105-48

C166  
D  
1950**NOTICE**

The Industry and Merchandising Division of the Bureau of Statistics collects and compiles figures on (a) the primary industries in Canada—mining, forestry and fishing; (b) manufacturing; (c) construction, and (d) merchandising and services.

For the purpose of annual compilation and publication, the manufacturing industries have been classified into major groups, prefaced by two reports of a general nature, as follows:

- I Summary Report on Manufacturing Industries
- II Manufacturing Industries by Geographical Distribution
- III Foods and Beverages
- IV Tobacco and Tobacco Products
- V Rubber Products
- VI Leather Products
- VII Miscellaneous Manufactures
- VIII Textiles
- IX Wood and Paper Products
- X Printing Trades
- XI Operations in the Woods
- XII Iron and Steel Products
- XIII Transportation Equipment
- XIV Non-ferrous Metal Products
- XV Electrical Apparatus
- XVI Non-metallic Mineral Products
- XVII Coke and Gas—Petroleum Refining
- XVIII Chemicals and Allied Products

The present report belongs in Group VIII, Textiles. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

**A General Review of All Textiles, 50¢.**

**Textiles, Except Clothing**

- B General Review, 25¢.
- C The Cotton Textile Industry, 40¢.
- D The Woollen Textile Industries, 40¢.
- E The Synthetic Textiles and Silk Industry, 25¢.
- F The Narrow Fabrics Industry, 25¢.
- G The Dyeing and Finishing of Textile Goods Industry, 25¢.

**Miscellaneous Textile Products**

- H The Awning, Tent and Sail Industry, 25¢.
- I The Cordage, Rope and Twine Industry, 25¢.
- J The Cotton and Jute Bag Industry, 25¢.
- K The Miscellaneous Textiles Industries, 25¢.

**Clothing**

- L General Review, 25¢.
- M The Men's Factory Clothing Industry, 40¢.
- N The Women's and Children's Factory Clothing Industries, 40¢.
- O The Hosiery, Knitted Goods and Fabric Glove and Mitten Industries, 35¢.
- P The Corset Industry, 25¢.
- Q The Fur Goods and Fur Dressing Industries, 25¢.
- R The Hat and Cap Industry, 25¢.
- S The Miscellaneous Clothing Industries, 25¢.

(18 July 52)

# GENERAL REVIEW OF TEXTILES EXCEPT CLOTHING

1950

The broad textile grouping known as textiles except clothing showed a marked gain of \$104,438,555 or 16.4 per cent in terms of gross value of production in the period under review. The output of this group advanced from \$636,824,130 in 1949 to \$741,262,685 in 1950. The cost of materials increased from \$339,644,950 to \$412,682,853, a rise of 21.5 per cent or \$73,037,903 over the same period. The number of employees showed a 3 per cent gain in 1950 rising to 80,328 from 77,773 the previous year. Salaries and wages were up from \$156,166,554 in 1949 to \$169,175,142 in 1950.

The 16.4 per cent gain recorded by the whole group was an average of varied performances in the component industries. All the industries recorded gains except dyeing and finishing which dropped about 3 per cent and wool cloth which remained at approximately the same level. Wool yarn recorded a gain of over 32 per cent, miscellaneous wool goods nearly 29 per cent and cotton yarn and cloth nearly 22 per cent.

In 1950 there were 846 establishments in textiles except clothing. Of the total gross value of production of \$741,262,685 in the year under review, Quebec accounted for \$408,773,561 or 55 per cent, Ontario accounted for \$289,150,649 or 39 per cent.

## Textile Products Except Clothing Production Index

1949 = 100

(based on gross value of production)

	1950
Total Textile Products Except Clothing.....	116.4
Cotton Textiles .....	121.7
Cotton yarn and cloth.....	121.8
Cotton thread.....	116.8
Miscellaneous cotton goods .....	126.8
Wool Textiles .....	112.7
Wool cloth .....	99.6
Wool yarn .....	132.4
Carpets, mats and rugs .....	105.9
Miscellaneous wool goods.....	128.8
Synthetic Textiles and Silk.....	118.5
Dyeing and Finishing of Textile Goods .....	96.8
Narrow Fabrics .....	114.7
Miscellaneous Textile Products.....	110.8
Awnings, tents and sails.....	101.8
Bags, cotton and jute.....	119.1
Cordage, rope and twine .....	103.2
Oilcloth, linoleum and other coated fabrics .....	107.5
Automobile accessories, fabric .....	101.4
Embroidery, pleating, hemstitching, etc. ....	105.7
Miscellaneous textiles, n.e.s. ....	116.7

In terms of industrial grouping, cotton textiles accounted for \$276,595,397 or 37 per cent of total output, wool textiles \$157,359,345 or 21 per cent and synthetic textiles and silk \$147,047,995 or 20 per cent. The total employment bill of \$169,175,142 was divided into \$36,538,786 for salaried employees and \$132,636,356 for wage-earners. The number of wage-earners averaged 69,481 of which 43,228 were male and 26,253 female.

For the textile industry, generally, the year 1950 was divided into two definite parts by the defence emergency. In the first half the industry was worried over an uncertain domestic market and increased imports but in the last part of the year the major problem was that of obtaining adequate supplies of raw materials. Scarcities which developed were particularly evident in the field of synthetics but were by no means confined here, as wool was in short supply and cotton was far from being plentiful. In 1950 capital and repair expenditures amounted to \$46,800,000 of which \$27,400,000 comprised new investment and \$19,400,000 repair and maintenance. New investment was divided into \$6,600,000 for construction and \$20,800,000 for machinery and equipment. New investment was heaviest in cotton yarn and cloth amounting to \$10,435,000 and silk and synthetic textiles involving \$9,230,000.

The broad forces influencing the group generally must be supplemented by a brief picture of each specific industry to present a balanced appraisal. In the cotton textile industries production was up from \$227,251,790 in 1949 to \$276,595,397 in 1950. At the same time employment was up from 26,661 to 28,430. The principal factors affecting the cotton supply position were twofold, first the restriction of cotton acreage by the United States Government which led to an inadequate crop and secondly the tremendous demand for goods which to such a large extent has been stimulated by the Korean War. Market demand which declined during the first half of the year, later broadened in anticipation of price increases and military requirements. Reflecting this expansion of mill activity, raw cotton consumption in the calendar year 1950 was at an all-time high level for the post-war period. At the end of the year the industry was operating at capacity with plant expansion continuing and with production, employment and wages at record post-war levels.

The wool industry as a whole did not move forward as readily as the cotton industry and while there were advances in wool yarn, wool cloth continued the slight downward trend that had been evident since 1948. Overall production of the wool group increased from \$139,566,112 in 1949 to \$157,359,345 in 1950 but during the same period employment declined from 17,892 to 17,357. The instability of wool prices was at the root of many difficulties but there was an important upward trend in the last half of 1950 based on the exigencies of defence. At the year's end the situation was one

of a steady volume of output slightly below capacity with new military demand being met and the remainder of production at a level sufficient to meet civilian demand curtailed by record high prices.

The synthetic textiles and silk industry in 1950 established new records with production at \$147,047,995 and employment at 17,955. These figures represented gains of 18 per cent and 7 per cent respectively over the very high levels of the previous year. The reasons lay in the shortage of natural fibres, the current defence emergency, the relative stability of prices and availability of synthetic fibres combined with new achievements in the successful blending of natural and man-made fibres. Developments in Canada were typical of the world picture; consumption of rayon, for example, is up by 50 per cent over the past few years and production of rayon now accounts for approximately one-fifth of total world textile fibres.

The value of production of the narrow fabrics industry rose from \$11,950,068 in 1949 to \$13,703,678 in 1950 but employment dropped by 1.5 per cent. Increases were shown in all the main products of the industry including ribbons, webbing and tapes. The industry continued to supply nearly all the domestic market for narrow fabrics although there were increases in the importation of real and artificial silk ribbons as well as webbing. Of the 42 establishments reporting in this industry in 1950 there were 22 in Quebec and 20 in Ontario. Quebec dominated the industry with 73 per cent of total value of output and 70 per cent of total employees.

The dyeing and finishing of textile goods industry dropped 3 per cent over the year in terms of the value of work performed, \$12,353,630 in 1950 compared with \$12,758,888 in 1949. The cost of materials, however, was up from \$2,606,844 in 1949 to \$2,974,977 in the year under review. The 46 operators in this industry in 1950 include only those establishments whose occupation is primarily the dyeing and finishing of textile goods and exclude manufacturers who operate a dyeing and finishing plant or department in connection with their own manufacturing operations. The value of the industry's output has tripled during World War II, levelled off during peacetime but by the end of 1950 there was a new rush of orders. At this time the industry was in a strong position with the development of plant modernization and the initiation of specialized techniques in the treatment of new types of fabrics.

In 1950 production of the awning, tent and sail industry stood at \$8,741,830 compared with \$8,587,648 in 1949. There were 115 establishments in the industry and Ontario accounted for approximately half the production and employment. The particular items of production showed marked variations in 1950. On the one hand items such as awnings, tents and bags showed increases. On the other hand there were decreases in the production of tarpaulins, sleeping bags and sails.

The value of production of the cordage, rope and twine industry rose from \$16,917,938 in 1949 to \$17,459,571 in 1950 but physical volume was slightly below the previous year. Ontario dominated the industry, accounting for 80.4 per cent of total output and 79.6 per cent of employment. In 1950 there was a very significant increase in the production of baler twine with more than twice as much produced as in the previous year. The production of binder twine showed a decrease but as there was a drastic reduction in exports, the quantity available for Canadian consumption actually increased.

The declining trend in the production of the cotton and jute bag industry was reversed in 1950 with production at \$33,062,539 compared with \$27,754,602 the previous year. Despite foreign political tensions threatening raw material supplies, the industry was able to slightly increase the output of jute bags. At the same time the production of cotton bags was significantly increased and a greater number of used bags were repaired.

The oilcloth, linoleum and coated fabric industry in 1950 operated at a higher level in terms of production, employment and materials consumed. Production stood at \$30,283,848 compared with a 1949 figure of \$28,170,145. There were 15 establishments in the industry in 1950 of which 8 were located in Quebec. Quebec accounted for 73 per cent of the total production and 77 per cent of the employment of the industry.

In 1950 the value of production of the industry designated as embroidery, pleating, hemstitching, etc. stood at \$7,302,217 compared with \$6,910,115 in the previous year. However there was one less establishment in the industry in 1950 and the employment level was lower. Montreal accounted for 71 per cent of the gross value of production of the industry and 74 per cent of the employment. Toronto was responsible for 26 per cent of production and 22 per cent of employment.

In 1950 the value of production of the fabric auto accessories industry was slightly in excess of the value of the previous year, \$6,451,047 compared with \$6,362,064, but employment, wages and cost of materials all showed declines. The industry consisted of 8 establishments of which 5 were in Ontario. Ontario accounted for 81 per cent of the industry's production and 83 per cent of employment.

Production of the residual grouping known as miscellaneous textile goods, n.e.s. rose from \$26,469,346 in 1949 to \$30,901,588 in 1950. The chief items of production, medical and sanitary products, rose from \$8,217,009 in 1949 to \$10,008,160 in the year under review. Of the 135 establishments in the industry in 1950, 73 were in Quebec and 48 in Ontario. In addition there were 7 establishments in Manitoba, 5 in British Columbia, 1 in Alberta and 1 in Nova Scotia.

To avoid duplication and bring together all textile products in a convenient form, the list of products made by the clothing industry and by textiles except clothing will be both found in the Report entitled "General Review of All Textiles."

TABLE 1. Principal Statistics of Textiles Except Clothing, 1945-1948 and by Provinces, 1949 and 1950

Year and Provinces	Estab- lishments	Em- ployees	Salaries and wages	Cost of materials used	Value added by manufacture	Gross value of production
