 DOMINION BUREAU OF STATISTICS  
 GENERAL MANUFACTURES BRANCH  
 OTTAWA - CANADA

Dominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.).  
 Acting Chief, General Manufactures Branch: A. Cohen, B.Com.

THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1933.

To permit of a closer analysis of the flour and feed milling industries this report has been divided into three sections. Section 1 comprises a general summary of the industry as a whole, Section 2 deals with the mills whose principal output is flour and other edible cereal products, whilst Section 3 is devoted to the mills whose operations are mostly confined to the production of chopped grain and other feeds.

SECTION 1. - GENERAL SUMMARY

A review of the flour and feed milling industries during the year 1933 reveals the fact that notwithstanding an increase of thirty-eight in the number of mills reporting there was still a downward tendency applicable to number of employees, salaries and wages and value of products. The principal statistics are shown for the Dominion for the years 1920-1933 in table 1(a) and by provinces for the year 1933 in table 1(b).

This industry, which has existed to meet the domestic needs for more than 300 years, is one of the Dominion's oldest manufactures, but it is only within recent times that its progress has become spectacular. The War and the demand it created gave a great impetus to this trade. The 413 flour mills, many of them of the most modern type and highest efficiency, have a capacity far in excess of Canada's demands. During 1928 productive capacity reached about 121,000 barrels per day. Since then the industry has been adversely affected by the difficulties which beset the Canadian grain trade and the great decline in the prices of grains. Exports of wheat flour declined from 10,737,266 barrels in 1928 to 5,570,424 barrels in 1933, but in spite of the decrease Canada continues to be one of the leading exporters of wheat flour.

From the foregoing tables it will be noted that the decrease in the number of employees was 116, in the salary and wage payments \$468,258 and in the value of production \$1,426,701. The increase in capitalization amounted to \$771,293 and the cost of materials accounted for an additional \$120,192.

PRODUCTION. - The total value of all products of the two industries in 1933 amounted to \$83,322,099, of which spring wheat flour was accountable for \$41,222,066. Next in order of importance was chopped grain feed with a total of \$17,008,131, followed by fall or winter wheat flour to the extent of \$7,724,706. Rolled oats take fourth place with \$4,282,902 whilst shorts and middlings and bran occupy fifth and sixth positions with a valuation of \$4,138,032 and \$2,842,051 respectively.

THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1933.

CAPITAL. - The capital employed in these industries represented an investment of \$59,054,505, which was divided as follows: fixed capital, consisting of present value of land, buildings, fixtures, machinery, tools, etc., \$33,273,228 and working capital which comprises inventory value of materials on hand, stocks in process \$9,304,222, inventory value of finished products on hand \$6,425,097 and cash, bills and accounts receivable \$10,051,958.

EMPLOYEES, SALARIES AND WAGES. - The administrative and clerical work in connection with the two industries required the services of 1,698 male and 179 female employees whose total salaries amounted to \$2,043,470. The number of wage-earners employed was 3,439 male and 154 female which necessitated a payroll amounting to \$3,064,667.

COST OF MATERIALS. - The total cost of all materials used in both industries including containers amounted to \$63,297,848. Wheat of all kinds was by far the largest contributor to this sum with \$40,544,679. Mixed grain for chopping takes second place with \$10,806,658. The next largest item of expense was that of containers of all kinds which accounted for \$4,941,263, whilst oats occupy fourth position with a total of \$4,210,234.

49-50 hours .....	14	Over 60 hours .....	18

The above table does not include overtime.

THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1933.

Table 7. - Power Equipment in Feed and Chopping Mills, 1933.

Classes of Power	Number of Units	Horse-power according to Manufacturers' Rating
Steam engines and steam turbines .....	67	2,948
Diesel engines .....	132	5,398
Gasoline, gas and oil engines other than diesel .....	200	5,528
Hydraulic turbines or water wheels .....	458	15,188
Electric motors operated by purchased power .....	451	10,744
TOTAL POWER USED IN MANUFACTURING ...	1,308	39,806
Electric motors operated by power generated at the mill .....	2	35
Total Electric Motors .....	453	10,779
Boiler installation .....	67	3,421

Table 8. - Fuel Consumption in Feed and Chopping Mills, 1933.

Classes of Fuel	Unit of Measure	Quantity	Total Cost at Mill
Coal -	Ton (2000 Lbs.)		\$
Bituminous .....	(2000 Lbs.)	1,499	10,221
Anthracite .....	"	38	514
Lignite .....	"	77	296
Coke .....	"	17	200
Gasoline .....	Imp. Gal.	57,177	12,702
Kerosene or coal oil .....	" "	10,568	1,429
Fuel and diesel oil .....	" "	296,867	31,802
Wood .....	Cord	2,495	6,961
Gas, manufactured and natural .....	M cu. ft.	10,699	6,214
Other fuel .....	-	-	5,943
TOTAL COST OF FUEL .....	-	-	76,282
