PREFACE.

This report gives the results of the Census of Industry for the year 1917 in respect of creameries, cheese and condensed milk factories. As in the case of the Report on the Production of Creameries and Cheese Factories for 1915 and 1916, published in 1917, the data have been compiled by the Dominion Bureau of Statistics in collaboration with the Governments of the nine provinces of Canada. But the inquiry has covered a much wider field than that of 1917, embracing many features common to the Census of Industry as a whole. Thus, in addition to the quantities and values of products, the data collected comprise particulars of capital invested, labour statistics, materials used, number of days that factories were in operation, the fuel and power used and expenses of miscellaneous character. All these matters are included in the report; and, moreover, the data are given by counties and districts as well as by provinces.

In undertaking a comprehensive statistical investigation of Canadian dairy factories, the Dominion Bureau of Statistics has followed the principle of working as closely as possible with the Dairy Branches of the Agricultural Departments of the Provincial Governments. From the dairying experts in every province, as well as from those of the Dairy and Cold Storage Branch of the Dominion Department of Agriculture, the Bureau received cordial assistance, and the measures adopted were the result of mutual arrangements according to the exigencies of the case in each province. By this plan, also, duplicate inquiries were avoided, and the results obtained were placed at the disposal of the provincial authorities immediately upon completion of the work. For all the provinces, excepting Quebec, the data were collected upon an uniform schedule, jointly agreed to by the Dominion and Provincial Governments, the copies being printed by the Dominion Bureau. For all the provinces, excepting Quebec and Ontario, the schedules were distributed and collected by the Dairy Branches of the Provincial Departments of Agriculture, the schedules when completed being returned for compilation to the Dominion Bureau of Statistics. In the case of Ontario, the schedules were distributed, collected and compiled by the Dominion Bureau of Statistics; but the list of factories was furnished by the Dairy Branch of the Ontario Department of Agriculture, which also rendered assistance in securing dilatory returns.

In Quebec, where annual statistics of the dairy factories of the province have been collected since 1914, the Quebec Bureau of Statistics placed the data of 1917 freely at the disposal of the Dominion Bureau, lending the original schedules from which were abstracted the figures analogous to those collected from the other provinces.

It is desirable to point out that the statistics in this Report do not embrace butter made on the farm, which is sold under the general term of "dairy butter," and which constitutes the larger proportion of the total production. Nor do they include the small proportion of home-made cheese. There are no annual statistics of the production of home-made butter and cheese; but the Census of 1911 showed that in 1910 the total production of home-made butter was 137,110,200 lb., or 68 per cent of the total butter production, viz., 201,808,365 lb., and that for cheese in the same year the home-made product amounted to 1,371,092 lb., or 0.7 per cent of the total cheese production of 201,275,297 lb.

The statistics have been collected and compiled under the supervision of Miss F. A. BROWN, of the staff of the Industrial Census, and the report has been written by Mr. ERNEST H. GODFREY, F.S.S., in charge of Agricultural Statistics.

R. H. COATS,

Dominion Statistician.

DOMINION BUREAU OF STATISTICS,
OTTAWA, DECEMBER 31, 1918.

DAIRY FACTORIES OF CANADA, 1917

Introduction.

Forming part of the Census of Industry carried out by the Dominion Bureau of Statistics in 1918 for the year 1917, the tables which follow record the results obtained by the compilation of schedules collected from the dairy factories of each of the provinces of Canada. These factories are grouped into five divisions, viz., A, Creameries; B, Cheese Factories; C, Combined Butter and Cheese Factories; D, Condensed Milk Factories; and E, All Factories, i.e., the totals combined of the data for Creameries, Cheese Factories, Combined Factories and Condensed Milk Factories. For each group the data collected comprise the number of establishments, the capital invested, the number of employees, their salaries and wages, the number of patrons and of cows, the quantities and values of materials used, and data respecting the time factories operated, the nature and quantity of fuel and of power, the rent of offices and of machinery and the cost of repairs, taxes, etc.

Comparisons with previous years are given where possible, and to the main tables are added returns of the Canadian exports and imports of dairy products covering a series of years.

Establishments, Patrons and Number of Cows.

The total number of Canadian creameries and factories operating in 1917 is returned as 3,418, including 949 creameries, 1,900 cheese factories, 549 combined factories (butter and cheese) and 20 condensed milk factories. The total number of patrons (i.e. dairy farmers contributing milk or cream) in 1917 was 248,683. These figures, compared with those of 1915 and 1916, are shown, by provinces, in Table I.

1. Number of Establishments and Patrons of Dairy Factories, 1915, 1916 and 1917.

¹Includes Prince Edward Island and Nova Scotia.

A considerable proportion of the factories failed to include in their returns the number of cows furnishing milk; so that no certain data were obtained as to the total number of milch cows used in factory production. If, however, we may assume that the number of cows furnishing milk to the factories that failed to reply to this question bore, for each province, the same proportion to the quantity of manufactured products as did the number of cows in the case of the factories that duly answered the question, we may estimate that the total number of cows that furnished milk was about 1,568,200, distributed by provinces as follows: Prince Edward Island 15,540; Nova Scotia 19,806; New Brunswick 15,834; Quebec 545,869; Ontario 712,788; Manitoba 96,928; Saskatchewan 59,785; Alberta 92,554 and British Columbia 9,095. The total estimated number of milch cows in Canada in 1917 was 3,543,600; so that the number estimated as supplying the factories, viz., 1,568,200, represents 44 p.c. of the whole.

Deliveries of Milk and Cream.

Table 2 shows, by provinces, the deliveries of milk to each description of factory for 1917, as compared with 1915 and 1916.

Total	610,061,994	588,223,633	509,751,932	2,630,001,765	2,600,542,987	2,902,564,856⁴

¹Including 18,051,345 lb. delivered to condensed milk factories in Prince Edward Island, Nova Scotia and Quebec.
²Including 157,805,002 lb. delivered to condensed milk factories in Ontario. ³Including 19,815,342 lb. delivered to condensed milk factories in British Columbia. ⁴Including 195,671,689 lb. delivered to condensed milk factories.

For all Canada the total deliveries of milk in 1917 amounted to 2,902,564,856 lb., as compared with 2,600,542,987 lb. in 1916 and 2,630,001,765 lb. in 1915. In the province of Quebec, the deliveries of milk to creameries were less in 1917 than in 1916, whilst the deliveries to cheese factories showed an increase. In Ontario, for the reason given in the footnote on page v, the deliveries to combined factories showed a decrease, and those to cheese factories an increase, as did also the total deliveries. It is not possible to compare the deliveries of cream in 1917 with those of 1915 and 1916, because in 1917 the deliveries of cream were expressed in lb. of butter fat, whilst in the report for 1915 and 1916 they were given in lb. of cream. The total deliveries of cream in 1917, expressed in lb. of butter fat, amounted to 58,810,682. (See Table IV on page 58.)

Production and Value of Creamery Butter.

The total production of creamery butter in Canada, in 1917, was returned as 87,526,939 lb., of the value of \$34,274,218, as compared with 82,564,130 lb., of the value of \$26,966,355, in 1916, and 83,991,453 lb., of the value of \$24,385,052, in 1915. Comparative figures of production and value for the three years 1915, 1916 and 1917 are given in Table 3.

3. Production and Value of Creamery Butter by Provinces, 1915, 1916 and 1917.

This table shows that the largest production of creamery butter in 1917 was in Quebec, with 34,392,562 lb., as compared with 34,323,275 lb. in 1916. The butter production of the other provinces was in 1917 as follows, the figures for 1916 being placed within brackets for comparison: Ontario 28,714,352 lb. (24,680,109 lb.), Alberta 8,943,971 lb. (8,521,784 lb.), Manitoba 7,050,921 lb. (6,574,510 lb.), Saskatchewan 4,220,758 lb. (4,310,669 lb.), Nova Scotia 1,746,662 lb. (1,586,679 lb.), British Columbia 1,294,743 lb. (1,243,292 lb.), Prince Edward Island 597,271 lb. (613,880 lb.) and New Brunswick 565,699 lb. (709,932 lb.). The total production of creamery butter in Canada for 1917 shows an increase over 1916 of 4,962,809 lb., the increases being in Nova Scotia, Quebec, Ontario, Manitoba, Alberta and British Columbia. The other three provinces showed a decrease.

SESSIONAL PAPER No. 17a

Production and Value of Factory Cheese.

As shown in Table 4, the total production of factory cheese in 1917 was 194,904,336 lb., of the value of \$41,180,623, as compared with 192,968,597 lb., of the value of \$35,512,622, in 1916 and 183,887,837 lb., of the value of \$27,097,176 in 1915.

4. Production and Value of Factory Cheese by Provinces, 1915, 1916 and 1917.

Ontario and Quebec together produced 97 p.c. of the total factory-made cheese in Canada. In Ontario the quantity produced in 1917 was 121,173,086 lb., of the value of \$25,771,944, as compared with 126,015,870 lb., of the value of \$23,312,935, in 1916, and 125,001,136 lb., of the value of \$18,831,413, in 1915. By provinces, the production of cheese in 1917 was as follows, the figures of 1916 being given within brackets: Ontario 121,173,086 lb. (126,015,870 lb.); Quebec 67,835,017 lb. (61,906,750 lb.); Prince Edward Island 2,234,985 lb. (2,121,736 lb.); Alberta 1,274,905 lb. (745,122 lb.); New Brunswick 1,244,106 lb. (1,185,664 lb.); Manitoba 1,003,646 lb. (880,728 lb.); British Columbia 71,094 lb. (18,000 lb.); Nova Scotia 67,497 lb. (94,727 lb.).

Wholesale Prices of Creamery Butter and Factory Cheese.

In Table 5 are shown, by provinces, the average wholesale prices per lb. of creamery butter and factory cheese for each of the years 1915, 1916 and 1917.

5. Wholesale Prices per lb. of Creamery Butter and Factory Cheese, 1915, 1916 and 1917.

For Canada the average wholesale price of creamery butter works out to 39 cents per lb., as compared with 33 cents in 1916 and 30 cents in 1915. By provinces, the price for 1917 is highest in British Columbia, 46 cents, the prices in the remaining provinces ranging as follows: New Brunswick and Nova Scotia 41 cents; Prince Edward Island 40 cents; Quebec 40 cents; Ontario 39 cents; Manitoba 37 cents; Saskatchewan 37 cents and Alberta 38 cents.

The average wholesale price of factory-made cheese for Canada was for 1917 21 cents per lb. as compared with 18 cents in 1916 and 15 cents in 1915. For 1917 the highest price per lb. was in British Columbia 30 cents, and in the other provinces the average price was close to 20 or 21 cents per lb.

Comparative Statistics, 1900-1917.

In Table 6 the production and value of creamery butter and factory cheese for all Canada is compared for the years 1900, 1907, 1910 and 1915-17.

6. Production and Value of Creamery Butter and Factory Cheese, 1900, 1907, 1910, 1915, 1916 and 1917.

	Establishments.	Creamery Butter.		Factory Cheese.	
	No.	lb.	\$	lb.	\$
1900	3,576	36,066,739	7,240,972	220,833,269	22,221,430
1907	3,515	45,930,294	10,949,062	204,788,583	23,597,639
1910	3,625	64,698,165	15,645,845	199,904,205	21,587,124
1915	3,513	83,991,453	24,385,052	183,887,837	27,097,176
1916	3,446	82,564,130	26,966,353	192,968,597	35,512,622
1917	3,418	87,520,939	34,274,218	194,904,336	41,180,623

For 1900 and 1910 the figures shown are those of the decennial census; for 1907 they are those of the special postal census of that year and for 1915, 1916 and 1917 they are the figures as jointly published by the Dominion Bureau of Statistics and the Provincial Governments.

Other Data.

In the main tables of this Report are recorded by provinces, counties or districts, a variety of other statistics relating to the detailed working of the factory system, which will be of special interest to those engaged in the dairying industry, and which will also be of contributory value in connection with any survey of the total industrial operations of the Dominion.

In this connection it should be noted that the conditions governing the factory system in Quebec differ considerably from those in Ontario and the other provinces. For this reason, certain particulars collected by the uniform industrial schedule in the provinces other than Quebec, were not applicable to or obtainable from the Quebec factories. The creameries and factories in Quebec are numerous but relatively small; each is managed by from one person to three persons, invariably males above the age of 16. They are employed only for six months in the year, and at the time when the schedules are filled up the work for the year is done, and there are practically no stocks on hand. There are no expenses for advertising nor for the delivery of milk and cream. As a rule the fuel used is wood, and the engines do not exceed 5 or 6 h.p.

CAPITAL INVESTED.—The total value of the capital invested in the dairy factories of Canada in 1917 was \$19,628,001. This sum comprises the items for land and buildings \$8,641,413, machinery and tools \$6,575,504, products, fuel and miscellaneous supplies on hand \$2,507,363, and cash and operating accounts \$1,903,721. In Ontario the capital invested was \$8,395,483 and in Quebec it was \$5,585,538. In the other provinces the amounts represented by capital invested were, in order, as follows: Manitoba \$1,630,339; Alberta \$1,538,965; British Columbia \$1,067,398; Saskatchewan \$859,975; Nova Scotia \$264,912; Prince Edward Island \$167,159; and New Brunswick \$118,232.

LABOUR STATISTICS.—The total number of dairy factory employees was 10,391, comprising 1,635 officers receiving salaries and 8,756 wage-earners, including 3,037 employees in Quebec where, except for condensed milk factories, no distinction is made between salaried employees and wage-earners. Salaries and wages paid amounted to \$5,447,346, comprising \$651,193 paid in salaries and \$4,796,153 paid in wages, including \$1,045,688 to employees in Quebec. By provinces the total amounts for salaries and wages were as follows: Ontario \$2,586,706; Quebec \$1,045,688; Alberta \$637,503; Manitoba \$529,841; British Columbia \$290,841; Saskatchewan \$225,448; Nova Scotia \$52,783; New Brunswick \$41,784 and Prince Edward Island \$36,752.

FUEL AND POWER USED.—The total value of the fuel used for creameries and cheese factories in 1917 was \$834,036. Of this amount \$408,534 were expended on coal, \$166,676 on wood and \$55,907 on other fuel, in addition to \$202,919 fuel not distinguished in Quebec. The quantity of coal used was 57,543 tons, of which 40,870 tons were used in Ontario and of wood 56,197 cords, of which 46,782 cords were used in Ontario. The total quantity of fuel consumed in Quebec was not given, but its value was returned as \$211,536, including \$8,617, the value of coal used for condensed milk. For all the provinces, except Quebec, the steam power comprised 918 engines or other units, of which 724 were in Ontario. The total h.p. available was 11,633 and the h.p. used was 9,372. In Quebec the h.p. used was 17,967. Other power used amounted in all the provinces, excepting Quebec, to 1,061 units, the available h.p. being 11,746 and the h.p. used being 10,388. In Ontario the units of power other than steam numbered 691, the available h.p. being 7,817 and the power used 6,757 h.p. In Quebec the quantity used of h.p. other than steam was 894.

MISCELLANEOUS.—The total amount paid to patrons was \$73,863,845, and the total expenditure, including salaries and wages \$5,447,346, fuel \$834,036, materials \$3,844,699 and miscellaneous expenses \$2,498,334, was \$86,488,260. In addition to the value of the production of butter and cheese, other products were sold to the value of \$18,424,485 (see Table VIII, page 86), which added to the value of butter \$34,274,218, and cheese, \$41,180,623, brought up the total value of the products of dairy factories in 1917 to \$93,879,326.

Note.—In the above table all power is owned except where otherwise indicated in the heading of columns.

N.B.—Dans ce tableau, à moins d'indication contraire, la force motrice est produite par les consommateurs.

¹Excluding Quebec. In Quebec the horse power actually employed was 17,967 for steam engines and 894 for other power.

²À l'exclusion de Québec. Dans cette province on utilisa 17,967 c.-v. produits par des machines à vapeur et 894 c.-v. de toutes autres sources.

PRÉFACE.

Ce rapport contient les résultats du Recensement Industriel de 1917, en ce qui concerne les beurreries, fromageries et fabriques de lait condensé. Conformément au précédent établi par le rapport sur la production des beurreries et fromageries en 1915 et 1916, publié en 1917, ces données ont été compilées par le Bureau Fédéral de la Statistique, en collaboration avec les gouvernements des neuf provinces du Canada. Mais cette investigation a couvert un champ beaucoup plus large que l'enquête précédente, car elle embrasse de nombreux éléments communs à toutes les industries. Ainsi, outre les quantités et la valeur des produits, elle nous renseigne sur les capitaux engagés, le personnel et la main-d'œuvre, les matières premières employées, la durée des opérations, le combustible consommé, la force motrice utilisée et les dépenses diverses d'exploitation. On trouvera tous ces détails dans le présent rapport et, de plus, les informations sont données non seulement par provinces, mais aussi par comtés et districts.

En se livrant à cette enquête détaillée sur les établissements de l'industrie laitière au Canada, le Bureau Fédéral de la Statistique s'est concerté aussi étroitement que possible avec les différents services affectés à l'industrie laitière dans les ministères provinciaux de l'Agriculture. Les fonctionnaires et inspecteurs spéciaux de toutes les provinces, de même que ceux de la division de l'Industrie Laitière et de la Réfrigération du ministère fédéral de l'Agriculture nous ont prêté leur entier concours, et les mesures adoptées furent le résultat d'accords adoptés aux exigences spéciales de chaque province. Par ce moyen, nous avons évité le double emploi, les résultats obtenus ayant été communiqués aux autorités provinciales dès l'achèvement du travail.

Dans toutes les provinces à l'exception de Québec, les données du recensement furent recueillies au moyen d'un questionnaire uniforme approuvé par tous les gouvernements provinciaux et les autorités fédérales, et imprimé à l'Imprimerie nationale. Dans toutes les provinces, à l'exception de Québec et Ontario, ces formules ont été distribuées par les soins des Divisions de l'Industrie Laitière des ministères provinciaux de l'Agriculture puis, après avoir été remplies, ont été envoyées au Bureau Fédéral de la Statistique pour y être compilées.

Dans la province d'Ontario, les formules ont été distribuées, recueillies et compilées par le Bureau Fédéral de la Statistique, mais la liste des fabriques a été fournie par les autorités provinciales, qui facilitèrent également la rentrée des rapports négligés ou différés.

Enfin, dans la province de Québec, où l'industrie laitière fait l'objet de statistiques annuelles colligées depuis 1914, le Bureau des Statistiques de Québec mit gracieusement les données de 1917 à notre disposition, en nous prêtant les formules originales, desquelles nous avons extrait les informations analogues à celles recueillies dans les autres provinces.

Il est à remarquer que les statistiques contenues dans ce rapport ne comprennent pas le beurre fait chez les cultivateurs, généralement vendu sous le nom de "dairy," et qui constitue la plus grande proportion de la production totale; elles ne comprennent pas, non plus, les petites quantités du fromage fabriqué chez les particuliers. Il n'existe pas de statistiques annuelles de la production du beurre et du fromage qui se font dans les fermes, mais le recensement de 1911 nous apprend qu'en 1910, il avait été fait 137,110,200 liv. de beurre "dairy" soit 68 p.c. de la production totale, qui s'élevait à 201,808,365

9 GEORGE V, A. 1919

livres; la même année, il avait été fabriqué dans les fermes 1,371,092 livres de fromage, soit 0.7 p.c. de la production totale du fromage, qui atteignait 201,275,297 livres.

Les statistiques de ce rapport ont été réunies et compilées sous la surveillance de M^{lle} F. A. BROWN, du Secrétariat du recensement industriel, et le rapport a été rédigé par M. ERNEST H. GODFREY, F.S.S., chargé de la statistique agricole.

R. H. COATS,
Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,
OTTAWA, 31 DÉCEMBRE 1918.

ÉTABLISSEMENTS DE L'INDUSTRIE LAITIÈRE AU CANADA, 1917.

Introduction.

Les tableaux qui suivent forment partie du Recensement Industriel pour 1917 auquel il a été procédé par le bureau Fédéral de la Statistique en 1918; ils donnent les résultats de la compilation des données fournies par les beurreries, fromageries, etc., de chacune des provinces du Canada. Ces établissements sont divisés en cinq catégories, savoir: A. Beurreries; B. Fromageries; C. Fabriques de beurre et de fromage; D. Fabriques de lait condensé; et E. Toutes fabriques, c'est-à-dire l'ensemble des établissements des quatre premières catégories. Pour chaque catégorie, les informations comprennent le nombre des établissements, le capital engagé, le nombre d'employés et ouvriers, leurs appointements et salaires, le nombre de fournisseurs et de vaches, les quantités et la valeur des matières premières, la durée des opérations, la nature et la quantité du combustible et de la force motrice, le loyer des locaux et de la machinerie, et le coût des réparations, des taxes, etc.

Afin de faciliter les comparaisons, nous avons placé en regard les chiffres des années précédentes, quand ce fut possible; de plus, nous avons ajouté aux tableaux principaux la statistique des exportations et importations du Canada, quant aux produits laitiers, pour une série d'années.

Établissements, fournisseurs et nombre de vaches.

En 1917, l'industrie laitière possédait, dans l'ensemble du Canada, 3,418 établissements en exploitation, soit 949 beurreries, 1,900 fromageries, 549 beurreries et fromageries combinées et 20 fabriques de lait condensé. Le nombre total de leurs fournisseurs, c'est-à-dire des fermiers qui les alimentaient de lait et de crème, s'élevait à 248,683. Ces totaux sont détaillés, par provinces, dans le tableau 1, avec chiffres comparatifs pour 1915 et 1916.

1. Nombre d'établissements de l'industrie laitière et de leurs fournisseurs, 1915, 1916 et 1917.

¹ Dont trois sont des fabriques de lait évaporé.² Y compris l'Ile du Prince-Edouard et la Nouvelle-Ecosse.

Un nombre considérable de fabriques ont négligé d'indiquer dans leur rapport le nombre des vaches dont elles absorbent le lait, de telle sorte que l'on ne possède pas de données certaines à cet égard. Toutefois, il est permis de supposer que le nombre des vaches fournissant du lait à ces établissements est en rapport avec leurs produits manufacturés dans la même proportion que l'on constate chez les établissements qui ont répondu à cette question; cela étant, nous pouvons estimer à 1,568,200 le nombre des vaches ayant approvisionné les fabriques, ce nombre se répartissant ainsi, par provinces: Ile du Prince-Edouard, 15,540; Nouvelle-Ecosse, 19,806; Nouveau-Brunswick, 15,834; Québec, 545,869; Ontario, 712,788; Manitoba, 96,928; Saskatchewan, 59,785; Alberta, 92,554 et Colombie Britannique, 9,095. Le nombre total des vaches laitières du Canada était évalué en 1917 à 3,543,700; celles dont le lait a été envoyé aux fabriques, soit 1,568,200, représenteraient donc, approximativement, 44 p. c. de la totalité.

Quantités de lait et de crème fournies aux fabriques.

Le tableau 2 indique, pour chaque province, les quantités de lait envoyées aux fabriques en 1917, comparées aux chiffres de 1915 et 1916.

Total	610,064,994	588,223,633	509,754,932	2,630,001,765	2,600,542,987	2,902,564,856⁴

¹ Y compris 18,051,345 liv. livrées aux fabriques de lait condensé dans l'Ile du Prince-Edouard, la Nouvelle-Ecosse et Québec. ² Y compris 157,805,002 liv. livrées aux fabriques de lait condensé d'Ontario. ³ Y compris 19,815,342 liv. livrées aux fabriques de lait condensé de la Colombie Britannique. ⁴ Y compris 195,671,889 liv. livrées aux fabriques de lait condensé.

Dans tout le Canada, ces livraisons de lait ont atteint 2,902,564,856 liv. au lieu de 2,600,542,987 liv. en 1916 et 2,630,001,765 liv. en 1915. Dans la province de Québec, où l'industrie laitière est très développée, on remarque que les beurreries ont reçu moins de lait en 1917 qu'en 1916, tandis que c'est le contraire pour les fromageries. Dans l'Ontario, pour la raison indiquée dans le renvoi qui est au bas de la page 95, les livraisons aux fabriques de beurre et de fromage ont diminué, mais on constate une augmentation dans les livraisons aux fromageries et à l'ensemble des fabriques. Il n'est pas possible d'établir de comparaison entre les années 1917, 1916 et 1915, en ce qui concerne la crème, parce que en 1917, les livraisons de crème sont exprimées en livres de matières grasses ou butyrique, tandis que précédemment elles étaient indiquées en livres de crème. Pour 1917, la crème fournie aux fabriques, comptée en livres de butyrique, représentait 58,810,682 livres. (Voir tableau IV, page 58.)

Beurre de fabrique—Production et valeur.

Les beurreries du Canada, au cours de l'année 1917, ont produit 87,526,939 livres de beurre, (creamery) valant \$34,274,218, au lieu de 82,564,130 livres, valant \$26,966,355 en 1916 et 83,991,453 livres, valant \$24,385,052 en 1915. On trouvera dans le tableau 3 les chiffres relatifs à la production et à la valeur du beurre de fabrique, pour les trois années 1915, 1916 et 1917.

3. Production du beurre de fabrique, par quantités et valeur, en 1915, 1916 et 1917.

Il résulte des chiffres qui précèdent que la province de Québec, en 1917, se plaçait au premier rang pour la production du beurre de fabrique (creamery) avec 34,392,562 livres au lieu de 34,323,275 livres en 1916. La production respective des autres provinces, à cet égard, atteignait les chiffres suivants, que nous faisons suivre des chiffres de 1916, placés entre parenthèses: Ontario 28,714,352 liv. (24,680,109 liv.) Alberta 8,943,971 liv. (8,721,784 liv.) Manitoba 7,050,921 liv. (6,574,510 liv.) Saskatchewan 4,220,758 liv. (4,310,669 liv.) Nouvelle-Ecosse, 1,746,662 liv. (1,586,679 liv.) Colombie Britannique 1,294,743

DOC. PARLEMENTAIRE No 17a

liv. (1,243,292 liv.) Ile du Prince-Edouard 597,271 liv. (613,880 liv.) et Nouveau-Brunswick 565,699 liv. (709,932 liv.) Les chiffres de 1917 constatent une augmentation sur 1916 de 4,962,809 liv. pour l'ensemble du Canada; cette augmentation s'est produite dans les provinces de la Nouvelle-Ecosse, Québec, Ontario, Manitoba, Alberta et Colombie Britannique. Les trois autres provinces présentent une décroissance dans leur production.

Fromage de fabrique.—Production et valeur.

Ainsi qu'on peut le voir dans le tableau 4, la production totale du fromage de fabrique s'est élevée, en 1917, à 194,904,336 livres, ayant une valeur de \$41,180,623, au lieu de 192,968,597 liv. de la valeur de \$35,512,622 en 1916 et 183,887,837 liv. de la valeur de \$27,097,176 en 1915.

4. Production du fromage de fabrique, par quantités et valeur, en 1915, 1916 et 1917.

Les provinces d'Ontario et de Québec, à elles deux, ont produit 97 p.c. du fromage sorti des fromageries canadiennes. La part d'Ontario, en 1917, représente 121,173,086 livres, ayant une valeur de \$25,771,944, au lieu de

126,015,870 liv., valant \$23,312,935 en 1916 et 125,001,136 liv., valant \$18,831,413 en 1915. La production de chaque province pour 1917 est donnée ci-après, les chiffres de 1916 étant placés entre parenthèses: Ontario 121,173,086 liv. (126,015,870 liv.); Québec 67,835,017 liv. (61,906,750 liv.); Ile du Prince-Edouard 2,234,985 liv. (2,121,736 liv.); Alberta 1,274,905 liv. (745,122 liv.); Nouveau-Brunswick 1,244,106 liv. (1,185,664 liv.); Manitoba 1,003,646 liv. (880,728 liv.); Colombie Britannique 71,094 liv. (18,000 liv.); Nouvelle-Ecosse 67,497 liv. (94,727 liv.).

Prix de gros du beurre et du fromage de fabrique.

Le tableau 5 relate, par provinces, la moyenne du prix de vente, en gros, par livre, du beurre et du fromage de fabrique, pour chacune des années 1915, 1916 et 1917.

5. Prix en gros, par livre, du beurre et du fromage de fabrique en 1915, 1916 et 1917.

Pour l'ensemble du Canada, la moyenne du prix de vente en gros du beurre de fabrique (creamery) en 1917 s'établit à 39 cents par livre, au lieu de 33 cents en 1916 et 30 cents en 1915. Dans les provinces, le cours le plus élevé se trouve en Colombie Britannique, avec 46 cents, les autres provinces ayant payé les prix suivants: Nouveau-Brunswick et Nouvelle-Ecosse 41 cents; Ile du Prince-Edouard 40 cents; Québec 40 cents; Ontario 39 cents; Manitoba 37 cents; Saskatchewan et Alberta 38 cents.

La moyenne du prix de vente en gros, du fromage de fabrique, au Canada, en 1917, fut de 21 cents par livre, au lieu de 18 cents en 1916 et 15 cents en

DOC. PARLEMENTAIRE No 17a

1915. C'est en Colombie Britannique qu'il s'est payé le plus cher, en 1917, soit 30 cents la livre; dans toutes les autres provinces, la moyenne des cours ne s'est pas écartée de 20 ou 21 cents la livre.

Statistiques comparatives, 1900-1917.

Le tableau 6 présente une comparaison de la production des beurreries et fromageries du Canada, en quantité et en valeur, pour les années 1900, 1907, 1910 et 1915-17.

6. Production et valeur du beurre et du fromage de fabrique, en 1900, 1907, 1910, 1915, 1916 et 1917.

Année	Établissements	Beurre de fabrique		Fromage de fabrique	
		liv.	\$	liv.	\$
1900	3,576	36,066,739	7,240,972	220,833,269	22,221,430
1907	3,515	45,930,294	10,949,062	264,788,583	23,597,639
1910	3,025	64,098,165	15,645,845	199,904,205	21,587,124
1915	3,513	83,991,453	24,385,052	183,887,837	27,097,176
1916	3,446	82,564,130	26,966,355	192,968,597	35,512,622
1917	3,418	87,526,939	34,274,218	194,904,336	41,180,623

Les chiffres de 1900 et de 1910 sont ceux du recensement décennal; ceux de 1907 sont le résultat du recensement spécial effectué à cette époque par la poste; enfin, ceux de 1915, 1916 et 1917 sont publiés conjointement par le Bureau Fédéral de la Statistique et les gouvernements provinciaux.

Autres données.

Les principaux tableaux incorporés dans ce rapport contiennent un certain nombre d'informations diverses, présentées par provinces, par comtés ou par districts, qui seront profitables à tous ceux qui s'intéressent à l'industrie laitière et qui revêtent un caractère d'importance lorsqu'il s'agit d'envisager en bloc toutes les exploitations industrielles du Dominion.

A ce sujet, il est utile de remarquer que le genre des beurreries et fromageries de la province de Québec diffère sensiblement des fabriques de l'Ontario et des autres provinces. Pour cette raison, certains détails demandés par le questionnaire du recensement ne purent être obtenus de Québec, parce qu'ils ne s'appliquaient pas à l'industrie laitière de cette province. Dans Québec, les beurreries et fromageries sont nombreuses, mais relativement petites, la plupart étant exploitées par un personnel restreint à une, deux ou trois personnes, qui sont généralement des hommes de plus de 16 ans. Ils ne sont employés que durant six mois par année et, à l'époque où s'opère le recensement, le travail de l'année est terminé et le stock est à peu près épuisé. Ces établissements n'ont pas de frais de publicité, ni de livraison du lait et de la crème qu'ils reçoivent. En général, ils brûlent du bois et leurs moteurs n'excèdent pas 5 ou 6 chevaux-vapeur.

CAPITAUX ENGAGÉS.—Les capitaux placés dans l'industrie laitière au Canada, en 1917, s'élevaient à \$19,628,001, se décomposant ainsi: terrain et bâtiments \$8,641,413, machines et outillage \$6,575,504, produits, combustible et approvisionnements en stock \$2,507,363, caisse et comptes courants \$1,903,721. Dans la province d'Ontario, les capitaux ainsi engagés atteignaient \$8,395,483 et dans celle de Québec \$5,585,538. Dans les autres provinces,

placées par ordre d'importance, les chiffres étaient: Manitoba \$1,630,339; Alberta \$1,538,965; Colombie Britannique \$1,067,398; Saskatchewan \$859,975; Nouvelle-Ecosse \$264,912; Ile du Prince-Edouard \$167,159 et Nouveau-Brunswick \$118,232.

EMPLOYÉS ET OUVRIERS.—Le personnel d'exploitation des beurreries, fromageries et autres fabriques de ce genre comprenait 10,391 personnes, soit 1,635 directeurs, gérants ou employés recevant des traitements ou appointements et 8,756 ouvriers et journaliers, y compris 3,037 personnes occupées par ces industries dans la province de Québec, où il n'a pas été possible d'établir de distinction entre les uns et les autres, si ce n'est dans les fabriques de lait condensé. Les appointements et les salaires payés se sont élevés à \$5,447,346, qui se divisent de la manière suivante: appointements \$651,193, salaires \$4,796,153, y compris \$1,045,688 payés dans Québec au personnel de toutes catégories. Par provinces, ces sommes se répartissent ainsi: Ontario \$2,586,706; Québec \$1,044,788; Alberta \$637,503; Manitoba \$529,841; Colombie Britannique \$290,841; Saskatchewan \$225,448; Nouvelle-Ecosse \$52,783; Nouveau-Brunswick \$41,784 et Ile du Prince-Edouard \$36,752.

COMBUSTIBLE ET FORCE MOTRICE.—En 1917, les beurreries et fromageries ont consommé une quantité de combustible estimée à \$834,036 et qui englobe les matières ci-après: charbon \$408,534; bois \$166,676 et autre combustible \$55,907, plus \$202,919 de combustible non spécifié, consommé dans la province de Québec. Le volume du charbon employé atteignait 57,543 tonnes, dont 40,870 tonnes ont été consommées dans la province d'Ontario et 56,197 cordes de bois, dont 46,782 cordes ont été brûlés dans la même province. On ne connaît pas le volume du combustible consommé dans la province de Québec, mais sa valeur était de \$211,536; nous savons aussi que les fabriques de lait condensé de cette province ont consommé pour \$8,617 de charbon. Dans toutes les provinces, Québec excepté, on employait 918 machines à vapeur (dont 724 se trouvaient dans l'Ontario), développant 11,633 chevaux-vapeur, dont 9,372 seulement étaient en usage. Québec utilisait une force de 17,967 chevaux-vapeur. Dans toutes les provinces, Québec excepté, on se servait aussi de 1,061 moteurs, turbines, etc., actionnés par une force motrice autre que la vapeur, susceptibles de produire 11,746 chevaux-vapeur mais dont 10,388 chevaux-vapeur étaient effectivement utilisés. Dans la province d'Ontario, ces unités étaient au nombre de 691, d'une force maximum de 7,817 chevaux-vapeur, mais donnant en fait 6,757 chevaux-vapeur. Dans Québec, la force motrice autre que la vapeur ne dépassait pas 894 chevaux-vapeur.

GÉNÉRALITÉS.—Les sommes payées aux fournisseurs de lait et de crème égalent \$73,863,845 et les dépenses totales atteignent le chiffre de \$86,488,260. Dans cette somme, les salaires et appointements figurent pour \$5,447,346, le combustible pour \$834,036, les matières premières (autres que lait et crème) pour \$3,844,699 et les frais généraux pour \$2,498,334. Outre le beurre et le fromage, les autres produits vendus avaient une valeur de \$18,424,485, qui s'ajoute à celle du beurre, soit \$34,274,218, et à celle du fromage, soit \$41,180,623, et forme un grand total de \$93,879,326, représentant la valeur des produits de notre industrie laitière en 1917.
