THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1940

To permit a closer analysis of the flour and feed milling industries, this report is divided into three sections. Section 1 comprises a general summary of the industry as a whole. Section 2 deals with the mills whose principal output is flour and other edible cereal products, whilst Section 3 is devoted to the mills whose operations are mostly confined to the production of chopped grain and other feeds.

SECTION 1. - GENERAL SUMMARY

A review of the flour and feed milling industries during the year 1940 reveals the fact that, although there was a decrease of 23 in the number of mills reporting, there was a marked increase in all of the other items comprising the principal statistics. These are shown in Table 1, for the Dominion for the years 1926 to 1938 and by provinces for the years 1939 and 1940.

The decrease in the number of establishments during the past few years is largely due to more extensive distribution services now in force by some of the larger milling companies covering the more sparsely populated areas. This has superseded to a great extent the former system of obtaining flour and other cereal products from the local mills, some of which have consequently discontinued operations.

This industry, which has existed to meet the domestic needs for more than 300 years, is one of the Dominion's oldest manufactures, but it is only within recent times that its progress has become spectacular. The war of 1914-1918 and the demand it created gave a great impetus to this trade. The 279 flour mills, many of them of the most modern type and highest efficiency, have a capacity far in excess of Canada's demands. During 1928 productive capacity reached about 121,000 barrels per day. Since then the industry has been adversely affected by the difficulties which beset the Canadian grain trade and the great decline in the prices of grains. Exports of wheat flour declined from 10,737,266 barrels in 1928 to 3,911,886 barrels in 1938, but in spite of this decrease, Canada continued to be one of the leading exporters of wheat flour. A further impetus was given the industry as a direct result of the large import requirements of Great Britain during the present war. Exports of wheat flour jumped accordingly over 3,000,000 barrels, from 3,911,886 in 1938 to 6,970,902 in 1940.

THE FLOUR AND FEED MILLING INDUSTRIES IN CANADA, 1940.

From the preceding tables it will be noted that in 1940 there were increases of \$20,718,330 in the value of production, \$20,859,119 in the cost of materials used, \$4,244,174 in capital investment, and \$585,871 in salaries and wages paid. There was also an increase of 317 in the number of employees.

Production. - The total value of all products of the two industries in 1940 amounted to \$122,494,759, of which wheat flour was accountable for \$66,925,417. Next in order of importance was chopped grain feed with a total of \$24,324,837 followed by shorts and middlings to the extent of \$8,063,783. Rolled oats takes fourth place with \$6,514,798 whilst bran occupies fifth position with a valuation of \$5,632,145. The output of wheat flour of all grades in 1940 totalled 17,416,229 barrels valued at \$3.84 per barrel. This represents an increase of 1,664,575 in the number of barrels produced and an increase of \$.39 in the selling price per barrel as compared with 1939.

Capital. - The capital employed in these industries represented an investment of \$52,170,492 which was divided as follows: fixed capital - consisting of present value of land, buildings, fixtures, machinery, tools, etc., - \$27,346,254 and working capital which comprises inventory value of materials on hand, stocks in process, finished products on hand, etc., \$18,381,555 and cash, bills and accounts receivable \$6,442,683.

Employees, Salaries and Wages. - The administrative and clerical work in connection with the two industries required the services of 1,692 male and 289 female employees whose total salaries amounted to \$2,676,492. The number of wage-earners employed was 4,095 male and 139 female which necessitated a payroll amounting to \$4,424,875.

Cost of Materials. - The total cost of all materials in both industries, including containers, amounted to \$96,294,284. Wheat of all types was by far the largest contributor to this sum with \$60,302,178. Mixed grain for chopping takes second place with \$15,956,196. The next largest item of expense was that of containers and container materials which accounted for \$6,788,489, whilst oats occupy fourth position with a total cost of \$6,753,114.
