GOVERNMENT OF CANADA

THE FLOUR AND FEED MILLING  
INDUSTRIES, 1950

DOMINION BUREAU OF STATISTICS - DEPARTMENT OF TRADE AND COMMERCE

THE FLOUR AND FEED MILLING INDUSTRIES

1950

*Published by*

Authority of the Rt. Hon. C. D. Howe,  
Minister of Trade and Commerce

Prepared in the General Manufactures Section  
Industry and Merchandising Division,  
Dominion Bureau of Statistics, Ottawa

## NOTICE

The Industry and Merchandising Division of the Bureau of Statistics collects and compiles figures on (a) the primary industries in Canada—mining, forestry and fishing; (b) manufacturing; (c) construction, and (d) merchandising and services.

For the purpose of annual compilation and publication, the manufacturing industries have been classified into major groups, prefaced by two reports of a general nature, as follows:

- I Summary Report on Manufacturing Industries
- II Manufacturing Industries by Geographical Distribution
- III Foods and Beverages
- IV Tobacco and Tobacco Products
- V Rubber Products
- VI Leather Products
- VII Miscellaneous Manufactures
- VIII Textiles
- IX Wood and Paper Products
- X Printing Trades
- XI Operations in the Woods
- XII Iron and Steel Products
- XIII Transportation Equipment
- XIV Non-ferrous Metal Products
- XV Electrical Apparatus
- XVI Non-metallic Mineral Products
- XVII Coke and Gas—Petroleum Refining
- XVIII Chemicals and Allied Products

The present report belongs in Group III, Foods and Beverages. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

- A General Review, 50¢.
- B The Slaughtering and Meat Packing, and Sausage and Sausage Casings Industries, 25¢.
- C The Dairy Factory Industry, 50¢.
- D The Fish Curing and Packing Industry, 25¢.
- E The Fruit and Vegetable Preparations Industry, 35¢.
- F The Flour and Feed Milling Industry, 35¢.
- G The Breakfast Foods Industry, 25¢.
- H The Prepared Stock and Poultry Feeds Industry, 25¢.
- I The Biscuit Industry, 25¢.
- J The Bread and Other Bakery Products Industry, 25¢.
- K The Aerated Waters Industry, 25¢.
- L The Distilled Liquor Industry, 25¢.
- M The Brewing Industry, 25¢.
- N The Wine Industry, 25¢.
- O The Confectionery, Cocoa, Chocolate and Chewing Gum Industries, 25¢.
- P The Sugar Refining Industry, 25¢.
- Q The Macaroni and Kindred Products Industry, 25¢.
- R The Miscellaneous Foods Industry, 25¢.
- S The Canned Foods Summary, 25¢.

# THE FLOUR AND FEED MILLING INDUSTRIES

1950

For analytical purposes, this report of the Flour and Feed Milling Industries has been divided into three sections as follows:

**Section 1.** A general summary combining the data of the Flour Milling Industry and that of the Feed Milling Industry.

**Section 2.** The Flour Milling Industry only. Firms which manufacture principally Flour are classified herein regardless of whether they also produce Prepared Foods or Chopped Grain Feeds as well as carry on the service of custom milling and chopping as a subsidiary operation.

**Section 3.** The Feed Milling Industry only. Firms which principally manufacture Chopped Grain Feeds on a merchant or custom basis are included in this group. It should be noted that firms which produce principally Balanced or Prepared Stock and Poultry Feeds are recorded in a separate industrial report, namely; The Prepared Stock and Poultry Feeds Industry.

In 1950, the statistical treatment of The Flour Milling Industry and that of the Feed Milling Industry changed considerably, primarily in the treatment of custom grinding and custom milling. Up to and including 1949, custom grinding and milling had been converted to a merchant grinding and milling basis. Previously, the volume of custom ground and milled grains were valued at the average cost of merchant grains reported and this value was added to the value of custom grinding receipts. Thus, the Gross Value of Production consisted of the value of grain plus the amount received for the service rendered. In 1950, the method of estimating Gross Value was changed. Only the amount received for service rendered is considered as the Gross Value of Production, no account being taken of the grains used. It should be noted that custom ground grains together with custom receipts for the service rendered are shown separately for each of the Industry Groups in Table 8, page 15 and Table 7, page 19, respectively. By valuing the grains and adding the receipts for custom charges, the Gross Value of Production for 1950 may be made comparable to that of 1949.

## Section 1. General Summary

For the Flour and Feed Milling Industries as a group for 1950, it is seen that the number of mills decreased from 847 in 1949 to 803 in 1950. Twenty-three mills ceased operations during the year and 21 mills were transferred to The Prepared Stock and Poultry Feeds Industry where they were more properly classified. The volume of all the mills transferred amounted to approximately \$3,500,000 in 1949. Because of this transfer together with the change in the method of arriving at Gross Value of Production, all items, comprising Principal Statistics in Table 1, have shown decreases in 1950 when compared directly with 1949. Table 1 includes the historical series for the years 1938 to 1950 and by Provinces for the years 1949 and 1950.

Some of the principal commodities produced show increases in 1950 over 1949. The output of Flour increased to 20,577,134 barrels, 274,961 barrels or 1.4 per. cent more than in 1949. Exports of this commodity increased from 9,698,024 barrels in 1949 to 10,095,002 barrels in 1950. Continuing, the production of bran, shorts and middlings increased by

13,954 tons to 701,533 tons in 1950 and Prepared Stock and Poultry Feeds rose by 101,478 tons in 1950 compared to 1949. However, a decrease of 2,791 tons appeared in the production of Oatmeal and Rolled Oats. Naturally, the large decrease of 671,848 tons in Chopped Grain Feed in 1950 is accounted for largely, by the change in the statistical treatment mentioned above.

The physical volume of production for the Industry as a whole increased 2.2 per. cent. in 1950 compared to 1949. The dollar volume decreased 7.9 per. cent. in the same period when the Gross Value of Production of \$293,762,983 in 1949 declined to \$270,684,540 in 1950. Constructed on the 1949 statistical basis, the 1950 Gross Value of Production would have amounted to \$305,583,545 which includes \$34,899,005, representing the value received for custom chopping and milling converted to a merchant grinding basis. Average comparable prices of the important commodities for the two years under review are shown in the following summary.

Product	Selling Value at Mill	
	1949	1950
	\$	\$
Wheat flour, all grades .....	barrel	9.29
Oatmeal and rolled oats .....	ton	119.27
Bran, shorts and middlings .....	ton	51.70
Feed, chopped .....	ton	56.59
Stock and poultry feeds .....	ton	69.89
		9.22
		157.89
		55.44
		59.74
		76.21

This industry, which has existed to meet the domestic needs for more than 300 years, is one of the Dominion's oldest manufactures, but it is only within recent times that its progress has become spectacular. The 118 flour mills, many of them of the most modern type and highest efficiency, have a capacity far in excess of Canada's demands. The war of 1914-1918 and the demand it created gave a great impetus to this trade.

During 1928 productive capacity reached about 121,000 barrels per day. During the depression the industry had been adversely affected by the difficulties which beset the Canadian grain trade and the great decline in the prices of grains. Exports of wheat flour declined from 10,737,266 barrels in 1928 to 3,911,886 barrels in 1938, but in spite of this decrease, Canada continued to be one of the leading exporters of wheat flour. A further impetus was given to the industry as a direct result of the large import requirements of Great Britain and other allied countries during the last war. Exports of wheat flour to all countries which averaged about 14,000,000 barrels during the war years decreased to 9,698,024 barrels in 1949 but increased to 10,095,002 barrels in 1950. The great demand for Canadian flour in foreign markets during the war years was a great boon to Canadian agriculture, in as much as it enabled flour mills to make available large quantities of mill feeds which otherwise would not have been produced. Farmers were thus enabled to obtain sufficient feeds needed by them in order to fulfill the large commitments made for export shipments of cheese and bacon.

**Production.** The total value of all products of the two industries in 1950 amounted to \$270,684,540 of which wheat flour was accountable for \$189,721,264. Next in order of importance was shorts and middlings with a total of \$23,524,134 followed by bran to the extent of \$15,370,331; chopped grain feed takes fourth place with \$14,020,013 whilst stock and poultry feed occupies fifth position with a valuation of \$12,588,137. The output of wheat flour of all grades in 1950 totalled 20,577,134 barrels valued at \$9.22 per barrel. This represents an increase of 274,961 in the number of barrels produced and a decrease of .07 cents in the selling price per barrel as compared with 1949.

**Employees, Salaries and Wages.** The administrative and clerical work in connection with the two industries required the services of 1514 male and 458 female employees whose total salaries amounted to \$4,522,813. The number of wage-earners employed was 4,254 male and 130 female which necessitated a payroll amounting to \$9,286,182.

**Cost of Materials.** The total cost of all materials in both industries, including containers, amounted to \$233,085,168. Wheat of all types was by far the largest contributor to this sum with \$190,025,934, cost of containers takes second place with \$15,666,869. The next largest item of expence was that of oats which accounted for \$11,822,567 whilst barley occupies fourth position with a total cost of \$6,104,411.

TABLE 1. Principal Statistics for the Years, 1938 to 1950

Year	Estab- lish- ments	Capital Invested	Em- ployees	Salaries and Wages	Cost of Materials Used	Gross Value of Production
