THE AERATED WATERS INDUSTRY

1949

Four hundred and eighty-four establishments in the Aerated Waters Industry in 1949 had a gross value of production of \$85,656,395. The dollar value increase was almost 28 per cent higher than in 1948 when the gross value of production amounted to \$67,047,725. During the year, the Industry employed 7,812 people and paid them \$14,599,204 in salaries and wages. The raw materials used cost \$32,069,188.

Carbonated Beverages are, naturally, the principal commodity produced within the Industry and amounted to \$72,049,318, an increase over 1948 of \$15,647,820. The greater value in 1949 was due to an increase of 18 per cent in volume plus an increase of 8 per cent in price. The volume increase was due to the operation of 26 more manufacturing establishments combined with an increased capacity and efficiency in some plants. Syrups, concentrates and extracts manufactured had a gross value of \$13,240,733 while the total of other products amounted to \$366,344.

In addition to the Carbonated Beverages produced in the Aerated Waters Industry, there were also 1,936,466 gallons with a value of \$1,094,486 produced in the Brewing Industry in the same period.

It is significant that 75 per cent or better than 74,000,000 gallons of Carbonated Beverages were produced in the two central provinces of Ontario and Quebec. The western provinces including British Columbia produced nearly 18,000,000 gallons while the Atlantic provinces had an output of about 7,000,000 gallons.

In 1949, the Industry paid out in salaries and wages \$14,599,204, an increase of \$2,584,361 over 1948. This increase is accounted for by the addition of 1,129 people as well as a 3.9 per cent overall increase in the average annual salary and wage paid in 1948.
