THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1938.

To permit a closer analysis of the flour and feed milling industries, this report is divided into three sections. Section 1 comprises a general summary of the industry as a whole, Section 2 deals with the mills whose principal output is flour and other edible cereal products, whilst Section 3 is devoted to the mills whose operations are mostly confined to the production of chopped grain and other feeds.

SECTION 1. - GENERAL SUMMARY

A review of the flour and feed milling industries during the year 1938 reveals the fact that, in addition to a decrease of 6 in the number of mills reporting, there was a marked decline in all of the other items comprising the principal statistics with the exception of salaries and wages which shows an increase. These are shown for the Dominion for the years 1924 to 1936 and by provinces for the years 1937 and 1938 in table 1.

The decrease in the number of establishments during the past few years is largely due to more extensive distribution services now in force by some of the larger milling companies covering the more sparsely populated areas. This has superseded to a great extent the former system of obtaining flour and other cereal products from the local mills, some of which have consequently discontinued operations.

This industry, which has existed to meet the domestic needs for more than 300 years, is one of the Dominion's oldest manufactures, but it is only within recent times that its progress has become spectacular. The War and the demand it created gave a great impetus to this trade. The 328 flour mills, many of them of the most modern type and highest efficiency, have a capacity far in excess of Canada's demands. During 1928 productive capacity reached about 121,000 barrels per day. Since then the industry has been adversely affected by the difficulties which beset the Canadian grain trade and the great decline in the prices of grains. Exports of wheat flour declined from 10,737,266 barrels in 1928 to 3,911,886 barrels in 1938, but in spite of the decrease, Canada continues to be one of the leading exporters of wheat flour.

THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1938.

THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1938.

From the preceding tables it will be noted that in 1938 there were decreases of 25 in the total number of employees, \$11,036,011 in the value of production, \$12,139,537 in the cost of materials used and \$6,169,026 in capital investment, but the salary and wage payments increased to the extent of \$285,595.

Production. - The total value of all products of the two industries in 1938 amounted to \$122,598,168 of which wheat flour was accountable for \$75,419,729. Next in order of importance was chopped grain feed with a total of \$20,875,590 followed by shorts and middlings to the extent of \$6,361,225. Rolled oats takes fourth place with \$6,011,166 whilst bran occupies fifth position with a valuation of \$4,163,358.

Capital. - The capital employed in these industries represented an investment of \$50,111,006 which was divided as follows: fixed capital - consisting of present value of land, buildings, fixtures, machinery, tools, etc., - \$28,687,452 and working capital which comprises inventory value of materials on hand, stocks in process, finished products on hand, etc., \$10,283,008 and cash, bills and accounts receivable \$11,140,546.

Employees, Salaries and Wages. - The administrative and clerical work in connection with the two industries required the services of 1,671 male and 228 female employees whose total salaries amounted to \$2,464,473. The number of wage-earners employed was 3,728 male and 151 female which necessitated a payroll amounting to \$3,698,878.

Cost of Materials. - The total cost of all materials used in both industries, including containers, amounted to \$99,418,794. Wheat of all types was by far the largest contributor to this sum with \$69,507,401. Mixed grain for chopping takes second place with \$13,732,723. The next largest item of expense was that of oats which accounted for \$6,250,040 whilst containers and container materials occupy fourth position with a total cost of \$4,957,112.
