Vol. 2—Part III—S-1

NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: **Volume I**—The Primary Industries, including mining, forestry and fisheries; **Volume II**—Manufacturing; **Volume III**—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I—General Review of the Manufacturing Industries. \$1.50
- II—The Manufacturing Industries of Canada, (7 sections, as follows:)
 - Section A. Summary for Canada, 25¢
 - Section B. Atlantic Provinces, 25¢
 - Section C. Quebec, 25¢
 - Section D. Ontario, 25¢
 - Section E. Prairie Provinces, 25¢
 - Section F. British Columbia, 25¢
 - Section G. The Manufacturing Industries of Canada, Regional Distribution, 75¢
- III—Foods and Beverages
- IV—Tobacco and Tobacco Products
- V—Rubber Products
- VI—Leather Products
- VII—Textiles
- VIII—Wood and Paper Products
- IX—Printing Trades
- X—Iron and Steel Products
- XI—Transportation Equipment
- XII—Non-ferrous Metal Products
- XIII—Electrical Apparatus and Supplies
- XIV—Non-metallic Mineral Products
- XV—Products of Petroleum and Coal
- XVI—Chemicals and Allied Products
- XVII—Miscellaneous Manufactures

The present report belongs in Part III, Foods and Beverages. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

- A—General Review, 25¢
- B—The Slaughtering and Meat Packing, and Sausage and Sausage Casings Industries, 25¢
- C—The Dairy Products Industry, 25¢
- D—The Fish Processing Industry, 25¢
- E—The Fruit and Vegetable Preparations Industry, 25¢
- F—The Flour Milling Industry, 25¢
- G—The Prepared Breakfast Foods Industry, 25¢
- H—The Feeds Industry, 25¢
- I—The Biscuit Industry, 25¢
- J—The Bread and Other Bakery Products Industry, 25¢
- K—The Carbonated Beverages Industry, 25¢
- L—The Distilling Industry, 25¢
- M—The Brewing Industry, 25¢
- N—The Wine Industry, 25¢
- O—The Confectionery Industry, 25¢
- P—The Sugar Refining Industry, 25¢
- Q—The Macaroni and Kindred Products Industry, 25¢
- R—The Miscellaneous Food Preparations Industry, 25¢
- S—The Canned Foods Summary, 25¢

THE CANNED FOODS SUMMARY

1953

The Canned Foods Summary is an annual report combining production statistics from all sources of foods packed in cans or other air-tight containers. The items include food products such as meat, fish, fruits, vegetables, juices, concentrated milk, etc., but do not include canned beverages, dog food, etc.

In 1935 the gross value of production of canned foods was \$50,000,000 (see Table 1). Each succeeding year except 1943 and 1949 this production has increased until the 1952 value was over \$359,000,000, more than seven times the 1935 figure. The 1953 value of \$307,476,965 shows a drop of over \$50,000,000, mainly accounted for by a decrease in the production of Canned Meats.

Since the introduction, about 150 years ago, of canning as a method of food preservation, food processors have constantly sought to improve their production, not only through new and improved methods but also by adding to the variety of foods which may be successfully canned. The canning industry is of great importance economically as it gives work to nearly thirty thousand people annually. Related fields of transportation, merchandising, etc. employ many more workers proportionately. The commercial canning of foods has saved housewives many hours of needless toil and has helped keep the food budget within reasonable bounds. In addition, the canning industries are important from the standpoint of nutrition. Throughout the whole year, it is now possible to enjoy canned foods with much of the flavour and all of the nourishment of fresh-cooked food. The consumer is protected by the inspection services of the Department of Agriculture and the Department of Fisheries, Ottawa.

The tables in this bulletin give details of the volume and value of production of various domestically canned foods as well as those imported from and exported to other countries. A supplementary table was added in 1951 to show per capita consumption of various canned foods from 1939 to date.

TABLE 1. Gross Value of Production of Principal Canned Foods, 1935-1953¹

Note. The values given here correspond to the quantities given in Table 2.

	Canned Fish	Canned Fruits	Canned Vegetables	Canned Meats ²	Canned Soups	Miscellaneous Canned Foods ³	Concentrated Milk Products	Total

1. Includes Newfoundland beginning 1951.

2. Includes meat, chicken, ready dinners, and meat pastes.

3. Includes juices, pie fillings, jams, attachment, etc.

4. Increased production in 1952 is due to government controlled canning programs.

1. Includes Newfoundland beginning 1951.

2. These commodities are reported in cases from 1935 to 1940 inclusive.

3. See footnote 4 above.

Imports and Exports

Imports of canned foods during 1953 were valued at \$4,046,875. Fruits not grown in Canada or grown only in limited areas by reason of climatic conditions form the most important items of import, e.g., pineapple, apricots. For the same reason citrus fruit juices are being imported in increasingly large quantities. Canned beef was brought in from Australia during 1951 and gives the highest import figure to date for canned meats.

The exports of canned foods during 1953 amounted to \$48,061,154 with canned fish, canned meat, and concentrated milk products making up nearly 96% of this amount. The following table summarizes the imports and exports of canned foods by groups for significant years from 1939 to 1953.

TABLE 3. Imports of Canned Foods, Calendar Years

 3. Included in "Other provinces".

Fish Canning

The principal varieties of fish used in Canadian canneries are, in order of their importance: salmon, sardines, lobsters, herring, and clams.

Salmon Canning.—The canning of salmon in Canada is an industry confined almost wholly to the province of British Columbia, where this river-spawning fish of the Pacific coast is taken in abundance. Annual records of the salmon pack extend to 1876, when the number of cases was 9,847. The annual pack in recent years has, with few exceptions, exceeded a million cases, and in each of four years (1926, 1928, 1930 and 1941) was more than two million cases. The pack of 1953 totalled 1,826,072 cases, valued at \$36,055,143. Under regulations made by Order in Council of April 4, 1932, canned salmon shipped out of the province must be inspected

and graded according to quality, and each can must carry a letter representing the species of salmon.

Every species of salmon known to the waters of the Pacific is to be found on the British Columbia Coast—the sockeye, the spring, the coho, the pink and the chum salmon. Of these, the sockeye, though not taken in such great numbers as the pinks and chums, is by far the most important, owing to its abundance, its deep red colour and its excellent texture which have created so keen a demand in British and foreign markets. The chief sources of supply are the Skeena River and other northern waters, and the Fraser River. The remaining species are all marketable in quality though not commanding the high prices reached by the sockeye.

Lobster Canning.—The lobster is found in Canada in Atlantic Coast waters only, and the lobster canning industry is confined to the eastern Maritime Provinces, with Prince Edward Island as the chief producer. The annual pack of lobster in the early years of the present century frequently exceeded two hundred thousand cases, but in recent years, the output has been below that figure, the trend being towards the sale of lobsters 'in shell' to the United States market. In 1953 the pack of lobster was 75,020 cases, and the value

amounted to \$3,600,960. While the quantity packed is higher than 1952, the average price per case is lower.

In order to conserve the fisheries the Government prohibits the capture of lobsters of less than a fixed minimum size, and also makes provision for the closing to lobster fishing of such areas and for such periods in each year as may be deemed advisable.

TABLE 8. Production of Canned Lobsters, 1897 to 1953

Sardine Canning.—Sardine is the name given to the young herring that is used for canning. New Brunswick produces almost the entire Canadian pack of canned sardines and in that province it is the leading fishing industry. The number of

sardine canneries is small, but those in operation are of large size. In 1953 the pack totalled 440,637 25-pound cases valued at \$2,983,835. There is an important market abroad for Canadian sardines, and large quantities are exported annually.

Fruit and Vegetable Canning

The canning of fruits and vegetables is carried on most extensively in the provinces of Ontario, British Columbia and Quebec, where climatic conditions are favourable for the growing of fruits and vegetables. The canning season begins in June and continues throughout the summer and autumn until October, being at its height in July, August and September. The pack in 1953 consisted of 7,577,310 dozen cans

of fruit and 29,817,339 dozen cans of vegetables. Other important canned products are: soups of all kinds, 21,706,263 dozen cans, tomato juice 5,129,068 dozen cans, prepared foods for infants 12,124,571 dozen cans, etc. For detailed statistics of production of canned fruits and vegetables, by provinces, see Table 5.

Meat Canning

The total value of canned meats shipped from packing plants in Canada during 1953 was \$41,002,821, the most important items being ham and spiced pork. There were 34,290,570 pounds of this commodity shipped from the plant at a selling value of \$23,001,840. Meat canning is carried on most extensively in the Prairie Provinces where abundant grazing land affords feed for large herds of cattle, and the large grain crops provide feed for hogs. Large meat-packing plants have been built in Alberta and Manitoba, and the canning of meat is becoming an increasingly important sideline to the main packing industry.

In 1952 there was a tremendous increase in canned meat production owing to the outbreak early in the year of the foot-

and-mouth disease. Since the United States immediately imposed restrictions on the importation of Canadian livestock and meat products, a surplus was built up which threatened the economic stability of the industry. The Federal Government adopted emergency control measures in an effort to offset this surplus. Under these measures meat packers canned the surplus and this was held under Government control to be released for domestic consumption or export as the opportunity arose.

At the end of 1952 slaughtering of hogs for the government canning programme was terminated and the production of canned meats soon returned to normal. See Tables 1 and 2.

Concentrated Milk Products

The concentrated milk products industry in Canada dates from 1883 when the first factory was established in Truro, Nova Scotia, by the Reindeer Condensed Milk Company. As the demand for prepared milk grew, other plants were established and other kinds of products added to the output. There are now in Canada thirty-three plants, the list of principal products including condensed milk, evaporated milk, skim milk powder, buttermilk powder and casein.

The value of concentrated milk products in Canadian factories as first reported in the decennial census of 1891 was \$83,000. In 1901 the value had increased to \$269,520 in 1906 to \$855,409 and 1910 to \$1,814,871. The value of production for the years 1917-1953 is given in the following table.

1. Includes "dried whey".
2. Exclusive of "milk preparations, n.o.p.".

Consumption of Canned Foods in Canada, 1939 to 1953

The following table gives the per capita consumption in Canada of various canned foods. The method of arriving at

consumption figures is shown in detail for 1952 and 1953. All figures given are in pounds.

TABLE 14. Per Capita Consumption of Canned Foods, 1940-1951

	1940	1941	1942	1943	1944	1945	1946	1947	1948	1949	1950	1951
