THE CONFECTIONERY INDUSTRY

1955

Beginning in 1952, the Bureau changed its policy with regard to the collection of statistics on the production of manufactured goods. Firms in several industries, where year-end inventory changes were known to be insignificant, were requested to report value of shipments f.o.b. plant instead of gross value of production. This change-over should result in better consumption data and should, eventually, provide industry with better statistics for economic analysis.

The following facts should be considered when the detail of the historical series on this Industry is considered. In 1932, firms manufacturing ice-cream only were transferred from this Industry to that of Miscellaneous Dairy Products. In 1945 the production of ice cream cones was included. In 1946, firms were instructed to omit all sales staff and warehouse employees who were not directly employed in the manufacturing plant. Some firms had previously reported all their sales and warehousing employees located throughout all of Canada. Beginning in 1949 firms in Newfoundland are included. However, since there is only one establishment

reporting from that province, the figures have been included with those of Nova Scotia and New Brunswick.

In 1955 manufacturers whose main products are roasted peanuts or ready-to-eat popcorn were added to the Confectionery Industry in accordance with Standard Industrial Classification recommendations. Formerly these firms had been compiled with the Miscellaneous Food Preparations Industry. Principal Statistics in Tables 1 and 2 have been revised back to 1936 by the addition of the firms which were operating in those years. All other tables providing 1954 figures have been revised to include the respective data for these firms.

Of the 227 establishments reporting 95 are located in Ontario and account for more than half of the value of shipments. Quebec ranks second with 57 establishments producing over 31% of the total.

In 1954 statistics on Inventory values were collected for the first time in this survey. The results are shown in Table 4.

1. Profits or losses cannot be estimated from census figures as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

2. Beginning in 1952 gross value of production is replaced by gross value of shipments f.o.b. plant (see text above).

3. Not comparable with succeeding years (see text).

Note. Beginning in 1936 these figures include firms who manufacture roasted peanuts and ready-to-eat popcorn. (See text).

2. Beginning in 1952, gross value of production is replaced by gross value of shipments f.o.b. plant (see text).

3. Figures for value added by manufacture are obtained by subtracting the cost of materials used, including fuel and electricity, from the value of production. For 1952 and 1953 value added figures are obtained by subtracting cost of materials, fuel and electricity from SHIPMENTS. For 1954-5 value of production is obtained from value of shipments by adding or subtracting the change in finished goods inventory, and then deducting cost of materials, fuel and electricity.

Note. Revised to include manufacturers of roasted peanuts and ready to eat popcorn (see text).
