PREFACE

Annual statistics of dairy factories of Canada are issued by the Dominion Bureau of Statistics in collaboration with the Provincial Departments of Agriculture. The arrangements for co-operation embrace all the provinces, but the procedure varies in respect to the collection of returns. For all the provinces, except Quebec, a uniform schedule is printed by the Dominion Bureau; for the Maritime and Prairie Provinces and for British Columbia the schedules are distributed and the returns collected and revised by the provincial dairy commissioners, the returns being then forwarded to the Bureau for compilation, and the resulting statistics used as desired by both the Dominion and Provincial Departments. In the case of Ontario, the schedules are distributed and the returns collected and compiled by the Dominion Bureau, the Provincial Department of Agriculture furnishing the lists of dairy factories and its officers rendering assistance in securing dilatory returns. The Quebec Bureau of Statistics collects through the provincial dairy inspectors information similar in character to that obtained for the other provinces, and forwards to the Dominion Bureau the results of the compilation of the returns; the original reports of the inspectors are also placed at the disposal of the Dominion Bureau.

These arrangements ensure uniformity of the dairy statistics issued by the Dominion and Provincial Governments, and avoid the necessity for duplicate inquiries to factory operators.

The Dairy and Cold Storage Branch of the Dominion Department of Agriculture also co-operates, its officers furnishing advice in technical details.

R. H. COATS,
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,
OTTAWA, December 5, 1927.

NOTE ON THE HISTORY AND DEVELOPMENT OF THE DAIRYING INDUSTRY OF CANADA

Dairying is one of the oldest and one of the most important of the industries of Canada. It owes its modern development and expansion to the introduction of the factory system for the making of cheese and butter, to the invention of the centrifugal cream separator and to the facilities afforded by improved methods of cold storage. The first Canadian cheese factory was established in Ontario in 1864, and the first Canadian creamery for butter-making, in Quebec, in 1873. The first centrifugal cream separator was imported from Denmark in 1882, and the Government organization of cold storage services dates from 1895. In 1868, the quantity of cheese exported from Canada was 6,141,570 pounds and of butter 10,649,733 pounds. Cheese in 1904 reached its maximum exportation with 233,980,716 pounds and butter in 1903 with 34,128,944 pounds. The latest figures, viz., for the twelve months ended December 31, 1926, show an export of 134,656,600 pounds of cheese and 9,814,000 pounds of butter. The decline in the exports of cheese and butter does not represent any falling-off in the volume of total dairy production, but is due to the greater requirements of home consumption caused by the relative increase of urban population since the beginning of the present century. This has had the effect, to a considerable extent, of increasing the demand for milk consumed whole and of replacing the manufacture of cheese for export by that of butter sold for home consumption.

The statistics in this report relate solely to the production of dairy factories; they do not include butter made on the farm and known as "dairy butter" and home-made cheese. The Census of 1921 showed that the production of dairy butter in 1920 was 103,487,506 pounds, and of home-made cheese, 533,561 pounds, these quantities representing respectively 48 and 0.3 per cent of the totals.

Complete statistics of the production of dairy factories date from 1900 when, the total value of the products was \$29,781,922. In 1926 the value of the products of dairy factories was \$137,379,998, representing an increase of \$107,648,076 or 362 per cent during twenty-six years.

Finally, within recent years there has been a large increase in the production of condensed milk. The first milk condensing plant was established at Truro, N.S., in 1883, and there are now in Canada twenty-six plants for the manufacture of condensed and evaporated milk and milk powder. The value of these products in 1900 was \$269,520, and in 1926 the value was \$9,844,613. Greatly increased production was shown in the years immediately following the war, and in 1920 the value of output reached a total of \$17,160,111.

The value of all dairy products in Canada in 1926 is estimated at \$249,710,067, distributed as follows: creamery butter 177,209,287 lb., value \$61,753,390; dairy butter (estimated) 95,000,000 lb., value \$28,252,777; factory cheese, 171,731,631 lb., value \$28,807,841; home-made cheese (estimated) 516,745 lb., value \$80,240; miscellaneous factory products \$17,767,271 and milk consumed fresh or otherwise used (estimated) 4,851,667,017 gallons, value \$113,048,548.¹

The per capita consumption of butter in Canada in 1926 has been estimated at 28.48 lb., and the consumption of cheese at 4.04 lb.²

¹ Monthly Bulletin of Agricultural Statistics, December, 1927.

² Live Stock and Animal Products Statistics, 1926.

Reference may here be made to the output of a special form of prepared cheese, termed "Process Cheese". It is made from ordinary Cheddar cheese, and the process is stated to consist essentially of grinding the cheese, heating it in a jacketed container with agitation and filling it into the proper containers either directly or with specially designed machinery. The cheese is pasteurized by the heat applied, and the effect is to check fermentation. A secret of the process is to apply this degree of heat and at the same time prevent the fat from "oiling off". The production of "Process cheese" in Canada in 1926 amounted to 20,298,428 lb., compared with 32,652,569 lb. in 1925 and 16,893,823 lb. in 1924, while the exports totalled 10,-872,755 lb. in 1926 and 21,381,532 lb., in 1925. Data regarding the production of "Process cheese" are not included in the statistics of dairy factories.

REPORT

ON THE

DAIRY FACTORIES OF CANADA, 1926

Introduction

In the introductory tables of this report the principal statistical data are shown by provinces for creameries, cheese factories and combined butter and cheese factories, with a total of the three classifications, while in the general tables, where detailed statistics are given by counties and districts, the total for all butter and cheese factories is given. Statistics of condensed milk factories are given separately in the introductory and the general tables. The number of dairy factories under each of the 4 classifications is shown by counties and districts in Table XII, page 61.

The compilations include all dairy factories in operation in Canada during the year 1926. From each factory was received a return showing capital invested; number of patrons; number of cows whose milk was sent to the factory; quantity of milk and cream delivered at the factory; amount paid to patrons; quantity and value of butter, cheese and other products; number of days in operation; employees, salaries and wages; fuel used; power equipment; and other data.

Establishments, Patrons and Number of Cows

Establishments.—The number of dairy factories in operation in Canada during the year 1926 was 3,047, an increase of 35 over the preceding year and an increase of 114 over the year 1924. The total for 1926 comprises 1,269 creameries, 1,418 cheese factories, 334 factories making butter and cheese, and 26 factories making condensed and evaporated milk, milk powder, etc. The number of creameries shows an increase of 29 over the preceding year, the number of cheese factories an increase of 28, and the number of condenseries an increase of 2; while the number of combined butter and cheese factories shows a decrease of 24.

Patrons.—The total number of patrons (farmers who supply milk to dairy factories) shown by the returns for 1926 was 330,382, compared with 317,762 in 1925 and 319,489 in 1924.

Number of Cows.—The number of cows whose milk was sent to creameries was 1,490,340; to cheese factories, 522,928; to combined butter and cheese factories, 189,482; and to condenseries, 106,063,—a total of 2,308,813, compared with a total of 2,344,603 in 1925, and of 2,282,841 in 1924.

1924 and 1925—Nova Scotia 1; Ontario 20; British Columbia 3.

1926—Nova Scotia 1; Ontario 22; British Columbia 3.

Deliveries of Milk and Cream

Milk.—The total quantity of milk delivered to all factories in 1926 was 2,859,552,382 lb., of which 426,278,590 lb. went to creameries, 1,701,670,455 lb. to cheese factories, 350,581,248 lb. to combined butter and cheese factories, and 381,022,089 lb. to condenseries. Increases over the preceding year are shown in the quantities delivered to creameries and to condenseries, with decreases for cheese factories and combined butter and cheese factories. The total for milk delivered to creameries is exclusive of that delivered to creameries in the province of Quebec, as the milk sent to creameries in that province is shown according to its butter fat content and is included in the tables with the butter fat content of the cream.

Cream.—The deliveries of cream to all factories had a total butter fat content of 149,078,594 lb., compared with 144,070,396 lb. in 1925. These totals include the butter fat content of the milk delivered to creameries in the province of Quebec, which amounted to approximately 13,815,738 lb. in 1926 and 15,220,509 lb. in 1925.

Estimate of Total Milk Supply.—The approximate amount of milk required to supply all factories in 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,118,-940,782 lb. an increase over the preceding year of 190,064,006 lb. or $2\frac{1}{2}$ p.c.

Amounts Paid to Patrons

The total amount paid to patrons of dairy factories for milk and cream delivered during the year 1926 was \$95,649,253, a decrease from the preceding year of \$6,213,234, or 6 per cent, but an increase over the year 1924 of \$8,844,518 or 10 per cent. The patrons of creameries in 1926 received \$59,049,155, an increase of \$3,389,402 over 1925; of cheese factories, \$22,368,405, a decrease of \$6,119,223; of combined butter and cheese factories, \$7,657,072, a decrease of \$3,160,075; and of condenseries, \$6,574,621, a decrease of \$323,338. The average price of milk in 1926 was \$1.53 per 100 lb., compared with \$1.74 in 1925. The butter fat content of the cream averaged 35 cents per lb. in 1926 and 36 cents in 1925. Table IV, page 40, shows separately the amounts paid for the milk and for the cream. The following table gives the total amounts paid to patrons of each of the 4 classifications of dairy factory.

Production of Creamery Butter and Factory Cheese

Creamery Butter.—The total quantity of creamery butter made in Canada in 1926 was 177,209,287 lb., an increase over the preceding year of 7,714,320 lb. or 4½ per cent. The production of 1926 is the second largest in the history of the industry and is less than that of the record year 1924 by only 1,684,650 lb. The value of production in 1926 was \$61,753,390 a decrease from the preceding year of \$1,254,707, but an increase over the year 1924 of \$1,258,564. The average selling price at the factory of 33.82 cents per lb. in 1924 was the lowest price recorded since 1916. The price rose in 1925 to 37.17 cents, but dropped in 1926 to 34.85 cents. The average production per year for the ten-year period 1917 to 1926 was 136,608,702 lb., the average value \$53,984,910, and the average price per lb. 39.52 cents. The production of 1926 was 40,600,585 lb. greater than the average of the ten-year period, the total value \$7,768,480 more, while the price per lb. was 4.67 cents less.

Factory Cheese.—The production of factory cheese in 1926 amounted to 171,731,631 lb., a decrease of 5,407,482 lb. from the preceding year, but an increase over the year 1924 of 22,024,101 lb. The total value of the 1926 production was \$28,807,841, a decrease from 1925 of \$7,763,715, but an increase over 1924 of \$4,605,918. The average price per lb. was 16.77 cents in 1926, compared with 20.65 cents in 1925 and 16.17 cents in 1924. The average production per year for the ten-year period 1917 to 1926 was 163,354,763 lb., the average value \$33,308,549, and the average price per lb. 20.39 cents. The quantity of factory

DAIRY FACTORIES

cheese made in 1926 exceeded the average of the period by 8,376,868 lb., while the value was less than the average by \$4,500,708, and the price per lb. by 3·62 cents.

The following tables give quantity and value of creamery butter and factory cheese, by provinces, for the years 1924 to 1926; average prices per lb. for the same years; and quantity, value and average price per lb. of creamery butter and factory cheese for the whole of Canada for the years 1900, 1907, 1910 and 1915 to 1926. The last mentioned table is illustrated by the chart on page 14.

Condensed and Evaporated Milk, etc. and Miscellaneous Products of Dairy Factories

Condensed and Evaporated Milk, Milk Powder, etc.—The total value of these products in 1926 was \$9,601,138, a decrease from the preceding year of \$243,475. Condensed and evaporated milk and milk powder show decreases in quantity from the year 1925, while condensed skim milk and skim milk powder show increases of 4,229,979 lb. and 819,170 lb. respectively. Casein shows an increase of 214,077 lb. Table 8.

Miscellaneous Products.—The principal items under this head are whey butter, ice cream, and milk and cream sold. The quantity of whey butter made was 1,574,112 lb., an increase over the preceding year of 81,539 lb.; the quantity of ice cream made was 4,709,641 gal, an increase of 798,336 gal. Milk sold by the factories totalled 40,448,013 gal., an increase of 5,427,529 gal., and cream sold, 13,116,980 lb. butter fat content, an increase of 1,002,376 lb. butter fat. Table 9.

¹ Comprises ice cream mix, skim milk cheese, skim milk and whey.

Total Value of Products

The total value of all products of the dairy factories in 1926 was \$133,353,076, a decrease from the preceding year of \$4,929,150, or 3·6 per cent, but an increase over the year 1924 of \$11,325,895 or 9·3 per cent. The relation which each item bears to the total value of production in 1926 is as follows: butter 46 per cent; cheese, 22 per cent; condensed products, 7 per cent; ice cream, 5 per cent; milk and cream sold, 19 per cent; and other products, 1 per cent. The average value of production per factory in 1926 was \$43,765, compared with \$45,910 in 1925 and \$41,605 in 1924.

Other Data

Capital.—The capital investment of the factories in 1926 had a total value of \$47,091,589 compared with \$44,307,558 in 1925 and \$41,585,586 in 1924. The average value of capital per establishment in 1926 was \$15,455, compared with \$14,710 in 1925 and \$14,180 in 1924. Table 10.

10. Capital Invested in Dairy Factories, 1924, 1925 and 1926

¹ The condenseries are located by provinces as follows:—

1924 and 1925—Nova Scotia 1; Ontario 20; British Columbia 3.

1926—Nova Scotia 1; Ontario 22; British Columbia 3.

Employees and Salaries and Wages.—The total number of persons employed in the factories was 12,069 compared with 11,334 in 1925. For all of the provinces excepting Quebec the statistics make distinction between salaried employees and wage-earners. The classification of salaried employees comprises superintendents and managers, head butter and cheese makers, stenographers, salesmen, etc., while that of wage-earners includes assistant butter and cheese makers and factory helpers. The statistics are given in detail in table III, page 32. For Quebec no classification is made in this respect and all of the employees in that province are included in the tables as wage-earners. The statistics of employment of wage-earners by months (in the case of Quebec of all employees) shows that the months of highest employment in 1926 were June with 8,116, July with 8,247, August with 8,082, and September with 7,618 employees. The months of lowest employment were January and February with 4,344 and 4,334 employees respectively. The total amount paid in salaries and wages during the year was \$12,398,490, an increase over the preceding year of \$880,292.

The following table gives statistics of the number of employees and the amount paid in salaries and wages, by provinces.

11. Employees and Salaries and Wages, 1924, 1925 and 1926

-------------	-----	---------	-----	---------	-----	---------

¹ The condenseries are located by provinces as follows:

1924 and 1925—Nova Scotia 1; Ontario 20; British Columbia 3.
1926—Nova Scotia 1; Ontario 22; British Columbia 3.

Form of Organization.—The classification of butter and cheese factories according to form of organization shows 1,955 factories operated by individuals or partnerships; 425 by co-operative associations; and 641 by incorporated companies. The first classification shows a decrease of 30 from the preceding year; the second, a decrease of 1; and the third, an increase of 64. Of the condenseries, 23 were operated by incorporated companies and 2 by co-operative associations, while 1 was under individual ownership. Table X, page 59.

Time in Operation.—The total number of days in operation during the year by all factories was 685,498, an average per establishment of 225·0 days, compared with a total of 672,017 and an average of 223·1 in 1925. The grouping of establishments according to number of days in operation shows 1,181 as operating 240 days or over; 949 as operating from 180 to 239 days; 818 as operating from

120 to 179 days; and 99 as operating less than 120 days. All of the condenseries excepting 2 operated during the whole year. Table V, page 48 and Table IX, page 59.

Classification of Butter and Cheese Factories According to Quantity of Product.—In table XI, page 60, the creameries, cheese factories and combined butter and cheese factories are arranged in groups according to quantity of product. The creameries and combined factories are divided into 5 groups for butter product, ranging from the group giving the number of establishments making less than 50,000 lb. of butter, to the group of those making 500,000 lb. and over. The cheese factories and combined factories are similarly arranged for cheese production, the lowest group showing the number making less than 100,000 lb. during the year, and the highest group, those making 500,000 lb. and over. The classification for butter gives 820 creameries and 311 combined factories, each with a production during the year of less than 100,000 lb.; 403 creameries and 19 combined factories with a product of from 100,000 to under 500,000 lb.; and 46 creameries and 4 combined factories with a product of 500,000 lb. or over. In the last group the creameries show an increase of 7 over the preceding year, while the combined factories show a decrease of 2. The classification for cheese includes 1,249 cheese factories and 321 combined factories each with a production of less than 200,000 lb. during the year; 146 cheese factories and 13 combined factories with a product of 200,000 to under 500,000 lb.; and 5 cheese factories with a product of 500,000 lb. or over.

Imports and Exports

Imports.—The total value of imports of dairy products into Canada during the calendar year 1926 was \$3,965,769, an increase of \$1,556,536 over the preceding year. The quantity of butter imported amounted to 9,151,882 lb., divided almost equally between the United Kingdom, Australia and New Zealand, with small quantities from the United States and other countries. The total quantity of butter imported during the calendar year 1925 amounted to only 99,748 lb. The total amount of cheese imported in 1926 was 1,218,626 lb., this quantity being an average annual import. In the preceding year, 10,274,338 lb. were imported, most of this being New Zealand cheese which was re-exported from the United Kingdom and is credited in the trade tables to the latter country. This cheese was required by the manufacturers in Canada of "Process" cheese (made from Cheddar cheese) who were unable to obtain a sufficient supply of the domestic product.

Exports.—The exports of Canadian dairy products in 1926 had a total value of \$41,322,084, a decrease from 1925 of \$16,065,906. Decreases are shown in the exports of butter, cheese, milk, condensed, canned or preserved, and casein, with increases for milk and cream, fresh, and milk powder. Butter dropped from 26,646,535 lb. in 1925 to 9,814,000 lb. in 1926 and cheese from 150,742,900 lb. in 1925 to 134,656,600 lb. in 1926. The United Kingdom took 69 per cent of the quantity of butter exported and 88 per cent of the cheese.

Dairy Production of Various Countries

The following tables give statistics of the production of butter and cheese in various countries and the trade in these products for the principal importing and exporting countries, based on information taken from the latest reports issued by the several countries.

Production of Butter and Cheese¹

PRÉFACE

Les statistiques annuelles de l'industrie laitière sont publiées par le Bureau Fédéral de la Statistique en collaboration avec les ministères provinciaux de l'Agriculture. Les mêmes moyens de coopération embrassent toutes les provinces, seul le mode de recueillir les données diffère. Pour toutes les provinces, sauf Québec, une formule uniforme est rédigée et imprimée par les soins du Bureau Fécléral; dans les provinces maritimes, les provinces des prairies, la Colombie Britannique, les formules sont distribuées et les rapports recueillis et revisés par les administrations provinciales, qui les transmettent ensuite au Bureau pour être compilés; les statistiques ainsi obtenues servent également aux ministères fédéral et provinciaux. Dans la province d'Ontario, les formules sont distribuées et les rapports recueillis et compilés par le Bureau Fédéral, le ministère provincial de l'Agriculture procurant les listes des établissements et prêtant son concours pour l'obtention des informations négligées ou différencées. Le Bureau des Statistiques de Québec obtient des renseignements similaires par l'intermédiaire des inspecteurs de la Division Laitière provinciale; il fait lui-même la compilation des informations recueillies dans sa province et en transmet le résultat au Bureau Fédéral. Les originaux des rapports des inspecteurs sont également communiqués à ce Bureau.

Cette manière de procéder assure l'uniformité des statistiques de l'industrie laitière publiées par les gouvernements fédéral et provinciaux et évite aux fabriquants l'ennui d'un double rapport.

Les techniciens de la Division de l'Industrie Laitière et de la Réfrigération coopèrent également à ces opérations, en nous aidant de leurs conseils.

R. H. COATS,
Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,
OTTAWA, 5 décembre 1927.

NOTICE HISTORIQUE SUR L'INDUSTRIE LAITIÈRE AU CANADA

L'industrie laitière est l'une des plus anciennes et des plus importantes du Canada. Son développement et son expansion modernes sont le fruit de la centralisation de ses beurries et de ses fromageries, de l'invention de l'écrêmeuse centrifuge et des progrès accomplis par l'entreposage frigorifique. La première fromagerie canadienne naquit dans Ontario en 1864 et la première beurrerie canadienne dans Québec, en 1873. La première écrêmeuse centrifuge fut importée du Danemark en 1882; l'organisation par le gouvernement d'un service d'entreposage frigorifique date de 1895. En 1868, le Canada exportait 6,141,570 livres de fromage et 10,649,733 livres de beurre. C'est en 1904 que les exportations de fromage atteignirent leur plus fort volume soit 233,980,716 livres et le beurre en 1903, avec 34,128,944 livres. La dernière compilation, celle couvrant l'année solaire 1926, montre que les exportations de cette année ont été de 134,656,600 livres de fromage et 9,814,000 livres de beurre. Ce déclin du volume des exportations de fromage et de beurre ne doit pas être attribué à un ralentissement de la production laitière; il est causé par une plus grande consommation domestique, dont les besoins croissent avec l'augmentation de la population urbaine, surtout depuis le commencement du siècle. Le grossissement de la population urbaine eut incontestablement pour effet, d'abord d'accentuer la consommation du lait frais, puis ensuite de substituer la fabrication du beurre destiné à être consommé au pays, à la fabrication du fromage pour l'exportation.

Les statistiques de ce rapport ne couvrent que la production des fabriques et laissent de côté le beurre et le fromage qui se font dans les fermes. Le recensement de 1921 démontre qu'en 1920 le beurre fait dans les fermes représentait 103,487,506 livres et le fromage de même origine 533,561 livres soit 48 p.c. et 0.3 p.c. respectivement de la production totale.

Des statistiques complètes sur la production de l'industrie laitière sont en existence depuis 1900, date à laquelle le produit de toutes les fabriques avait une valeur de \$29,731,922. En 1926, cette production s'élevait à \$137,379,998; c'est donc une augmentation de \$107,648,076 ou 362 p.c. en 26 ans.

Les dernières années ont été témoins d'une expansion considérable de la production du lait condensé. La première fabrique de lait condensé fut établie à Truro, N.-E., en 1883; il existe actuellement au Canada 26 établissements où l'on fabrique le lait condensé, le lait évaporé et la poudre de lait. En 1900, la valeur de ces produits se limitait à \$269,520, mais en 1926 on l'évaluait à \$9,844,613. Cette production s'est énormément développée durant les années qui suivirent immédiatement la guerre, si bien qu'en 1920 sa valeur atteignait \$17,160,111.

La valeur de l'ensemble des produits de l'industrie laitière au Canada en 1926 est estimée à la somme de \$249,710,067 se répartissant ainsi qu'il suit: beurre de fabrique, 177,209,287 livres, valant \$61,753,390; beurre de ferme (approximativement) 95,000,000 de livres, valant \$28,252,777; fromage de fabrique 171,731,631 livres, valant \$28,807,841; fromage de ferme (approximativement) 516,745 livres, valant \$80,240; produits laitiers divers, \$17,767,271; lait consumé frais ou ayant servi à d'autres usages (approximativement) 4,851,667,017 gallons, valant \$113,048,548.¹

On estime à 28.43 livres la consommation per capita du beurre au Canada en 1926 et celle du fromage à 4.04 livres.²

¹Bulletin Mensuel de la Statistique Agricole de décembre 1927.

²Statistique du Bétail et des produits animaux, 1926.

Il convient de parler ici d'une nouvelle sorte de fromage nommé "Process cheese". Pour cette fabrication, on prend du fromage cheddar ordinaire, on le moud puis on le jette dans une cuve où il est chauffé au bain-marie et recuit par la vapeur. La chaleur a pour effet de pasteuriser le fromage, c'est-à-dire de le soustraire à toute fermentation ultérieure. Le détail le plus important de la fabrication consiste à doser la chaleur de telle manière que la matière grasse ne devienne pas huileuse. En 1926, la production de cette sorte de fromage au Canada fut de 20,298,428 livres, comparativement à 32,652,569 livres en 1925, et 16,893,823 livres en 1924; les exportations ont porté sur 10,872,755 livres en 1926, au lieu de 21,381,532 livres en 1925. Tout ce qui concerne la production de ce nouveau fromage est exclu des statistiques des fromageries.

INDUSTRIE LAITIÈRE DU CANADA, 1926

Introduction

Dans les tableaux introductifs de ce rapport, les principales données statistiques sont indiquées, par provinces, d'abord pour les beurries, puis pour les fromageries et enfin pour les fabriques de beurre et de fromage, avec totalisation de ces trois catégories. Au contraire, dans les tableaux d'ensemble, les statistiques sont données par comtés et districts, sans distinction entre le genre de fabriques. Tout ce qui concerne les fabriques de lait condensé est partout indiqué séparément. Le tableau XII, p. 61, indique le nombre des établissements de l'industrie laitière, répartis en catégories distinctes.

Ces informations embrassent tous les établissements en activité au Canada durant l'année 1926. Chaque fabrique a répondu à un questionnaire touchant les objets suivants: capital engagé, nombre de fournisseurs, nombre de vaches dont le lait est envoyé aux fabriques, quantité de lait et de crème livrée aux fabriques, sommes payées aux fournisseurs, quantité et valeur du beurre et du fromage et autres produits laitiers, durée des opérations, personnel et ses gains, combustible consommé, force motrice utilisée et autres données diverses.

Fabriques, fournisseurs et nombre de vaches

Fabriques.—En 1926 l'industrie laitière exploitait 3,047 établissements, soit 35 de plus que l'année précédente et 114 de plus qu'en 1924. Ils se décomposaient ainsi: 1,269 beurries, 1,418 fromageries, 334 fabriques de beurre et de fromage et 26 fabriques de lait condensé, poudre de lait, etc. Les beurries ont augmenté de 29 unités sur l'année précédente, les fromageries de 28, les fabriques de lait condensé de 2; par contre, on trouve 24 fabriques de beurre et de fromage de moins qu'en 1925.

Fournisseurs.—Le nombre des fournisseurs, c'est-à-dire des cultivateurs qui alimentèrent de lait et de crème tous ces établissements en 1926, s'élevait à 330,382, comparativement à 317,762 en 1925 et 319,489 en 1924.

Vaches.—Le nombre des vaches dont le lait a été livré aux beurries était de 1,490,340, aux fromageries de 522,928, aux fabriques de beurre et de fromage de 189,482 et aux fabriques de lait condensé de 106,063. Au total, toutes ces fabriques étaient approvisionnées par 2,308,813 vaches, comparativement à 2,344,603 en 1925 et 2,282,841 en 1924.

¹Les fabriques de lait condensé se répartissent ainsi qu'il suit entre les différentes provinces:

1924 et 1925: Nouvelle-Ecosse, 1; Ontario, 20; Colombie Britannique, 3.

1926—Nouvelle-Ecosse, 1; Ontario, 22; Colombie Britannique, 3.

Livraisons de lait et de crème

Lait.—En 1926, les fabriques ,toutes ensemble, ont reçu 2,859,552,382 livres de lait, soit 426,278,590 livres pour les beurries et 1,701,670,455 livres pour les fromageries, 350,581,248 livres pour les fabriques de beurre et de fromage et 381,022,089 livres pour les fabriques de lait condensé. Les beurries et les fabriques de lait condensé ont augmenté leur consommation; au contraire, celle des fromageries et des fabriques de beurre et de fromage est en décroissance. La statistique du lait livré aux beurries laisse de côté les établissements de la province de Québec pour la raison que dans cette province, au lieu de peser le lait on ne s'occupe que de son contenu en butyrine, lequel figure dans les tableaux avec la crème.

Crème.—La crème livrée en 1926 à toutes les fabriques sans distinction contenait 149,078,594 livres de butyrine, au lieu de 144,070,397 livres en 1925. Ce total embrasse la butyrine contenue dans le lait livré aux beurries de la province de Québec, laquelle était approximativement de 13,815,738 livres en 1926 et de 15,220,509 livres en 1925.

Estimation de la consommation de lait.—Basant la consommation du lait sur la quantité de lait fourni à toutes les fabriques en 1926, plus l'équivalent en lait de la butyrine contenue dans la crème on peut estimer cette consommation à 7,118,940,782 livres, soit une augmentation sur l'année précédente de 190,064,006 livres ou 2½ p.c.

Lait livré aux fabriques de lait condensé ¹						
Canada	1924	1925	1926	liv.	liv.	liv.
	371,059,545	377,774,493	381,022,689			

¹Dans Québec, le lait livré aux beurries est compté selon la butyrine qu'il contient; lait et crème sont confondus.

²Les fabriques de lait condensé se répartissent ainsi qu'il suit entre les différentes provinces:

1924 et 1925: Nouvelle-Ecosse, 1; Ontario, 20; Colombie Britannique, 3.

1926: Nouvelle-Ecosse, 1; Ontario, 22; Colombie Britannique, 3.

¹ Y compris la butyrine contenue dans le lait livré aux beurreries de Québec.² Les fabriques de lait condensé se répartissent ainsi qu'il suit entre les différentes provinces:
1924 et 1925: Nouvelle-Ecosse, 1; Ontario, 20; Colombie Britannique, 3.
1926: Nouvelle-Ecosse, 1; Ontario, 22; Colombie Britannique, 3.

Sommes payées aux fournisseurs

Les fournisseurs de lait et de crème ont reçu en 1926 une somme totale de \$95,649,253, soit \$6,213,234 ou 6 p.c. de moins que l'année précédente; néanmoins cette somme dépasse de \$8,844,518 ou 10 p.c. les chiffres de 1924. Les fournisseurs des beurreries ont reçu pour leur part \$59,049,155, soit une augmentation de \$3,389,402 sur 1925; les fromageries ont payé aux leurs \$22,368,405, soit une diminution de \$6,119,223; les fabriques de beurre et de fromage y ont contribué à concurrence de \$7,657,072, soit une diminution de \$3,160,075; les fabriques de lait condensé à concurrence de \$6,574,621, soit une diminution de \$323,338. En 1926, la moyenne du prix du lait s'établit à \$1.53 par 100 livres, qu'au lieu de \$1.74 en 1925; la butyrine a rapporté environ 35 cents par livre en 1926, au lieu de 36 cents en 1925. Le tableau IV page 40, indique séparément les sommes payées pour le lait et pour la crème, mais le tableau qui suit relève le total des sommes payées aux fournisseurs des quatre catégories d'établissements.

1926: Nouvelle-Ecosse, 1; Ontario, 22; Colombie Britannique, 3.

Production du beurre et du fromage de fabrique

Beurre.—En 1926 la production du beurre de fabrique au Canada atteignit 177,209,287 livres, en augmentation sur l'année précédente de 7,714,320 livres ou 4½ p.c. Hormis l'année 1924 qui lui est supérieure de 1,684,650 livres, cette production n'avait jamais été atteinte. La valeur de ce beurre était de \$61,753,390, en diminution sur l'année précédente de \$1,254,707, mais en augmentation sur l'année 1924 de \$1,258,564. En 1924, le prix moyen d'une livre de beurre prise à la beurrerie était de 33·82 cents le livre, c'est-à-dire plus bas que toutes les années précédentes, en remontant jusqu'à 1916. En 1925, cette moyenne s'éleva à 37·17 cents la livre, mais elle retomba en 1926 à 34·85 cents. La moyenne de production annuelle durant la période décennale 1917-26 fut de 136,608,702 livres, la valeur moyenne \$53,984,910 et le prix moyen par livre 39·52 cents. La production de 1926 dépassa de 40,600,585 livres la moyenne décennale et la valeur globale de \$7,768,480; par contre, le prix d'une livre est inférieur de 4·67 cents à cette moyenne.

Fromage.—En 1926 les fromageries canadiennes ont fabriqué 171,731,631 livres de fromage, soit une diminution de 5,407,482 livres sur l'année précédente mais une augmentation de 22,024,101 livres sur l'année 1924. Quant à la valeur globale de cette production elle était de \$28,807,841, en diminution de \$7,763,715 sur celle de 1925 mais en augmentation de \$4,605,918 sur celle de 1924. Le prix moyen d'une livre de fromage en 1926 était de 16·77 cents, comparativement à 20·65 cents en 1925 et 16·17 cents en 1924. Durant la période décennale

INDUSTRIE LAITIÈRE

1917-26, la moyenne de production annuelle s'établit à 163,354,763 livres, la valeur globale à \$33,308,549 et la moyenne du prix d'une livre de fromage à 20·39 cents. La production de 1926 dépassa cette moyenne par 8,376,868 livres, mais sa valeur lui était inférieure de \$4,500,708 et le prix moyen d'une livre de 3·62 cents.

Les tableaux qui suivent indiquent la quantité et la valeur du beurre et du fromage de fabrique, par province, pour les années 1924-26; leurs prix moyens en la même année; enfin, le volume, la valeur et le prix moyen du beurre et du fromage de fabrique pour l'ensemble du Canada en les années 1900, 1907, 1910 et 1915-1926. Le graphique de la page 86 est basé sur ce dernier tableau.

Lait concentré et produits variés de l'industrie laitière

Lait condensé, évaporé, etc.—La valeur de ces produits en 1926 s'est élevée à \$9,601,138, en diminution sur l'année précédente de \$243,475. Le lait condensé, le lait évaporé et la poudre de lait sont en décroissance sur l'année 1925, mais le lait écrémé condensé et la poudre de lait écrémé ont augmenté respectivement de 4,229,979 livres et 819,170 livres. La caséine a augmenté de 214,077 livres. (Tableau 8.)

Produits divers.—Sous cette rubrique on comprend le beurre de petit lait, la crème glacée, le lait et la crème vendus à l'état naturel. L'industrie a fabriqué 1,574,112 livres de beurre de petit lait, soit une augmentation sur l'année précédente de 81,539 livres. La fabrication de la crème glacée s'est élevée à 4,709,641 gallons, en augmentation de 798,336 gallons. Le lait vendu pour être consommé frais représentait 40,448,013 gallons, en augmentation de 5,427,529 gallons; quant à la crème vendue elle représentait 13,116,980 livres de butyrine, soit une augmentation de 1,002,376 livres. (Tableau 9).

Valeur totale des produits

La valeur totale de tous les produits de l'industrie laitière considérée dans son ensemble s'est élevée en 1926 à la somme de \$133,353,076, c'est-à-dire \$4,929,150 ou 3·6 p.c. de moins que l'année précédente mais \$11,325,895 ou 9·3 p.c. de plus qu'en 1924. La part contributive de chacun de ces produits pris isolément s'établit de la manière suivante; beurre 46 p.c.; fromage 22 p.c., produits condensés 7 p.c., crème glacée 5 p.c., lait et crème 19 p.c., autres produits 1 p.c. En moyenne, le chiffre d'affaires de chaque établissement pour l'année 1926 fut de \$43,765, comparativement à \$45,910 en 1925 et \$41,605 en 1924.

Autres données

Capital.—Les capitaux absorbés par l'industrie laitière en 1926 représentaient une somme de \$47,091,589, comparativement à \$44,307,558 en 1925 et \$41,585,586 en 1924; ce capital représentait \$15,455 par chaque établissement en 1926, \$14,710 en 1925 et \$14,180 en 1924. (Tableau 10).

10. Capitaux engagés dans l'industrie laitière en 1924, 1925 et 1926

Fabriques de lait condensé¹

Canada.....	24	6,607,483	24	7,015,458	26	7,127,063
-------------	----	-----------	----	-----------	----	-----------

¹Les fabriques de lait condensé se répartissent ainsi qu'il suit entre les différentes provinces:
1924 et 1925: Nouvelle-Écosse, 1; Ontario, 20; Colombie Britannique, 3.
1926: Nouvelle-Écosse, 1; Ontario, 22; Colombie Britannique, 3.

Personnel et ses gains.—En 1926 l'industrie laitière a fait travailler 12,069 personnes au lieu de 11,334 en 1925. Toutes les provinces, hormis Québec, établissent une distinction entre le personnel administratif et la main-d'œuvre. Dans la première catégorie entrent les directeurs, les gérants, les chefs de la fabrication, les sténographes, les commis, etc.; dans la seconde, les aides, ouvriers et journaliers. Les statistiques sous ces deux classifications sont contenues dans le tableau III, page 32. La totalité du personnel des établissements de la province de Québec figure dans la colonne de la main-d'œuvre. En ce qui concerne les ouvriers et journaliers nous voyons qu'en 1926 les mois de plus forte activité furent juin avec 8,116 personnes au travail, juillet avec 8,247, août avec 8,082 et septembre avec 7,618; les mois de morte-saison furent janvier avec 4,344 ouvriers occupés et février avec 4,334. Les appointements et salaires payés au personnel de toutes catégories durant le cours de l'année se sont élevés à la somme de \$12,398,490, soit une augmentation sur l'année précédente de \$880,292. Le tableau suivant relève, par provinces, le personnel et ses gains.

11. Personnel, appointements et salaires, 1924, 1925 et 1926

FABRIQUES DE LAIT CONDENSÉ¹

Canada.....	841	977,351	786	958,568	845	991,507
-------------	-----	---------	-----	---------	-----	---------

¹Les fabriques de lait condensé se répartissent ainsi qu'il suit entre les différentes provinces:
1924 et 1925: Nouvelle-Ecosse, 1; Ontario, 20; Colombie Britannique, 3.
1926: Nouvelle-Ecosse, 1; Ontario, 22; Colombie Britannique, 3.

Forme de l'organisation commerciale.—En groupant les beurseries et fromageries selon leur organisation commerciale on découvre que 1,955 fabriques étaient la propriété individuelle d'un industriel ou d'une société en nom collectif, 425 appartenaient à des associations coopératives et 641 à des compagnies par actions. La première catégorie en a 30 de moins que l'année précédente et la seconde une de moins; par contre, la troisième en possède 64 de plus. Quant aux fabriques de lait condensé, 23 appartenaient à des compagnies par actions, 2 à des associations coopératives et une à un particulier. (Tableau X, page 59).

Durée des opérations.—Toutes ensemble, les beurseries et fromageries ont travaillé durant l'année 685,498 journées, soit une moyenne par fabrique de 225 jours, au lieu d'un total de 672,017 jours et une moyenne de 223·1 en 1925. Poursuivant cette analyse on trouve que 1,181 beurseries et fromageries ont travaillé pendant 240 jours ou plus, 949 entre 180 à 239 jours, 818 entre 120 et 179 jours et 99 moins de 120 jours. Toutes les fabriques de lait condensé, sauf 2, ont travaillé pendant l'année entière. (Tableau V, page 48 et tableau IX, page 59).

Classification des beurreries et fromageries selon le volume de leur production.—Le tableau XI, page 60, divise les beurreries, les fromageries et les fabriques de beurre et de fromage en plusieurs groupes selon la valeur de leurs produits. Les établissements où l'on fabrique le beurre, c'est-à-dire les beurreries proprement dites et les beurreries-fromageries sont divisés en cinq groupes; au bas de l'échelle sont placés les établissements fabriquant annuellement moins de 50,000 livres de beurre et au sommet ceux qui en produisent 500,000 livres et plus. Au regard de la production du fromage la classification des fromageries et beurreries-fromageries est quelque peu différente; elle part de moins de 100,000 livres et remonte à 500,000 livres et plus. Nous apprenons par ce tableau que 820 beurreries et 311 beurreries-fromageries ont produit durant l'année moins de 100,000 livres de beurre, 403 beurreries et 19 beurreries-fromageries en ont produit entre 100,000 et 500,000 livres, enfin 46 beurreries et 4 beurreries-fromageries en ont fabriqué 500,000 livres ou plus. Dans ce dernier groupe se classent 7 beurreries de plus que l'année précédente, mais 2 beurreries-fromageries ont rétrogradé. Quant au fromage, 1,249 fromageries et 321 beurreries-fromageries en ont produit durant l'année moins de 200,000 livres, 146 fromageries et 13 beurreries-fromageries constituent le groupe de 200,000 à 500,000 livres; enfin 5 fromageries ont dépassé 500,000 livres.

Importations et exportations

Importations.—Durant l'année 1926 le Canada a importé des produits laitiers d'une valeur de \$3,965,769, soit une augmentation de \$1,556,536 sur l'année précédente. Les importations de beurre y ont contribué à concurrence de 9,151,882 livres, en provenance sensiblement égale de la Grande-Bretagne, de l'Australie et de la Nouvelle-Zélande, plus un appoint des Etats-Unis et d'autres pays. En 1925, ces importations de beurre s'étaient limitées à 99,748 livres. Quant au fromage les importations ont porté sur 1,218,626 livres; l'année précédente il en avait été importé 10,274,338 livres, dont la plupart était du fromage de la Nouvelle-Zélande réexporté par la Grande-Bretagne et crédité à ce dernier pays par les statistiques du commerce. Ce fromage était destiné aux fabricants canadiens de "process cheese" qui ne pouvaient trouver au pays une quantité suffisante de matières premières.

Exportations.—Les exportations canadiennes de produits laitiers en 1926 eurent une valeur totale de \$41,322,084, en diminution sur 1925 de \$16,065,906. Ces diminutions ont porté sur le beurre, le fromage, le lait, le lait concentré sous diverses formes et la caséine. Au contraire, le lait et la crème frais, ainsi que la poudre de lait ont augmenté. Le beurre est tombé de 26,646,535 livres en 1925 à 9,814,000 livres en 1926; quant au fromage il est descendu de 150,742,900 livres en 1925 à 134,656,600 livres en 1926. La Grande-Bretagne absorba 69 p.c. de nos exportations de beurre et 88 p.c. de nos exportations de fromage.

Production laitière de différents pays

Les tableaux qui vont suivre relèvent les statistiques de la production du beurre et du fromage dans différents pays ainsi que des importations et exportations des mêmes produits, les chiffres étant puisés dans les rapports les plus récents publiés par ces pays eux-mêmes.

Production de beurre et de fromage¹

Pays	—	Année	Beurre	Fromage
			liv.	liv.
République Argentine.....	F.	1928	76,062,686	33,338,863
Australie.....	T.	1925	273,313,685	28,799,320
Canada.....	T.	1926	272,209,287	172,248,376
Chili.....	T.	1925	2,787,561	5,694,854
Tchécoslovaquie.....	F.	1925	2,952,000	8,556,000
Danemark.....	T.	1926	335,160,000	51,817,500
Finlande.....	F.	1925	39,480,525	12,017,250
France.....	T.	1926	382,668,930	462,555,639
Allemagne.....	T.	1913	771,610,000	591,714,840
Grande-Bretagne et Irlande.....	T.	1921	280,000,000	108,000,000
Japan.....	T.	1925	1,875,295	—
Pays-Bas.....	T.	1925	165,384,881	249,727,275
Nouvelle-Zélande.....	T.	1925	167,034,400	143,654,100
Norvège.....	F.	1925	5,882,049	31,114,409
Russie.....	T.	1924	752,483,455	1,885,307,447
Suède.....	F.	1925	70,938,576	44,787,125
Suisse.....	T.	1926	29,767,500	156,012,570
Etats-Unis.....	T.	1926	1,946,000,000	422,000,000
Union Sud-Africaine.....	T.	1925	20,295,313	5,831,033

NOTA.—La lettre T indique la production totale et la lettre F la production des fabriques seulement.

Exportations et importations de beurre et de fromage par les principaux pays

Pays	Année	Quantité	liv.
			IMPORTATIONS DE BEURRE
Grande-Bretagne et Irlande.....	1926	587,836,800	
Allemagne.....	1926	215,622,540
