WINERIES
(S.I.C. 1470)

1966

Tabular presentations of statistical data in this publication are aligned to show Manufacturing activity and total activity of the establishments classified to this industry.

Wineries have two distinct phases of operations:

1. Production of wines; current production as a rule is not sold. It is placed in storage for prescribed maturing periods.
2. Bottling and/or bulk shipments of matured wines.

When an analysis of all or part of the industry is undertaken, these factors should be considered.

NOTE

The detailed "Concepts and Definitions" notes, usually carried each year, have been omitted from this 1966 report for reasons of economy. Reference to these notes may be had by consulting any 1965 report in this series. Failing this, a copy may be obtained free of charge upon application to the Manufacturing and Primary Industries Division of the Bureau.
