THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1937.

To permit a closer analysis of the flour and feed milling industries, this report is divided into three sections. Section 1 comprises a general summary of the industry as a whole, Section 2 deals with the mills whose principal output is flour and other edible cereal products, whilst Section 3 is devoted to the mills whose operations are mostly confined to the production of chopped grain and other feeds.

SECTION 1. - GENERAL SUMMARY

A review of the flour and feed milling industries during the year 1937 reveals the fact that, notwithstanding a decrease of 32 in the number of mills reporting, there was a marked increase in all of the other items comprising the principal statistics with the exception of Capital invested which shows a decrease. These are shown for the Dominion for the years 1924 to 1935, and by provinces for the years 1936 and 1937 in table 1.

The decrease in the number of establishments is largely due to more extensive distribution services now in force by some of the larger milling companies covering the more sparsely populated areas. This has superseded to a great extent the former system of obtaining flour and other cereal products from the local mills, some of which have consequently discontinued operations.

This industry, which has existed to meet the domestic needs for more than 300 years, is one of the Dominion's oldest manufactures, but it is only within recent times that its progress has become spectacular. The War and the demand it created gave a great impetus to this trade. The 835 flour mills, many of them of the most modern type and highest efficiency, have a capacity far in excess of Canada's demands. During 1928 productive capacity reached about 121,000 barrels per day. Since then the industry has been adversely affected by the difficulties which beset the Canadian grain trade and the great decline in the prices of grains. Exports of wheat flour declined from 10,737,266 barrels in 1928 to 4,087,011 barrels in 1937, but in spite of the decrease, Canada continues to be one of the leading exporters of wheat flour.

THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1937.

THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1937.

From the tables following it will be noted that in 1937 there were increases of 118 in the total number of employees, \$334,811 in the salary and wage payments, \$19,017,080 in the value of production, whilst the cost of materials used accounted for an additional \$20,944,095. There was, however, a decrease of \$5,587,255 in the capital invested. Of this decrease \$234,431 was in fixed and \$5,352,824 in the working capital.

Production. - The total value of all products of the two industries in 1937 amounted to \$133,634,179 of which wheat flour was accountable for \$80,597,091. Next in order of importance was chopped grain feed with a total of \$23,700,986 followed by shorts and middlings to the extent of \$7,925,147. Rolled oats takes fourth place with \$5,878,848, whilst bran occupies fifth position with a valuation of \$5,404,959.

Capital. - The capital employed in these industries represented an investment of \$56,280,032 which was divided as follows: fixed capital - consisting of present value of land, buildings, fixtures, machinery, tools, etc., - \$28,532,888, and working capital which comprises inventory value of materials on hand, stocks in process, finished products on hand, etc., \$19,019,991 and cash, bills and accounts receivable \$8,727,153.

Employees, Salaries and Wages. - The administrative and clerical work in connection with the two industries required the services of 1,632 male and 201 female employees whose total salaries amounted to \$2,295,245. The number of wage-earners employed was 3,817 male and 153 female which necessitated a payroll amounting to \$3,582,511.

Cost of Materials. - The total cost of all materials used in both industries, including containers, amounted to \$111,558,331. Wheat of all types was by far the largest contributor to this sum with \$77,797,365. Mixed grain for chopping takes second place with \$15,880,941. The next largest item of expense was that of oats which accounted for \$6,962,191, whilst containers and container materials occupy fourth position with a total cost of \$5,262,795.
