D  
1951

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: **Volume I**—The Primary Industries, including mining, forestry and fisheries; **Volume II**—Manufacturing; **Volume III**—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I—General Review of the Manufacturing Industries, \$1.50
- II—The Manufacturing Industries, by Provinces
  - Section 1. Principal Statistics of Major Industrial Groups and Leading Industries, 50¢
  - Section 2. Principal Statistics of Individual Industries, 75¢
  - Section 3. Principal Statistics by Regional Distribution, 75¢
- III—Foods and Beverages
- IV—Tobacco and Tobacco Products
- V—Rubber Products
- VI—Leather Products
- VII—Textiles
- VIII—Wood and Paper Products
- IX—Printing Trades
- X—Iron and Steel Products
- XI—Transportation Equipment
- XII—Non-ferrous Metal Products
- XIII—Electrical Apparatus and Supplies
- XIV—Non-metallic Mineral Products
- XV—Products of Petroleum and Coal
- XVI—Chemicals and Allied Products
- XVII—Miscellaneous Manufactures

The present report belongs in Part VII, Textiles. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

- A—General Review of All Textiles, 25¢

#### Textile Mills

- B—General Review, 25¢
- C—The Cotton Textile Industries, 25¢
- D—The Wool Textile Industries, 25¢
- E—The Synthetic Textiles and Silk Industry, 25¢
- F—The Narrow Fabrics Industry, 25¢
- G—The Dyeing and Finishing of Textile Goods Industry, 25¢
- H—The Awning, Tent and Sail Industry, 25¢
- I—The Cordage, Rope and Twine Industry, 25¢
- J—The Cotton and Jute Bag Industry, 25¢
- K—The Miscellaneous Textiles Industries, 25

#### Knitting Mills

- L—The Hosiery and Knitted Goods Industries, 25¢

#### Clothing

- M—General Review, 25¢
- N—The Men's Factory Clothing Industry, 25¢
- O—The Women's and Children's Factory Clothing Industries, 25¢
- P—The Corset Industry, 25¢
- Q—The Fur Goods and Fur Dressing Industries, 25¢
- R—The Hat and Cap Industry, 25¢
- S—The Miscellaneous Clothing Industries, 25¢

## GENERAL REVIEW OF TEXTILES EXCEPT CLOTHING

1951

In terms of gross value of production the broad textile grouping known as textiles except clothing showed marked advances with only one small industry failing to gain. Total output of the group advanced from \$741,262,685 in 1950 to \$846,477,303 in 1951, an increase of \$105,214,618 or 14.2 per cent. There was an increase in the cost of materials from \$412,682,853 to \$495,304,102 over the same period, representing a rise of 20 per cent or \$82,621,249.

The accompanying table suggests that total gross value of production of textile products except clothing moved steadily forward from 1949 to 1951. The production index moved from 116.4 in 1950 to 132.9 in 1951. There were gains in all groups with the exception of oilcloth, linoleum and other coated fabrics which fell from 107.5 to 104.3. In the year under review the index of cotton textiles moved from 121.7 to 130.8, wool from 112.7 to 137.7 and synthetic textiles and silk from 118.5 to 134.2.

In 1951 there were 892 establishments in textiles except clothing. Of the total gross value of production of \$846,477,303 in the year under review, Quebec accounted for \$456,085,491 or 53.9 per cent. Ontario accounted for \$337,792,692 or 39.9 per cent. By industrial groups, cotton textiles accounted for \$297,285,085 or 35.1 per cent of total output, wool textiles \$192,217,597 or 22.7 per cent and synthetic textiles and silk for \$166,549,897 or 19.7 per cent.

In order to have a balanced picture of the group as a whole it is necessary to review briefly each specific industry. In the cotton textiles industry the year 1951 was broken into two contrasting halves. During the first six months under the impetus of large civilian orders and defence requirements a high level of activity was maintained. In the latter part of the year complications growing out of excess inventories and the disturbance of foreign and domestic markets had a depressing effect on the output of this industry. Production at \$297,285,085 in 1951 represented a monetary increase of \$20,689,688 or 7.5 per cent of the \$276,595,397 reported in 1950. However there have been marked variations in the movements of values and physical outputs of cotton goods. Average employment in the cotton textile industries rose from 28,430 in 1950 to 29,191 in 1951 and salaries and wages were up from \$58,481,457 to \$62,549,605 over the two years.

While the gross value of production of the wool textile group rose from \$157,359,345 in 1950 to \$192,217,597 in 1951, it is estimated that in the same period the actual volume of production showed a nine per cent decline from 159.5 per cent to 144.8 per cent of the 1935-1939 average. The drop in production was the result of violent raw material price

changes, the continual curtailment of demand for civilian goods and the depressed conditions in the secondary trades. Defence orders were an important aid to the industry. The gross value of production of the wool textiles industries in 1951 amounted to \$192,217,597, an increase of \$34,858,252 or 22 per cent in comparison with the previous year. The 17,054 persons employed represented a decrease of 303 and salaries and wages paid, \$38,616,342 were greater by \$2,573,909. The sum of \$126,451,729 was expended on materials this being \$32,202,302 or 34 per cent more than the value of materials consumed in the previous year.

The gross value of production of the synthetic textiles and silk industry rose from \$147,047,995 in 1950 to \$166,549,897 in 1951, a value increase of \$19,501,902 or 13 per cent. Activity in 1951 was very uneven for the industry. Highly favourable conditions in the first half led to high mill fabric shipments. But in the third quarter shipments fell off with a further deterioration in the final period.

Textile Products Except Clothing  
Production Index

1949 = 100

(based on gross value of production)

	1950	1951
Total Textile Products Except Clothing..	116.4	132.9
Cotton Textiles.....	121.7	130.8
Cotton yarn and cloth.....	121.8	129.4
Cotton thread.....	116.8	123.3
Miscellaneous cotton goods .....	126.8	182.9
Wool Textiles .....	112.7	137.7
Wool cloth .....	99.6	132.4
Wool yarn .....	132.4	146.7
Carpets, mats and rugs .....	105.9	111.6
Miscellaneous wool goods.....	128.8	156.3
Synthetic Textiles and Silk.....	118.5	134.2
Dyeing and Finishing of Textile Goods ..	96.8	110.7
Narrow Fabrics .....	114.7	141.5
Miscellaneous Textile Products.....	110.8	131.5
Awnings, tents and sails.....	101.8	129.7
Bags, cotton and jute.....	119.1	139.5
Cordage, rope and twine .....	103.2	175.6
Oilcloth, linoleum and other coated fabrics .....	107.5	104.3
Automobile accessories, fabric .....	101.4	107.6
Embroidery, pleating, hemstitching, etc.	105.7	116.1
Miscellaneous textiles, n.e.s. ....	116.7	134.3

While overall employment in the industry was 17,997 in 1951 compared with 17,955 the previous year, the monthly employment of wage-earners fell from 15,480 in April to 13,136 in December. Salaries and wages were up from \$40,111,600 in 1950 to \$44,693,738 in 1951, a rise of 11 per cent. The industry's cost of materials was up by 19 per cent in 1951, rising to \$66,040,725 from \$55,518,508 in 1950.

In 1951 the narrow fabrics industry operated at a higher level in terms of number of establishments, employment and value of production but employment fell steadily from March to the end of the year. The industry's annual output rose in value from \$13,703,678 in 1950 to \$16,907,298 in 1951, an increase of \$3,203,620 or 23 per cent. Employment in the industry rose from 2,058 in 1950 to 2,202 in 1951. In terms of production Quebec dominated with 67 per cent of the total value of output and 65 per cent of the total employees.

While the value of the work performed by the dyeing and finishing of textile goods industry rose from \$12,353,630 in 1950 to \$14,129,896 in 1951, the industry was not without its own problems as well as being subject to the general difficulties of the textile group. It must be kept in mind that the dyeing and finishing of textile goods industry includes only those establishments whose occupation is primarily the dyeing and finishing of such goods and does not include manufacturers who operate a dyeing and finishing plant in connection with their own manufacturing operations. The increased value of work performed in 1951 was accompanied by a cost of materials of \$3,492,222 or \$517,245 more than the cost of \$2,974,977 reported in 1950. Employment in 1951 was 2,462 compared with 2,459 in the previous year.

The awning, tent and sail industry showed an increase in the value of production from \$8,741,830 in 1950 to \$11,146,221 in 1951 a gain of \$2,404,391 or 27.5 per cent. There were increases in value for nearly all the major items of production with the exception of awnings. Materials used by the industry were valued at \$6,627,662 in 1951 compared with \$5,072,890 in 1950, an increase of 30.6 per cent. Employment in the industry stood at 1,547 in 1951 compared with 1,429 in 1950.

The cordage, rope and twine industry operated at a higher level in 1951 than in 1950. Output increased from \$17,459,571 in 1950 to \$29,709,244 in the year under review. Much of this increase, however, was due to higher valuation. The wholesale price of binder twine, for example, rose from \$21,399 per cwt. in 1950 to \$27,628 per cwt. in 1951. The industry's gross value of production of \$29,709,244 in 1951 was accompanied by a cost of materials of \$19,736,188. These figures compared with a production of \$17,459,571 and cost of materials of \$10,989,236 in the previous year. Employment rose from 1,370 in 1950 to 1,774 in 1951.

The gross value of production in the cotton and jute bag industry rose from \$33,062,539 in 1950 to \$38,729,194 in 1951, a gain of 17 per cent. However, the actual physical level of various products showed marked differences. For example cotton bags showed an increase from 4,006,448 dozen valued at \$11,909,342 in 1950 to 4,154,319 dozen worth \$14,772,234 in 1951. At the same time jute bags declined from 5,332,798 dozen valued at \$16,894,543 to 4,225,605 dozen in 1951 valued at \$18,247,122. Materials were up from \$28,031,738 in 1950 to \$33,916,959 in 1951, an increase of 21 per cent. Employment was provided for 1,312 employees compared with 1,267 the previous year.

Because of a slightly smaller output of floor covering and table linoleum, the oilcloth, linoleum and coated fabrics industry operated at a lower level in terms of value of production in 1951. Production by the industry at \$29,381,734 was \$902,114 or 3 per cent lower than the \$30,283,848 reported in 1950. Cost of materials rose slightly from \$16,618,156 in 1950 to \$16,727,708 in 1951. Employment was up from 2,351 in 1950 to 2,379 in the year under review.

In 1951 the value of production of the industry designated as embroidery, pleating, hemstitching, etc. stood at \$8,021,248 an increase of 10 per cent over the \$7,302,217 reported in 1950. Employment increased from 1,639 to 1,664 over the two years. Montreal accounted for 69 per cent of the gross value of production and 75 per cent of the employment of the industry, Toronto was responsible for 28 per cent of the production and 21 per cent of the employment.

There was slightly lower employment in the auto accessories, fabric, industry for 1951 but the gross value of production and the value of materials used were at higher levels. The 1951 value of output at \$6,843,973 exceeded the 1950 total of \$6,451,047 by \$392,926 or 6 per cent. Employment declined by 32 from 726 in 1950 to 694 in 1951. Ontario accounted for 82 per cent of the industry's production and 82 per cent of employment.

Production of the residual textile grouping rose from \$30,901,588 in 1950 to \$35,555,916 in 1951, a gain of \$4,654,328 or 15 per cent. However, the chief items of production, medical and sanitary products, fell from \$10,008,160 in 1950 to \$9,853,576 in the year under review. Cost of materials rose from \$18,894,697 in 1950 to \$21,524,966 in 1951. Employment was up from 3,287 in 1950 to 3,434 in 1951.

To avoid duplication and bring together all textile products in a convenient form the list of products made by the clothing industry and by textiles except clothing will both be found in the report entitled "General Review of All Textiles."

TABLE 1. Principal Statistics of Textiles Except Clothing, 1945-1949 and by Provinces, 1950 and 1951

Year and Provinces	Estab- lishments	Em- ployees	Salaries and wages	Cost of materials used	Value added by manufacture	Gross value of production
