THE CONFECTIONERY INDUSTRY

1951

In 1951 the output of the confectionery, cocoa and chocolate industries declined. The gross value of products decreased from \$104,853,748 to \$90,220,866 or 13.9 per cent. The cost of materials used, decreased from \$54,520,295 to \$48,795,224 or 10.5 per cent. Employment showed a drop of 2,033 employees, or 18.7 per cent; while salaries and wages decreased from \$18,451,058 to \$16,867,348, or a drop of 8.6 per cent.

It should be noted that statistics for Newfoundland were included with the 1950 tables for the first time. As there is only one establishment reporting, the figures have been included with those of Nova Scotia and New Brunswick, in order to prevent disclosure of individual figures. The number of establishments reporting in 1951 was 195, and were located by provinces as follows: Newfoundland, 1; Nova Scotia, 8; New Brunswick, 4; Quebec, 51;

Ontario, 78; Manitoba, 12; Saskatchewan, 1; Alberta, 7; and British Columbia, 33.

Of added interest to the statistics on the Confectionery Industry is the inclusion of a table showing the estimated capital, repair and maintenance expenditures covering the years 1947-1952. (See Table 11 for detailed figures).

To bring the industry in line with the Standard Classification currently used in the Bureau, the confectionery, cocoa, chocolate and chewing gum industries were separated from the biscuit and ice cream cone industry. However, in order to maintain the historical trend of the combined industries a table is included showing the principal statistics for the biscuit, ice cream, confectionery and chewing gum industries as a unit. (See Table 1).

1. Profits or losses cannot be estimated from census figures as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

2. Selling value at the factory.

3. In 1932 firms manufacturing ice cream only were transferred from this industry to that of "miscellaneous dairy products".

4. In 1945 the production of ice cream cones was included with this industry.

5. The decline in the number of employees is due to a change in the method of reporting the sales staffs and warehouse employees. Firms were instructed to omit all sales staffs and warehouse employees who were not directly employed in the manufacturing plant. It was found that in the past some firms reported all their sales and warehousing employees located throughout the whole country. Now they are requested to report only the warehouse and sales staff working in the plant.

6. In 1947 firms manufacturing biscuits, ice cream cones, and waffles were transferred to the Biscuit industry.

7. Newfoundland included.

1. In 1946 and 1947, conversion factor used in converting bars to pounds was 1½ pounds equalled one dozen bars. Previous to 1946, 1⅔ pounds was used.
2. As the chocolate and sugar confectionery bars vary in weight, it was difficult to find a suitable conversion factor; therefore, confectionery in pounds is given separately from confectionery in bars.
