# THE CARBONATED BEVERAGES INDUSTRY 1956

## (AERATED WATERS)

The Carbonated Beverages Industry performs two distinct industrial operations, viz., the manufacture of syrups or concentrates for use in making soft drinks, and bottling operations where the syrups or concentrates are combined with carbon dioxide gas and water then bottled for distribution. Firms in this industry may carry on these operations in varying degrees, although the greatest number of plants are bottlers only, and are usually located in urban areas where distribution presents fewer problems.

In 1953, in line with the Bureau's new policy, this industry was changed from a value-of-production basis to value-of-shipments. With this change it became necessary to obtain Inventory values which could be used with the new value of shipments to calculate value of production and thus maintain comparability with previous years. Beginning in 1954 therefore, inventory values have been collected and value of production may be calculated. However, for 1953 no inventory values are available and it follows that no value of production can be calculated for that year.

With the Principal Statistics in Table 1, a column on "Value Added" has been included. "Value Added" is obtained by subtracting the total of cost of materials, fuel and electricity from gross value of products. Since gross value of products is not available for 1953 the value of shipments was used, and from this the cost of materials, fuel and electricity was deducted. Thus the value added figure for 1953 is not strictly comparable with previous or succeeding years.

In 1954 and 1955 only the finished goods inventory change was used to calculate value of production. In 1956, however, goods-in-process in addition to finished goods inventories were used.

During the last ten years this industry has almost doubled its volume output. Consumption of soft drinks in Canada in 1956 was 141 bottles per person. This is based on all sizes of bottles and total population and excludes fountain drinks. In 1956 the Industry recorded increases in volume and value of shipments as well as in costs of materials, labour, etc.

The selling value at the factory (exclusive of sales tax) for all products in 1956 was \$121,340,498. The salaries and wages paid amounted to \$23,055,967 and materials used totalled \$38,910,429.

The principal commodity shipped is, of course, "soft drinks" which amounted to over 98 million cases in 1956 with a factory selling value of nearly 106 million dollars. Of this volume nearly 74 million cases were produced in Quebec and Ontario. This Industry also produces concentrates, syrups and extracts, etc., for use mainly within the industry.

In addition to the aerated waters produced in Carbonated Beverages Industry there were 2,212,352 gallons value at \$1,934,738 produced in the Brewing Industry.
