PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the Textile Mills Major Group are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

65-007	Trade of Canada - Imports (M)	per year 7.50

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Information Services Division, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- ^P preliminary figures.
- ^R revised figures.

EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1959 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1959 are as follows:

Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or

plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

Inventories

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

Value Added by Manufacturing

Figures are computed from value of shipments plus or minus changes in inventories of finished goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.¹

Standard Industrial Classification

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

Short Forms

Between 1949 and 1957, in an effort to ease the reporting burden for smaller firms, a short form was used asking for the total value of shipments only or, in a few cases where losses of detail were significant, for quantities and values of principal products. For purposes of publication, missing data were estimated on the basis of appropriate ratios. In general the cut-off point for these short forms was set at \$50,000 value of shipments. About 40% of the total number of establishments reported on the short form and accounted for less than 3 per cent of the total value of shipments.

In 1958, in order to establish a new base year, the small firms were asked to report all items of principal statistics together with some detail on materials and products.

¹ To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

For the 1959 Census, the short form was used again, but further steps were taken to ease the respondents' burden. First, the general limit for short forms was raised to \$100,000 value of shipments. In addition, a new intermediate form was developed. This form is a shortened version of the long form in that most of the general questions were pared down and the detailed lists of materials and products were limited to the more important items. The general limits for firms in this category were set at between \$100,000-\$500,000 value of shipments, but in the case of both the short and intermediate forms there were lower cut-offs for a number of industries in which the smaller firms accounted for a larger share of total shipments. On the other hand, limits were raised where this could be done without a significant loss of coverage. On most of the short forms for 1959, in addition to total value of shipments, data on principal products were requested. In a few industries, where loss of employment and earnings data were considered too large because of higher cut-offs, a question on total payroll was placed on the short form.

The intermediate and long forms provide complete data for the compilation of all elements of principal industry statistics and the details of materials and products. The one-page short form, although containing data on principal products and total value of shipments, does not request information on other elements of principal statistics such as value of inventories, materials, fuel and electricity and, in most cases, employment and salaries and wages, nor does it contain detailed data on volume and value of materials used. For purposes of compiling aggregates of principal statistics by industry and by geographic location, the missing data for each establishment were estimated for 1959 by using, in general, ratios based on the change in the value of shipments between 1958 and 1959. The proportion of the estimated data was generally less than 5 per cent of the total in each category of principal statistics.

The general request for the principal items of products on the short form for 1959 permitted a fairly complete compilation of the detailed quantities and values of commodity shipments. In the case of the detailed quantities and values of materials, fuel and electricity, however, and the monthly distribution of production workers, only the totals of data actually reported on the intermediate and long forms are contained in published reports and no attempt was made as in past years to estimate the generally small proportion of individual totals represented by detailed items omitted from the short forms.

The new approach has relieved an additional 12,000 establishments from filling out the regular long form. Establishments now receiving the short form number in excess of 20,000 and account for more than 54 per cent of the total number of establishments and a little more than 3 per cent of the total value of shipments.

GENERAL REVIEW OF TEXTILE MILLS 1959

The value of factory shipments from the Textile Mills of Canada in 1959 increased by 8.6 per cent to \$802,517,086 from the 1958 total of \$738,690,714. Employment increased slightly, being 63,579 compared to 63,472 in the previous year. Materials used in manufacture cost \$429,640,871, which was 8.9 per cent greater than the 1958 figure of \$394,621,103. Salaries and wages paid in 1959 at \$202,903,500 were 5.0 per cent higher than the payroll of \$193,327,948 reported in 1958.

All six sections in this industrial group reported shipping a greater value of products in 1959. The figures for these, with the 1958 totals and percentage increases in brackets, were: Cotton Textiles \$237,526,262 (\$229,928,660 and 3.3 per cent increase); Woollen Textiles \$114,721,127 (\$102,151,670 and 12.3 per cent); Synthetic Textiles \$207,061,266 (\$177,213,641 and 16.8 per cent); Dyeing and Finishing of Textiles \$17,002,454 (\$15,955,090 and 6.6 per cent); Narrow Fabrics \$20,398,547 (\$19,480,056 and 4.7 per cent); and Miscellaneous Textile Products \$205,807,430 (\$193,961,597 and 6.1 per cent).

Inventories held by the whole group on December 31st, 1959, were 3.4 per cent higher than at the same date in 1958; the actual figures were \$187,656,508 and \$181,536,550 respectively. Holdings by months and year-end breakdowns for 1958 and 1959 are shown in Tables 13 and 14.

The indexes shown in detail in Table 12 reveal a marked drop during 1959 in the average wholesale price of domestic raw wool and minor drops in the price of cotton fabrics, miscellaneous fibres and products, and wool cloth. Minor price increases also occurred, but the general trend was downward as reflected in the overall index.

Reports were received from 879 establishments in 1959; 3 in Newfoundland; 3 in Prince Edward

Island; 10 in Nova Scotia; 14 in New Brunswick; 394 in Quebec; 365 in Ontario; 29 in Manitoba; 7 in Saskatchewan; 15 in Alberta; and 39 in British Columbia. The textile group, as usual, was dominated by Quebec and Ontario, the former accounting for \$432,997,669 or 54.0 per cent, and the latter for \$331,829,092 or 41.3 per cent of the total \$802,517,086 worth of products shipped during 1959. The Quebec mills reported 36,459 employees, those of Ontario 24,282 workers, or 57.3 and 38.2 per cent, respectively, of the total employment within the group under review.

In Quebec, the Cotton Yarn and Cloth Industry once more was foremost with factory shipments worth \$148,912,331 in 1959. The other leading textile industries were: Synthetic Textiles and Silk, \$103,244,964; Oilcloth, Linoleum and Other Coated Fabrics, \$31,533,783; Miscellaneous Textiles, n.e.s., \$28,522,142; and Woollen Cloth, \$24,450,871.

In Ontario, the highest value for factory shipments was reported by the Synthetic Textiles and Silk Industry with sales amounting to \$98,884,569. Cotton Yarn and Cloth, was again second with factory sales of \$62,539,750; followed by Woollen Yarn, \$26,159,700; and Miscellaneous Textiles, n.e.s., \$20,570,909.

In the Prairie Provinces, the Cotton and Jute Bags Industry led the way with factory shipments in 1959 of \$8,825,922. British Columbia's Awnings, Tents and Sails Industry was the leading textile industry in that province with sales f.o.b. factory of \$2,366,267.

A principal feature of this report is a detailed list of textile products, clothing excepted, shipped by manufacturers in 1958 and 1959. Table 15 shows total factory shipments and hence includes all such commodities reported by all firms, no matter what their industrial classification.

GENERAL REVIEW OF TEXTILE MILLS

Alberta	15	815	2,605,948	119,967	5,274,426	4,163,059	9,847,130

¹ Beginning with 1953 the "Value of factory shipments" has been collected instead of the "Gross value of production".

² Based on Standard Industrial Classification.

³ Because of insufficient inventory data in 1953 this figure has been calculated from value of factory shipments and is therefore, only approximate to true "Value added by manufacture".

TABLE 2. Comparison of Principal Statistics of Textile Mills, 1958 and 1959

TABLE 7. Production Workers, by months, 1959

Months	Establishments reporting monthly detail (long forms) ¹		Establishments reporting quarterly detail (intermediate forms) ¹	
	Male	Female	Male	Female
January	31,269	15,770		
February	31,422	15,857		
March	31,582	15,837	1,188	1,105
April	31,595	15,855		
May	31,891	15,988		
June	32,076	15,961	1,249	1,174
July	31,311	15,320		
August	31,520	15,643		
September	31,704	15,818	1,269	1,151
October	30,215	15,424		
November	29,748	15,177		
December	29,723	14,563	1,196	1,080
Average for establishments reporting monthly detail			31,185	15,614
Average for establishments reporting quarterly detail			1,229	1,137
Average estimated for small establishments (Short forms) ¹			668	705
Average for all establishments			33,082	17,456

¹ The type of form used by industry, based on the value of shipments by size groups, is given below:

Industry	Value of shipments size groups and type of form		
	Short form	Intermediate form	Long form
Cotton textiles:	Less than	From - to	More than
Cotton yarn and cloth	\$500,000	—	\$500,000
Cotton thread	300,000	—	300,000
Miscellaneous cotton goods	200,000	—	200,000
Woollen textiles:			
Woollen cloth	100,000	\$100,000 - 500,000	500,000
Woollen yarn	200,000	—	200,000
Miscellaneous woollen goods	100,000	100,000 - 500,000	500,000
Synthetic textiles and silk	500,000	—	500,000
Dyeing and finishing of textile goods	100,000	100,000 - 200,000	200,000
Narrow fabrics	100,000	100,000 - 300,000	300,000
Miscellaneous textile products:			
Awnings, tents and sails	25,000	25,000 - 100,000	100,000
Bags, cotton and jute	300,000	—	300,000
Cordage, rope and twine	200,000	—	200,000
Carpets, mats, and rugs	200,000	—	200,000
Oilcloth, linoleum and other coated fabrics	500,000	—	500,000
Automobile accessories, fabric	200,000	—	200,000
Embroidery, pleating, hemstitching, etc.	15,000	15,000 - 50,000	50,000
Miscellaneous textiles, n.e.s.	50,000	50,000 - 200,000	200,000

GENERAL REVIEW OF TEXTILE MILLS

TABLE 8A. Capital and Repair Expenditures, 1926-59

Year	Capital expenditures			Repair expenditures			Total
