their baking operations, the manufacturing is included.

Industry Review - 1974

The adjusted value of shipments and work done increased by \$128.2 million or 21.4%, advancing to \$726.6 million from \$598.4 million in 1973. The value of shipments of bread and rolls (approximately 60% of the industry in value terms), increased by \$79.1 million or 21.5%, rising to \$446.7 million in 1974 as compared to \$367.6 million in 1973. The volume of shipments increased by only 1.3%, while the average selling price rose by 20.5%.

The increased selling prices are a direct result of higher manufacturing costs, principally for raw materials and labour. For the industry as a whole, the cost of raw materials purchased and used rose from \$214.8 million in 1973 to \$285.5 million in 1974, an increase of 33.0%, due mainly to a rise of 37.6% in the average unit prices of raw materials. Some of the more notable commodity price increases were: hard wheat flour (bread) + 30.5%; soft wheat flour (cake) + 25%; shortening + 52%; and sugar + 120%. The ratio of raw materials to gross manufacturing outputs (manufacturing revenue adjusted for changes in inventories of goods in process and finished goods of own manufacture) advanced to 39.2% in 1974 from 35.8% in 1973.

The number of production workers declined in 1974, dropping to 16,500 as compared to 17,789 in 1973, a decrease of 1,289 or 7.2%. Total wages paid to workers in this category rose by 9.8% moving to \$125,356,000 in 1974 from \$114,204,000 in 1973, while the average annual wage in 1974 was \$7,597 an increase of \$1,377 (18.3% over 1973). The average hourly rate of pay rose from \$3.18 in 1973 to \$3.69 in 1974, an increase of 16.0%.

Définition de l'industrie

Cette branche d'activité comprend les établissements qui s'occupent principalement de la fabrication du pain, des gâteaux, des pâtisseries et d'autres produits périssables de boulangerie ou de pâtisserie.

Les hôtels, restaurants et établissements publics qui fabriquent ces produits pour répondre à leurs propres besoins sont classés, aux fins de la Classification des activités économiques de 1970, "Établissements de service" et, en tant que tels, ne figurent pas dans la présente publication. Les grands magasins et les magasins à succursales multiples qui exploitent des boulangeries-pâtisseries et en écoulent les produits n'y figurent pas non plus.

Certains genres d'établissements qui s'occupent principalement de fabriquer en seul type de produit, par exemple des beignets préparés à partir d'un mélange acheté, qui les vendent au consommateur sur les lieux mêmes ou à l'extérieur, sont considérés comme restaurants et ne figurent pas dans le présent rapport.

Dans le cas des grands magasins et des magasins à succursales multiples qui tiennent des comptes distincts sur l'exploitation d'une boulangerie-pâtisserie, les activités de détail sont comprises dans l'univers de la présente publication.

Revue de l'industrie - 1974

La valeur rectifiée des livraisons et du travail exécuté a augmenté de \$128.2 millions (21.4 %), passant de \$598.4 millions en 1973 à \$726.6 millions en 1974. La valeur des livraisons de pain et de petits pains, comptant pour 60 % environ de la valeur pour l'ensemble de cette industrie, a augmenté de \$79.1 millions (21.5 %), passant de \$367.6 millions en 1973 à \$446.7 millions en 1974. Le volume des livraisons a progressé de 1.3 % seulement, tandis que le prix de vente moyen a augmenté de 20.5 %.

La hausse des prix de vente est directement attribuable à l'augmentation des coûts de fabrication surtout dans le cas des matières brutes et de la main-d'oeuvre. Dans l'ensemble de l'industrie, le coût des matières brutes achetées et utilisées est passé de \$214.8 millions en 1973 à \$285.5 millions en 1974, soit une hausse de 33.0 %, attribuable principalement à une progression de 37.6 % des prix unitaires moyens des matières brutes. Parmi les prix qui ont le plus augmenté, on peut citer ceux de la farine de blé dur (pain) (+ 30.5 %), de la farine de blé mou (gâteau) (+ 25 %), du shortening (+ 52 %) et du sucre (+ 120 %). Le ratio des matières brutes à la production brute (les recettes de la fabrication rectifiées en fonction des changements dans les stocks des produits en cours et des produits finis de propre fabrication) est passé de 35.8 % en 1973 à 39.2 % en 1974.

Le nombre de travailleurs de la production a diminué de 1,289 (7.2%), passant de 17,789 en 1973 à 16,500 en 1974. Le total des salaires versés aux travailleurs de cette catégorie a augmenté en 1974 de 9.8 % pour se fixer à \$125,356,000 comparativement à \$114,204,000 en 1973. Le salaire annuel moyen s'est élevé en 1974 à \$7,597, soit une augmentation de \$1,377 (18.3 %) sur l'année précédente. Le taux de rémunération horaire moyen est passé de \$3.18 en 1973 à \$3.69 en 1974, soit une progression de 16.0 %.

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment – Smallest operating unit capable of reporting certain specified input and output data; usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity – Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture – Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters' work on own ore valued at imputed charge to mine.

Value added – Net output as measured by gross output less purchased commodity inputs used and contract work by others.

(a) Value added, manufacturing activity: Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.

(b) Value added, total activity: Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages – Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use: beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Inventories – Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity; value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units – Included in the industrial industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data.)

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillés; se reporter aux "Notes au lecteur".

Établissement – Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

Grands établissements

Coût des matières et fournitures, du combustible et de l'électricité – De manière générale, concerne uniquement la consommation de produits achetés, au prix franco. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication – Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignment au Canada sont prises en compte dans les stocks. En ce qui concerne l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, les fabricants de matériel ferroviaire roulant ainsi que l'industrie de construction et réparation de navires, la valeur de la production remplace les livraisons dans les tableaux relatifs aux statistiques principales. Pour déterminer la valeur du travail effectué par une fonderie intégrée sur du minerai lui appartenant, on calcule le coût qu'il faudrait imputer à la mine.

Valeur ajoutée – Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

a) Valeur ajoutée, activité manufacturière: valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

b) Valeur ajoutée, activité totale: comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'oeuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires – Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés; ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc. versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks – Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignment.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires – Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970).
