## DEPARTMENT OF TRADE AND COMMERCE DOMINION BUREAU OF STATISTICS GENERAL MANUFACTURES BRANCH OTTAWA - CANADA

Dominion Statistician:	s.	A. Cudmore, M.A. (Oxon.), F.S.S., F.R.S.C.
Chief, General Manufactures Branch:	A .	Cohen, B.Com.

#### THE BREWING INDUSTRY OF CANADA, 1941.

The output of the brewing industry in 1941 had a selling value at the factory of \$97,780,971. Sales tax and other excise taxes and duties paid to the Dominion and Provincial governments totalled \$34,495,578, leaving a net value of production of \$63,285,393. Beer, ale, stout and porter were the main items of production with a total of 90,247,237 gallons valued at \$96,420,962 compared with 72,387,663 gallons valued at \$74,115,731 in 1940. Other products manufactured were: aerated beverages \$725,541, wet and dried grain \$422,415 and yeast \$53,985. For detailed statistics of production, see tables 2 and 3.

The number of establishments engaged in the production of malt liquors totalled 61, located by provinces, as follows: Nova Scotia 2, New Brunswick 2, Quebec 8, Ontario 22, Manitoba 6, Saskatchewan 5, Alberta 5, and British Columbia 11. These plants represent a capital investment of \$68,360,886 in fixed and current assets, they furnished employment to 5,932 persons who were paid \$10,512,805 in salaries and wages. They also spent \$34,343,935 for materials and produced goods with a gross selling value at the factory of \$97,780,971 and a net selling value (gross less taxes) of \$63,285,393.

Compared with the previous year there was an increase of \$12,673,475 in the net value of production, \$9,467,483 in the cost of materials used and \$3,406,869 in the capital invested. The physical volume of production was considerably higher, the output of beer, ale, stout and porter increasing by 17,859,574 gallons and \$22,305,231 in value. There was also an increase of 412 in the number of employees and an increase of \$1,508,005 in salaries and wages paid.

With only eight of the sixty-one plants, the province of Quebec in 1941 produced 38,948,685 gallons, or over 43 per cent of the total for Canada, employed over 37 per cent of the number of employees and over 40 per cent of the capital invested in the industry. This indicates that the plants in Quebec are comparatively larger than those situated in the other provinces.

The tables following give detailed statistics of production, capital invested, materials used, employment, fuel and power.
