THE PROCESS CHEESE INDUSTRY, 1951

Price 10 cents

The total value of production in the process cheese industry rose to \$26,349,068 in 1951. The data are not entirely comparable with those for 1950, as a quantity of margarine is included in 1951 under the item "other products" and this commodity was not reported in 1950, although some was made in the industry. Also, some firms were reclassified to the industry, which formerly reported under the dairy factory classification. The total production of process cheese in both industries amounted to 39,364,653 lb., an increase of 7 p.c. over the total of 36,504,593 lb. recorded for 1950.

Table 5 shows the total production of process cheese, by months, including that made in the dairy factory industry.
