XIV. Total Exports of Canadian Butter and Cheese, by Quantities and Values, 1901-1920.....	102

## PREFACE

Annual statistics of dairy factories of Canada are issued by the Dominion Bureau of Statistics in collaboration with the Provincial Departments of Agriculture. The arrangements for co-operation embrace all the provinces, but the procedure varies in respect to the collection of returns. For all the provinces, except Quebec, a uniform schedule is printed by the Dominion Bureau; for the Maritime and Prairie Provinces and for British Columbia the schedules are distributed and the returns collected and revised by the provincial dairy commissioners, the returns being then forwarded to the Bureau for compilation, and the resulting statistics used as desired by both the Dominion and Provincial Departments. In the case of Ontario, the schedules are distributed and the returns collected and compiled by the Dominion Bureau, the Provincial Department of Agriculture furnishing the lists of dairy factories and its officers rendering assistance in securing dilatory returns. The Quebec Bureau of Statistics collects through the provincial dairy inspectors information identical in character with that obtained for the other provinces, and forwards to the Dominion Bureau the results of the compilation of the returns; the original reports of the inspectors are also placed at the disposal of the Dominion Bureau.

These arrangements ensure uniformity of the dairy statistics issued by the Dominion and Provincial Governments, and avoid the necessity for duplicate inquiries to factory operators.

The Dairy and Cold Storage Branch of the Dominion Department of Agriculture also co-operates, its officers furnishing expert advice in technical details.

R. H. COATS,  
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,  
OTTAWA, November 22, 1920.

## NOTE ON THE DAIRY INDUSTRY OF CANADA

*Dairying is one of the oldest and has now become one of the most important of the industries of Canada. It owes its modern development and expansion to the introduction of the factory system for the making of cheese and butter, to the invention of the centrifugal cream separator and to the facilities afforded by improved methods of cold storage. The first Canadian cheese factory was established in Ontario, in 1864, and the first Canadian creamery for butter-making, in Quebec, in 1873. The first centrifugal cream separator was imported from Denmark in 1882, and the Government organization of cold storage services dates from 1895. In 1868 the quantity of cheese exported from Canada was 6,141,570 pounds and of butter 10,649,733 pounds. Cheese in 1904 reached its maximum exportation with 233,980,716 pounds and butter in 1903 with 34,128,944 pounds. The latest figures, viz., for the twelve months ended March 31, 1920, show an export of 126,395,777 pounds of cheese and 17,612,605 pounds of butter. The decline in the exports of cheese and butter does not represent any falling-off in the volume of total dairy production, but is due to the greater requirements of home consumption caused by the relative increase of urban population since the beginning of the present century. This has had the effect, to a considerable extent, of increasing the demand for milk consumed whole and of replacing the manufacture of cheese for export by that of butter sold for home consumption. The demands created by the war, and the consequent high prices, stimulated the manufacture of both cheese and butter and led to a revival of the export trade in the latter article.*

*The statistics in this report relate solely to the production of dairy factories; they do not include butter made on the farm and known as "dairy butter" and home-made cheese. The census of 1911 shows that the production of dairy butter in 1910 was 137,110,200 pounds and of home-made cheese 1,371,092 pounds, these quantities representing respectively 68 and 0.7 per cent of the totals. It is not possible to state precisely what the present proportions are, but the increased production of creamery butter would appear to indicate a decrease in the home-made article. Complete statistics of the production of dairy factories date from 1900, when the total value of products of dairy factories was \$29,731,922. In 1919 the value of the products of dairy factories was \$135,196,602, representing an increase of \$105,464,680 during the first twenty years of the present century. The total value of all the dairy products of Canada in 1919 is estimated by the dairy commissioner of the Department of Agriculture at \$251,526,201, which includes \$135,196,602, the value of products of the dairy factories; \$56,250,000, the estimated value of "dairy butter"; and \$60,079,599, the estimated value of milk used whole, as apart from that delivered to the dairy factories.*

*Finally, within recent years, there has been a large increase in the production of condensed milk, which has caused a decrease in the production of cheese, arising from the fact that the farmers have found it more profitable to send their milk to the condenseries than to the cheese factories. The first milk-condensing plant was established at Truro, N.S., in 1883, and there are now in Canada twenty four plants for the manufacture of condensed, evaporated and sterilized milk and milk powder. The total value of these products has grown from \$269,520 in 1900 to \$13,930,513 in 1919.*

## DAIRY FACTORIES OF CANADA, 1919

## Introduction

The Statistical Report of the Dairy Factory Industry of Canada for the year 1919 gives in the main tables the statistics by provinces, and counties or districts, according to the following five groups: A. Creameries; B. Cheese Factories; C. Combined Butter and Cheese Factories; D. Condensed Milk Factories; and E. All Factories.

The compilations include all dairy factories in operation in Canada during the year 1919. From each factory was received a return showing capital invested; number of patrons; quantity of milk and cream delivered at factory; amounts paid to patrons; quantity and value of butter, cheese and other products; time in operation; employees, salaries, wages and hours; fuel used; power employed; and miscellaneous expenditures.

## Establishments, Patrons and Number of Cows

The number of dairy factories operating in 1919 was 3,282, comprising 1,018 creameries, 1,787 cheese factories, 453 combined butter and cheese factories and 24 condensed milk factories. The number of creameries increased by 28, and the number of condenseries by two over the previous year, while cheese factories showed a decrease of 98, and combined factories a decrease of 23. The number of patrons (farmers who supply milk and cream to dairy factories) was 275,060 in 1919, compared with 252,416 in 1918. The numbers of patrons of creameries and condenseries have increased, and the numbers of patrons of cheese and combined factories have decreased.

The number of cows furnishing the milk supplied to the factories was 1,648,442 in 1919, an increase of more than a hundred thousand over the previous year.

The following table shows by provinces the number of factories, the number of patrons and the number of cows for 1919 and the two preceding years.

Deliveries of Milk and Cream

The quantity of milk delivered to the factories was 2,821,149,557 pounds and of cream (expressed in pounds of butter fat) 71,351,336 pounds, compared with 2,772,676,533 pounds of milk and 61,959,088 pounds butter fat content of cream in 1918. There were large increases in deliveries of milk to creameries and condenseries and decreases to cheese and combined factories. Increased quantities of cream were delivered to creameries and combined factories, and decreased quantities to condenseries. Table 2 shows the quantities of milk and cream delivered to the factories, by provinces.

## Amounts paid to Patrons

The total amounts paid to patrons were \$107,412,542 in 1919 and \$83,637,391 in 1918, an increase of nearly \$24,000,000. Increases are shown under every classification. For creameries the increase was \$13,890,471. Cheese and combined factories, which show decreases in quantities of milk and cream delivered, show substantial increases in amounts paid to patrons, the amounts for the former increasing by over \$5,000,000 and for the latter by \$2,500,000. The only province which showed a decrease in total amount paid to patrons was British Columbia and this decrease was slight, being only \$8,000. The amounts paid in the several provinces are given in the following table:

Production and Value of Creamery Butter and Factory Cheese

*Butter.*—The production of creamery butter in 1919 was 103,890,707 pounds valued at \$56,371,985, compared with 93,298,348 pounds valued at \$41,859,156, in the preceding year. The average price of butter for the whole of Canada was 54 cents in 1919, compared with 45 cents in 1918. Butter in British Columbia sold at an average of 61 cents per pound. Prices in the other provinces ranged from 51½ cents in Alberta to 56 cents in Nova Scotia. Manitoba showed a slight decrease in quantity made. The other provinces all showed increased production.

*Cheese.*—The quantity of cheese produced in 1919 was 166,421,871 pounds, a decrease from the preceding year of 8,000,000 pounds. The average price per pound, however, increased from 22½ cents in 1918 to 26½ cents in 1919, so that the total value in 1919 was greater than in 1918 by \$5,000,000 (\$44,586,168 in 1919 and \$39,456,532 in 1918). Nearly all the factory cheese is produced in Ontario and Quebec, the quantities in the other provinces being relatively small.

Tables 4, 5 and 6, show by provinces the quantity, value and average price per lb. of creamery butter and factory cheese in the years 1917, 1918 and 1919.

### Miscellaneous Dairy Factory Products

The production of condensed milk in 1919 was 62,216,383 pounds, valued at \$9,456,016; of evaporated milk, 16,107,934 pounds, valued at \$1,789,089; and of milk powder, 6,788,770 pounds, valued at \$1,617,046. The value of the cream and whole milk sold by dairy factories was \$15,488,752. The largest proportion of the milk and cream sold is contributed by city dairies, which are classified as dairy factories when producing butter or cheese. The following table shows the quantities and values of products other than butter and cheese in the years 1917, 1918 and 1919.

8. Miscellaneous Products of Dairy Factories, in 1917, 1918 and 1919

<sup>1</sup> Comprises curd cheese, skim milk, whey and whey cream.

### Character of Organization of Dairy Factories

Of the total number of dairy factories, 344 were operated by co-operative associations, 560 by incorporated companies, and 2,378 by individuals and partnerships. Statistics by provinces are given in table X. p. 97.

**Time in Operation**

The dairy factory returns are grouped in table IX. p. 96, according to number of days in operation. The first group, which operated less than sixty days, includes 11 factories; the second, from 60 to 119 days, 115 factories; the third, from 120 to 179 days, 1,191 factories; the fourth, 180 to 239 days, 1,202 factories; and the fifth, 240 days and over, 763 factories. Comprised in the last group were 446 creameries, 112 cheese factories, and 23 condenseries.

**Capital Invested**

The total capital invested was \$28,388,026. Comprised under this head were: land and buildings, valued at \$10,535,122; machinery and tools, \$9,282,799; products on hand, \$2,105,635; fuel and supplies on hand, \$1,665,872; and cash and operating accounts, \$4,798,598. The total amount invested in creameries was \$12,954,878; in cheese factories, \$5,121,569; in combined butter and cheese factories, \$3,882,766; and in condenseries, \$6,428,813. The following table shows by provinces the number of establishments and the total capital invested in dairy factories in the years 1917, 1918 and 1919.

9. Capital Invested in Dairy Factories, 1917, 1918 and 1919

**Employees and Wages**

For all provinces excepting Quebec, persons employed in dairy factories are classified as "employees on salaries" and "employees on wages". Under the first heading are given superintendents and managers (including head butter or cheese makers), clerks, stenographers, etc., and under the second heading, assistant butter and cheese makers and other factory helpers. For Quebec no distinction is made between salaried workers and wage-earners, and the statistics for that province are shown in the main tables in the columns headed "Total of employees and of salaries and wages." In 1919 the total number of employees was 10,716, comprising 3,567 on salaries, 4,264 on wages, and 2,885 unclassified for Quebec. The total amount paid to all employees was \$7,629,997, comprising \$2,839,272 in salaries, \$3,386,051 in wages, and \$1,404,674 for Quebec. An increase of 561 over the preceding year is recorded in the number of employees, and an increase of \$1,408,540 in salaries and wages paid. Table 10 shows, by provinces, the numbers of establishments and employees and the amounts paid in salaries and wages in 1919 and the two preceding years.

## Fuel Used and Power Employed

*Fuel.*—The total value of all fuel used in dairy factories in 1919 was \$1,200,406. The principal items were coal, 89,068 tons, valued at \$640,193, and wood, 133,280 cords, valued at \$503,534. Gas and gasoline were used to the values of \$19,832 and \$18,787, respectively.

*Power.*—Nearly all the motive power used in dairy factories in 1919 was furnished by electricity (6,659 horse-power) and steam, (5,735 horse-power), Table V of the main tables gives, by counties and districts, the power employed according to the classifications of "steam" "electric" and "other". Table VII gives, by provinces, details of the various kinds of motive power. It should be noted that for all provinces except Quebec, the number of engines and motors, the horse-power according to manufacturers' rating, and the horse power used, are given, while for Quebec the latter item only is available.

## Total Expenditure and Total Value of Products

The expenditure for the operation of the factories in 1919 was \$128,556,744, including salaries and wages, \$7,629,997; amounts paid to patrons, \$107,412,542; fuel, \$1,200,406; supplies and containers, \$6,517,180; and miscellaneous items, \$5,796,619. The total value of products was \$135,196,602, comprising butter, \$56,371,985; cheese, \$44,586,168; condensed products, \$13,930,513; whole milk and cream, \$15,488,752; and sundry, \$4,819,184. For 1918 the expenses totalled \$101,364,912, and the products were valued at \$107,340,850.

## Exports and Imports of Canadian Dairy Products

The quantity of butter exported during the fiscal year ended March 31, 1920, was 17,612,605 pounds, valued at \$9,844,359; of cheese, 126,395,777 pounds, valued at \$36,336,863; of milk and cream, condensed, canned or preserved, 54,247,498 pounds, valued at \$8,517,771; of fresh milk, 1,985,113 gallons, valued at \$576,666; and of fresh cream, 795,780, gallons valued at \$1,122,424, a total value of exports of dairy products of \$56,398,083. The imports of butter and cheese during the same period were small, being 397,955 pounds of butter, valued at \$176,994, and 362,693 pounds of cheese, valued at \$206,500.

<sup>1</sup> In Quebec no distinction is made between salaried employees and wage-earners. The totals for Quebec in this table are given in the column headed "Employees on wages." <sup>1</sup> Dans Québec, il n'est pas fait de distinction entre les genres d'emploi. La totalité du personnel dans cette province figure dans la colonne "Ouvriers et journaliers".

<sup>1</sup> In Quebec no distinction is made between salaried employees and wage-earners. The totals for Quebec in this table are given in the column headed "Employees on wages." <sup>1</sup>Dans Québec, il n'est pas fait de distinction entre les genres d'emploi. La totalité du personnel employé dans cette province figure dans la colonne "Ouvriers et journaliers."

<sup>1</sup> The number of units and total horse power are exclusive of Quebec—for Quebec only horse power actually used is shown.  
<sup>1</sup> On ne possède pas d'indications sur le nombre d'unités ni sur leur capacité pour la province de Québec: on ne donne, pour cette province que le nombre de chevaux vapeur effectivement utilisés.

<sup>1</sup> The number of units and total horse power are exclusive of Quebec—for Quebec only horse power actually used is shown.  
<sup>2</sup> On ne possède pas d'indications sur le nombre d'unités ni sur leur capacité, pour la province de Québec; on ne donne, pour cette province, que le nombre de chevaux-vapeur effectivement utilisés.

<sup>1</sup>The number of units and total horse power are exclusive of Quebec—For Quebec only horse-power actually used is shown.

<sup>2</sup>On ne possède pas d'indications sur le nombre d'unités ni sur leur capacité, pour la province de Québec; on ne donne pour cette province que le nombre de chevaux-vapeur effectivement utilisés.

<sup>1</sup>The number of units and total horse power are exclusive of Quebec—For Quebec only horse-power actually used is shown.

<sup>2</sup>On ne possède pas d'indications sur le nombre d'unités ni sur leur capacité, pour la province de Québec; on ne donne pour cette province que le nombre de chevaux-vapeur effectivement utilisés.

<sup>1</sup>Nine months.<sup>1</sup>Neuf mois.

<sup>2</sup>The apparent large decrease in the exports of cheese for 1920 is due to the fact that over 16,000,000 pounds of cheese were held in Montreal for account of the British Ministry of Food on March 31 of that year. On the same date of previous years all the surplus had been exported. There will be a corresponding increase in the exports for the fiscal year ending March 31, 1921.

<sup>2</sup>Apparemment, les exportations de fromage en 1920 semblent présenter une diminution considérable; ceci est dû à ce que plus de 16,000,000 livres de fromage étaient détenues à Montréal le 31 mars de cette année pour le compte du Contrôle des Vivres du gouvernement britannique, tandis qu'à la même date des années précédentes, tout le surplus avait été exporté. Cette quantité de fromage accroîtra d'autant les exportations de l'exercice budgétaire se terminant le 31 mars 1921.

## PRÉFACE

Les statistiques de l'industrie laitière pour l'année 1919 sont publiées par le Bureau Fédéral de la Statistique en collaboration avec les ministères provinciaux de l'Agriculture. Les mêmes moyens de coopération embrassent toutes les provinces, seul le mode de recueillir les données diffère. Pour toutes les provinces, sauf Québec, une formule uniforme est rédigée et imprimée par les soins du Bureau Fédéral; dans les provinces maritimes, les provinces des prairies, la Colombie Britannique, les formules sont distribuées et les rapports recueillis et révisés par les administrations provinciales, qui les transmettent ensuite au Bureau pour être compilés; les statistiques ainsi obtenues servent également aux ministères fédéral et provinciaux. Le Bureau des Statistiques de Québec obtient des renseignements identiques par l'intermédiaire des inspecteurs de la Division laitière provinciale; il fait lui-même la compilation des informations recueillies dans sa province et en transmet le résultat au Bureau Fédéral. Les originaux des rapports des inspecteurs sont également communiqués à ce Bureau.

Cette manière de procéder assure l'uniformité des statistiques de l'industrie laitière publiées par les gouvernements fédéral et provinciaux et évite aux fabricants l'ennui d'un double rapport.

Les techniciens de la Division de l'Industrie Laitière et de la Réfrigération coopèrent également à ces opérations, en nous aidant de leurs conseils.

R. H. COATS,

Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,  
OTTAWA, 22 novembre 1920.

## NOTES SUR L'INDUSTRIE LAITIÈRE AU CANADA.

*L'industrie laitière est l'une des plus anciennes du Canada; elle est maintenant devenue l'une des plus importantes. Elle doit son expansion et ses progrès à la création de manufactures pour la fabrication du beurre et du fromage, à l'invention de l'écrémeuse centrifuge et enfin aux récentes découvertes qui ont perfectionné la réfrigération dans les entrepôts.*

*La première fromagerie canadienne fut établie dans Ontario en 1864 et la première beurrerie canadienne vit le jour dans Québec en 1873. La première écrémeuse centrifuge fut importée du Danemark en 1882 et l'organisation gouvernementale des entrepôts frigorifiques remonte à l'année 1895. En 1868, le Canada exportait 6,141,570 livres de fromage et 10,649,733 livres de beurre. L'exportation du fromage atteignit son apogée en 1904, avec 233,980,716 livres et celle du beurre fut portée à son maximum en 1903 avec 34,128,944 livres. Les chiffres les plus récents, c'est-à-dire ceux des douze mois terminés le 31 mars 1920, révèlent l'exportation de 126,395,777 livres de fromage et 17,612,605 livres de beurre. La décroissance des exportations de beurre et de fromage n'implique pas la diminution de la production des produits laitiers, elle est plutôt la conséquence de l'augmentation de la consommation domestique, amenée par la croissance de la population urbaine depuis le commencement de ce siècle. C'est cet accroissement de population qui a augmenté considérablement la consommation du lait frais et qui a fait monter la fabrication du beurre pour la consommation au pays, au détriment du fromage destiné à l'exportation. Les besoins créés par la guerre et l'élévation des prix qui en fut la conséquence stimulèrent la fabrication du beurre et du fromage et firent hausser les exportations du beurre.*

*Les données statistiques de ce rapport embrassent uniquement la production des établissements industriels, mais ils ne comprennent ni le fromage ni le beurre faits dans les fermes, le beurre ainsi fabriqué portant le nom de beurre de ménage ou "dairy". Il résulte du recensement de 1911, qu'en l'année 1910 il avait été fabriqué dans les fermes 137,110,200 livres de beurre de ménage et 1,371,092 livres de fromage, ces quantités représentant respectivement 68 et 0.7 pour cent des totaux. Il n'est pas possible d'indiquer exactement l'importance actuelle de cette fabrication, mais l'augmentation croissante de la fabrication du beurre de beurrerie (creamery) semble indiquer une diminution de la fabrication du beurre de ménage. Les statistiques complètes de la fabrication des beurreries et des fromageries remontent à l'année 1900, date à laquelle la valeur totale des produits des établissements de l'industrie laitière s'élevait à \$29,731,922; en 1919, cette même valeur atteignait \$135,196,602, soit une augmentation de \$105,464,680 au cours des 20 premières années de ce siècle. Le Commissaire de la Laiterie du ministère Fédéral de l'Agriculture évalue l'ensemble des produits laitiers du Canada, en l'année 1919, à \$251,526,201, soit \$135,196,602 pour les produits des établissements industriels, \$56,250,000 pour le beurre de ménage et \$60,079,599 pour le lait consommé frais, et distingué de celui livré aux fabriques.*

*On remarque aussi que, dans les dernières années, il s'est produit une augmentation considérable de la production du lait condensé, ce qui a fait fléchir la production du fromage. Les cultivateurs ayant trouvé plus avantageux d'envoyer leur lait aux fabriques de lait condensé plutôt qu'aux fromageries. La première fabrique de lait condensé fut établie à Truro, Nouvelle-Ecosse, en 1883; il existe maintenant au Canada 24 établissements industriels consacrés à la préparation du lait condensé, du lait évaporé, du lait stérilisé et du lait en poudre. La valeur totale des produits de ces établissements est passée de \$269,520 en 1900 à \$13,930,513 en 1919.*

## Introduction

Les tableaux statistiques que contient ce rapport donnent, par provinces, comtés ou districts, les résultats de la compilation des données relatives aux fabriques groupées dans les cinq catégories suivantes: (a) beurreries, (b) fromageries, (c) fabriques de beurre et de fromage, (d) fabriques de lait condensé et (e) toutes fabriques.

Ces informations comprennent tous les établissements en activité au Canada durant l'année 1919. Il a été reçu de chaque fabrique un rapport détaillé indiquant le capital engagé, le nombre des fournisseurs, la quantité de lait et de crème livrée aux fabriques; les sommes payées aux fournisseurs; la quantité et la valeur du beurre, du fromage et autres produits laitiers; enfin la durée des opérations, le personnel et ses gains, les heures de travail; le combustible consommé; la force motrice utilisée et les frais généraux.

## Etablissements, fournisseurs et nombre de vaches

En 1919, l'industrie laitière possédait 3,282 établissements en exploitation, soit 1,018 beurreries, 1,787 fromageries, 453 fromageries et beurreries combinées et 24 fabriques de lait condensé. On remarque une augmentation de 28 beurreries et de deux fabriques de lait condensé sur l'année précédente, tandis que les fromageries et les fabriques combinées ont baissé de 98 et 23 respectivement. Le nombre des fournisseurs, c'est-à-dire des fermiers qui alimentaient de lait et de crème ces établissements, s'élevait à 275,060 en 1919, contre 252,416 en 1918. En raison de leur accroissement, les beurreries et les fabriques de lait condensé ont attiré un plus grand nombre de fournisseurs que les fromageries et les fabriques combinées, qui étaient à la baisse cette année-là.

En 1919, les établissements de l'industrie laitière ont été alimentés par le lait de 1,648,442 vaches, soit une augmentation de plus de cent mille sur l'année 1918.

Le tableau suivant indique, par provinces, le nombre d'établissements de l'industrie laitière, de leur fournisseurs et des vaches qui les alimentent en 1917, 1918 et 1919.

## 1. Nombre d'établissements de l'industrie laitière, de leurs fournisseurs et des vaches qui les alimentent, en 1917, 1918 et 1919

Livraisons de lait et de crème

Toutes les fabriques réunies ont absorbé 2,821,149,557 livres de lait et 71,351,336 livres de crème, exprimées en livres de butyrine, contre 2,772,676,533 livres de lait et 61,959,088 livres de butyrine en 1918. On constate une augmentation considérable de la quantité de lait livrée aux beurrieres et aux fabriques de lait condensé, et une diminution en ce qui concerne les fromageries et les beurrieres et fromageries combinées.

Quant aux livraisons de crème, elles ont été plus élevées dans les beurrieres et les beurrieres et fromageries combinées qu'en 1918, tandis qu'elles étaient en décroissance dans les fabriques de lait condensé.

Ces chiffres sont détaillés, par provinces, dans le tableau suivant:

## Sommes payées aux fournisseurs

Les fournisseurs de lait et de crème qui avaient reçu, en 1918, en paiement de leurs produits, la somme de \$83,637,391, ont reçu en 1919, \$107,412,542, soit près de \$24,000,000 de plus que l'année précédente.

On constate des augmentations dans toutes les catégories. Les beurrieres ont vu leurs paiements à leurs fournisseurs s'augmenter de \$13,890,471 en 1919. Les fromageries et les fabriques combinées ont dû également déboursier une somme de \$5,000,000 de plus que l'année précédente pour la crème reçue et \$2,500,000 pour le lait.

La seule province qui indique une baisse dans la somme payée aux fournisseurs est la Colombie Britannique, et cette diminution est bien légère puisqu'elle ne s'élève qu'à \$8,000.

DOC. PARLEMENTAIRE No 17e

Le tableau qui suit donne, par provinces, les sommes payées aux fournisseurs.

## Production et valeur du beurre et du fromage

*Beurre.*—En 1919, il a été produit 103,890,707 livres de beurre de fabrique (creamery) valant \$56,371,985, au lieu de 93,298,348 livres, valant \$41,859,156 en 1918. Pour l'ensemble du Canada, la moyenne du prix du beurre a été de 54 cents en 1919 contre 45 cents en 1918. En Colombie Britannique, la moyenne du prix par livre était de 61 cents. Le prix dans les autres provinces varie de 51½ cents en Alberta à 56 cents dans la Nouvelle-Ecosse. Une légère décroissance de la production se manifeste au Manitoba seulement; dans toutes les autres provinces, la production s'est accrue.

*Fromage.*—La production totale du fromage de fabrique s'est élevée, en 1919, à 166,421,871 livres, c'est-à-dire une diminution de 8,000,000 de livres sur 1918. Toutefois, la moyenne du prix par livre qui était de 22½ cents en 1918 a atteint 26½ cents en 1919, si bien que la valeur totale représentait une augmentation de \$5,000,000. (\$44,586,168 en 1919 et \$39,456,532 en 1918.)

Les provinces d'Ontario et de Québec fabriquent presque tout le fromage mis sur le marché; la production dans les autres provinces est relativement insignifiante.

Les tableaux 4, 5 et 6 indiquent, par provinces, la production, la valeur et la moyenne du prix par livre, du beurre et du fromage de fabrique pour les années 1917, 1918 et 1919.

## Divers produits de l'industrie laitière, autres que le beurre et le fromage

En 1919, la production du lait condensé s'est élevée à 62,216,383 livres, valant \$9,456,016; celle du lait évaporé à 16,107,934 livres, valant \$1,789,089; et celle du lait en poudre à 6,788,770 livres, évaluées à \$1,617,046.

La valeur de la crème et du lait frais vendus à ces diverses fabriques était de \$15,488,752. La plus grande partie de ce lait et de cette crème est fournie par les laiteries urbaines, lesquelles sont classifiées comme industries laitières quand elles fabriquent soit du beurre, soit du fromage. Le tableau qui suit indique les quantités et la valeur des produits laitiers, autres que le beurre et le fromage, pour les années 1917, 1918 et 1919.

DOC. PARLEMENTAIRE No 17e

## Forme de l'organisation commerciale de l'industrie laitière

Du nombre total des établissements de l'industrie laitière 344 sont exploités par des sociétés coopératives, 560 par des compagnies incorporées et 2,378 appartiennent à des particuliers ou à des sociétés en nom collectif.

On trouvera dans le tableau X, page 97, les statistiques relatives à chacune des provinces.

## Durée des opérations

Au point de vue de la durée de leurs opérations, les établissements de l'industrie laitière ont été classifiés dans le tableau IX, page 96, en cinq catégories. Le premier groupe comprend 11 fabriques qui ont fonctionné moins de 60 jours; le second, 115, entre 60 et 119 jours; le troisième, 1,191 fabriques, entre 120 et 179 jours; le quatrième, 1,202 fabriques, entre 180 et 239 jours; enfin dans le cinquième groupe entrent 763 fabriques qui ont travaillé 240 jours et plus. Ce dernier groupe comprend 446 beurreries, 112 fromageries et 23 fabriques de lait condensé.

## Capital engagé

Les capitaux engagés dans l'industrie laitière au Canada, en 1919, s'élevaient à \$28,388,026. Ce total se décompose ainsi: terrains et bâtiments, \$10,535,122; machineries et outillage, \$9,282,799; produits en stock, \$2,105,635; combustibles et autres approvisionnements, \$1,665,872; caisse et comptes courants, \$4,798,598.

Le capital engagé dans les beurreries était de \$12,954,878; dans les fromageries, \$5,121,569; dans les fabriques combinées, \$3,882,766 et dans les fabriques de lait condensé, \$6,428,813.

11 GEORGE V, A. 1921

Le tableau suivant indique, par provinces, le nombre d'établissements et le capital engagé dans l'industrie laitière pour les années 1917, 1918 et 1919.

## 9. Capitaux absorbés par l'industrie laitière en 1917, 1918 et 1919

## Personnel et salaires

Pour toutes les provinces, Québec excepté, le personnel employé dans l'industrie laitière est ainsi classifié: "employés recevant des appointements" et "ouvriers et journaliers". Dans la première catégorie entrent les directeurs, gérants (y compris les chefs de la fabrication du beurre et du fromage), commis, sténographes, etc.; dans la seconde, les ouvriers et les journaliers. La province de Québec ne fait aucune distinction du genre d'emploi dans son rapport, et le personnel de cette industrie ne figure que dans les totaux du personnel, des appointements et des salaires.

Le nombre total des employés était de 10,716 en 1919, comprenant 3,567 personnes recevant des traitements ou appointements, 4,264 salariés et 2,885 personnes non classifiées dans Québec. La somme totale payée à ces employés s'élevait à \$7,629,997, savoir: \$2,839,272 en appointements, \$3,386,051 en salaires, et \$1,404,674 pour Québec, soit une augmentation sur l'année précédente de 561 dans le nombre du personnel et de \$1,408,540 dans sa rémunération.

Le tableau 10 qui suit indique, par provinces, le nombre d'établissements, le personnel et les sommes payées en appointements et salaires en 1919, comparés aux deux années précédentes.

DOC. PARLEMENTAIRE No 17e

### Combustible consommé et force motrice

*Combustible.* En 1919, les beurrieres et les fromageries ont consommé une quantité de combustible estimée à \$1,200,406. Le charbon occupe le premier rang avec 89,068 tonnes, valant \$640,193, suivi par 133,280 cordes de bois, valant \$503,534. Viennent ensuite: le gaz, \$19,832 et la gazoline, \$18,787.

*Force motrice utilisée.* Dans toutes les fabriques, en 1919, la force motrice développée par l'électricité représentait 6,659 chevaux-vapeur et celle fournie par les machines à vapeur 5,735 chevaux-vapeur, ces deux sources constituant la presque totalité de la force motrice.

Le tableau V indique, par comtés et districts, la force motrice employée sous les classifications suivantes: "vapeur", "électricité" et "autre". Dans toutes les provinces, excepté Québec, le nombre des machines, des moteurs, des chevaux-vapeur potentiels et utilisés sont donnés sous les différentes classifications; les chiffres de Québec figurent dans l'énumération des chevaux-vapeur seulement. Le tableau VII présente le détail de ces forces motrices, par provinces.

### Dépenses d'exploitation et valeur totale des produits

Les dépenses d'exploitation des établissements de l'industrie laitière, en 1919, ont atteint \$128,556, 744, se décomposant ainsi: appointements et salaires, \$7,629,997; sommes payées aux fournisseurs, \$107,412,542; combustible, \$1,200,406; récipients et approvisionnements, \$6,517,180; et dépenses diverses, \$5,796,619. La valeur totale des produits a été de \$135,196,602, ainsi divisée: beurre, \$56,371,985; fromage, \$44,586,168; produits condensés, \$13,930,513; crème et lait frais, \$15,488,752; autres produits, \$4,819,184.

En 1918, les dépenses totales représentaient une somme de \$101,364,912 et la valeur des produits atteignait \$107,340,850.

### Exportations et importations des produits laitiers canadiens

Durant l'année fiscale terminée le 31 mars 1920, il a été exporté 17,612,605 livres de beurre, valant \$9,844,359; 126,395,777 livres de fromage, valant \$36,336,863; 54,247,498 livres de lait et de crème condensés, en boîte ou en conserve, d'une valeur de \$8,517,771; 1,985,113 gallons de lait frais, valant \$576,666; enfin 795,780 gallons de crème fraîche, pour une somme de \$1,122,424. La valeur totale des exportations de ces produits s'élève donc à \$56,398,083.

Les importations de beurre et de fromage durant la même période sont peu élevées, elles s'énumèrent ainsi: 397,955 livres de beurre, valant \$176,994 et 362,693 livres de fromage, d'une valeur de \$206,500.
