THE BREWING INDUSTRY OF CANADA, 1939.

The output of the brewing industry in 1939 had a selling value at the factory of \$60,153,665. Sales tax and other taxes and duties paid to the Dominion and Provincial governments totalled \$16,520,323, leaving a net value of production of \$43,633,342. Beer, ale, stout and porter were the main items of production with a total of 62,780,052 gallons valued at \$59,129,600 compared with 62,468,233 gallons valued at \$56,841,181 in 1938. Other products manufactured were: aerated beverages \$655,979, wet and dry grain \$234,505 and yeast \$27,632. For detailed statistics of production, see tables 2 and 3.

The number of establishments engaged in the production of malt liquors totalled 61, located by provinces, as follows: Nova Scotia 2, New Brunswick 2, Quebec 8, Ontario 22, Manitoba 6, Saskatchewan 5, Alberta 5, and British Columbia 11. These plants represent a capital investment of \$61,645,877 in fixed and current assets, they furnished employment to 5,345 persons who were paid \$8,451,402 in salaries and wages. They also spent \$16,488,207 for materials and produced goods with a gross selling value at the factory of \$60,153,665 and a net selling value (gross less taxes) of \$43,633,342.

Compared with the previous year there was an increase of \$1,254,489 in the net value of production but decreases of \$652,012 in the cost of materials used and \$1,099,372 in the capital invested. The physical volume of production was slightly higher, the output of beer, ale, stout and porter increasing by 311,819 gallons and \$2,288,419 in value. There was a decrease of 34 in the number of employees but an increase of \$108,123 in salaries and wages paid.

With only eight of the sixty-one plants, the province of Quebec in 1939 produced 25,771,363 gallons, or over 41 per cent of the total for Canada, employed over 38 per cent of the number of employees and over 39 per cent of the capital invested in the industry. This indicates that the plants in Quebec are comparatively larger than those situated in the other provinces.

The foreign trade in beer, ale, etc., is very small in comparison with the domestic production. In 1939 imports amounted to 92,208 gallons valued at \$123,564 and exports 175,780 gallons valued at \$171,620. Compared with the previous year there was a decrease of \$7,395 in the value of the former and an increase of \$48,646 in the value of the latter.

The tables following give detailed statistics of production, capital invested, materials used, employment, fuel, power, imports and exports.
