Acting Chief, Census of Industry:	A. Cohen, B. Com.

THE DISTILLED LIQUOR INDUSTRY IN CANADA, 1931.

The Distilled Liquor Industry has expanded from a production of \$3,296,545 in 1922 to \$43,752,420 in 1929 owing partly to the modification of prohibition laws in Canada and also to the fact that a large part of its production was exported directly or indirectly to the United States. Since 1930, however, due to the general depressed business conditions prevailing, the industry experienced considerable recession. The number of employees dropped from 2,219 in 1929 to 1,822 in 1931, salaries and wages from \$3,132,497 to \$2,223,477 and value of production from \$43,752,420 to \$13,055,971.

In 1931 there were twenty-three establishments reporting. Of these, eight did bottling only and one distilled wine spirits on commission. These twenty-three establishments in 1931 reported a capital investment of \$55,863,010, a payroll of 1,822 persons who received \$2,223,477 in salaries and wages and had an output valued at \$13,055,971.

This industry performs three distinct operations, viz., (1) distillation of liquors which are stored away for at least two years for maturing and which are, therefore, not sold during the current year, (2) distillation of non-potable alcohol which may be sold during the year that it is produced and (3) bottling of matured liquors which have been produced in previous years. Several changes have, therefore, been made in the schedule for 1931 in order to show each of these operations more clearly as well as to show the value of new products made by the industry each year.

Whiskies and other potable spirits produced during the year and put in bond for maturing totalled 4,954,123 gallons with an inventory value of \$2,449,161 while whiskies and other potable spirits bottled or shipped in bulk totalled 3,504,421 gallons valued at \$12,959,924. Other important products were denatured alcohol 2,092,610 gallons valued at \$1,033,895 and non-potable alcohol 1,404,081 gallons valued at \$513,374. In order to avoid duplication, however, the prime cost of spirits produced in previous years and which were bottled or shipped in bulk during 1931 must be deducted from the value of production in order to arrive at the value of new products made by the industry in 1931. Detailed statistics of production by provinces are given in table 2.

Imports of distilled liquors in 1931 totalled 1,515,949 gallons with a value of \$24,807,259; this is a decrease of 581,333 gallons over 1930. Exports amounted to 2,562,298 gallons valued at \$12,460,929, a decrease of 805,462 gallons as compared with 1930. There were also 190 gallons of distilled liquors re-exported in 1931.

Detailed statistics of production, materials used, imports and exports, capital, employment, etc., are given in the tables following.

THE DISTILLED LIQUOR INDUSTRY IN CANADA, 1931.

^x Includes bottling establishments which were previously excluded.

Size of Establishments

The tendency towards concentration in industrial enterprise is exemplified in a series of tables which present in a threefold way the size of establishments in the Distilled Liquor Industry measured by (a) capital investment, (b) gross value of production and (c) employment. The tables, compared for a number of years, further serve to indicate the movement of capital, production and employment within the industry.

In 1931 the establishments reporting numbered twenty-three with a total capital investment of \$55,863,010, a total gross value of production of \$13,055,971 and a total employment of 1,822 persons. Of the total number of establishments, five had a combined capital investment of \$42,930,900, or 77 per cent of the total invested in the

THE DISTILLED LIQUOR INDUSTRY IN CANADA, 1931.

industry and an average investment per establishment of \$8,586,180. In gross value of production three establishments had a combined output of \$7,831,120 or 60 per cent of the total for the industry and an average output per establishment of \$2,610,373. Of the total number of employees, three establishments had a combined payroll of 1,133 persons or 62 per cent of the total and an average employment per establishment of 378.
