Vol. 2-Part VII-B-1

NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes, as follows: Volume I — The Primary Industries, including mining, forestry and fisheries; Volume II — Manufacturing; Volume III — Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

I - General Review of the Manufacturing Industries, \$1.50

II - The Manufacturing Industries of Canada, (7 sections, as follows:)

Section A. Summary for Canada, 25¢

Section B. Atlantic Provinces, 50¢

Section C. Quebec, 25¢

Section D. Ontarlo, 25¢

Section E. Prairie Provinces, 40¢

Section F. British Columbia, 25¢

Section G. The Manufacturing Industries of Canada, Regional Distribution, 75¢

III - Foods and Beverages

IV - Tobacco and Tobacco Products

V - Rubber Products

VI - Leather Products

VII - Textile Mills

VIII - Knitting Mills

IX - Clothing

X - Wood and Paper Products

XI - Printing Trades

XII - Iron and Steel Products

XIII - Transportation Equipment

XIV - Non-ferrous Metal Products

XV - Electrical Apparatus and Supplies

XVI - Non-metallic Mineral Products

XVII - Products of Petroleum and Coal

XVIII - Chemicals and Allied Products

XIX - Miscellaneous Manufactures

The present report belongs in Part VII, Textile Mills. It is punched to permit of filing in a ring binder along with others of the group. The reports in this group are:

A - General Review, 25¢

B - The Cotton Textile Industries, 25¢

C - The Wool Textile Industries, 25¢

D - The Synthetic Textiles and Silk Industry, 25¢

E - The Narrow Fabrics Industry, 25¢

F - The Dyeing and Finishing of Textile Goods Industry, 25¢

G - The Awning, Tent and Sail Industry, 25¢

H - The Cordage, Rope and Twine Industry, 25¢

I - The Cotton and Jute Bag Industry, 25¢

J - The Miscellaneous Textiles Industries, 25¢

THE COTTON TEXTILE INDUSTRIES 1955

The first section of this report presents the statistics of the cotton group as a whole. The three other sections which follow deal separately with the industries covered by it, namely, the cotton yarn and cloth industry, the cotton thread industry and the miscellaneous cotton goods industry. The developments within these industries are noted in their respective sections and a list of firms reporting to each industry will be found at the end of the report.

The statistics of the report indicate a very definite improvement in the level of operations of the cotton textile industries in 1955 over 1954. The upswing from the very low levels of 1954 which began in the latter part of that year continued throughout the first quarter of 1955 and gave promise of a better year than actually occurred. Activity levelled off in the second quarter, fell somewhat in the third and then expanded considerably towards the end of the year. The final quarter proved to be the most active three-month period for some time and was largely responsible for the improved 1955 situation. The pattern of activity during the year under review is clearly discernible in the following table of cotton bale openings, a most reliable indicator of conditions within the industry.

Cotton Bale Openings

	1953	1954	1955
January February March	33,769	21,884	27,796
	33,023	25,249	31,222
	32,971	32,637	35,794
April	35,852	24,956	30,924
	29,735	25,076	33,239
	28,494	23,006	31,812
July	23,545	18,903	20,021
	22,906	25,166	32,082
	32,243	30,953	34,283
October November December	26,781	28,047	33,344
	26,783	29,000	35,351
	24,991	31,951	32,898
Total	351,093	316,828	378,766

Factory shipments by the cotton textile industries in 1955 valued f.o.b. plant were worth \$248,045,328. This amount represents an increase of 17.3 per cent over the \$211,414,622 worth of goods shipped in the previous year. Taking into account an increase during the year of \$1,564,171

in the finished goods inventory at the plants and plant warehouses of the group, the value of production in 1955 amounted to \$249,609,499 as against \$210,495,260 in 1954, a rise of 18.6 per cent. The improvement in production resulted in a steady increase in employment throughout the year with the average monthly employment growing by 8.1 per cent to 23,098 from 21,359 a year earlier. Employees' earnings increased by 12.9 per cent to \$60,486,012 from \$53,552,743. Materials consumed in manufacture cost \$159,702,054 in 1955 compared with \$128,381,978 in 1954, an increase of 24.4 per cent.

All three cotton industries shared in the improvement enjoyed by the group in 1955. Substantial increases over the previous year were reported by all in the value of factory shipments which were, with 1954 figures in brackets, as follows: cotton yarn and cloth \$248,045,328 (\$211,414,622); cotton thread \$9,861,968 (\$9,166,618); miscellaneous cotton goods \$8,499,301 (\$7,556,873). The only important advance in employment was made by the cotton yarn and cloth industry where the number of employees rose from 19,865 in 1954 to 21,537 in 1955.

Substantial gains were recorded for shipments of all main groups of products. Shipments of broadwoven fabrics totalled 439,684,077 yards worth \$132,798,556 compared with 367,281,213 yards worth \$112,615,068 in 1954. Sales yarn was shipped to the extent of 52,310,596 pounds valued at \$39,030,816 and thread shipments had a value of \$9,862,679. Corresponding figures for 1954 were 44,233,939 pounds of sales yarn worth \$31,839,038 and thread shipments worth \$9,207,597. Deliveries of woven tire fabrics amounted to 30,896,266 pounds with a value of \$25,776,150 as against 26,981,597 pounds with a value of \$22,274,686 in the previous year. Details of other commodity shipments by the cotton group will be found in Table 4.

The prices of cotton yarns and cotton fabrics strengthened somewhat in the year under review. The index averages for the two items which stood at 225.2 and 230.1, respectively, in 1954 rose to 237.7 and 233.0 in 1955. These increases were chiefly the result of higher raw cotton prices the index for which rose from 288.6 to 298.1 over the two years.

The cotton textile group of industries was comprised of 76 establishments in 1955, three less than the year before. Fifty were cotton yarn and cloth pro-

ducers, 11 were cotton thread manufacturers and 15 were classified to the miscellaneous cotton goods industry. The establishments were distributed provincially as follows: Nova Scotia 1, New Brunswick 1, Quebec 36, Ontario 35 and British Columbia 3.

Raw cotton is the industry's principal material. According to the Census of Industry returns submitted by the cotton textile manufacturers, the consumption of this item in 1955 was considerably higher than in 1954 being 177,445,571 pounds costing \$62,160,032 and 151,863,807 pounds costing \$52,675,024, respectively, in the two years. Purchased yarns of all kinds cost \$36,494,348, up from \$31,421,203 the previous year. The cost of dyes, bleaches, chemicals, etc. was reported at \$5,607,416 compared with \$4,661,922 in 1954.

Imports of cotton and its products (wearing apparel excluded) were valued at \$138,480,204 in 1955 compared with \$122,093,034 in 1954. More than half of this \$16 million increase was accounted for by raw cotton importations which rose to 176,212,107 pounds worth \$61,030,626 from 152,583,994 pounds worth \$52,441,017 in the earlier year. The second largest increase was recorded by "Woven fabrics, cotton printed, dyed or coloured, n.o.p., valued at more than 80 cents per pound" with an advance to 20,216,011 pounds valued at \$29,662,416 from 17,363,917 pounds valued at \$25,241,679. A sizable increase occurred, too, in the imports of "Woven fabrics, cotton, not bleached, mercerized nor coloured, n.o.p." with 12,739,192 pounds worth \$8,492,913 being imported in 1955 as against 10,723,876 pounds worth \$6,684,060 in 1954. Exports also increased, after three years of continuous decline. A total of

\$2,418,078 worth of cotton products, wearing apparel excluded, was exported in the year under review compared with a total of \$1,811,519 worth the previous year. Additional details of imports and exports are available from Tables 7 and 8 of this report.

Following several years of curtailed investment in the cotton textile industry, capital expenditure rose sharply in 1955. Most of the expenditure was for modernization of plants with a view to ensuring maximum efficiency. For the two industries shown in Table 11, total capital, repair and maintenance expenditures amounted to \$15.9 million compared with \$8.3 million in 1954. Of the 1955 figure \$5.0 million went for construction while \$10.9 million was spent on machinery and equipment.

Beginning with 1954 information on the value of year-end inventory holdings at plant and plant warehouses is being collected as part of the annual Census of Industry. This data was formerly collected by a separate survey. The summarized results for the cotton textile industries for the year under review will be found in Table 3.

Note on 1956—While the Census of Industry survey at the time of preparing this report was only getting underway, data from other sources indicate that the 1956 level of operations was little different from 1955. Cotton bales opened totalled 375,773 in 1956 compared with 378,766 a year earlier, a difference of less than one per cent. Employment as measured by man-hours was practically the same in the two years according to a monthly survey of all firms with 15 or more employees. Based on a monthly sample survey, the value of factory shipments was estimated to have increased to \$255,962,000, up 4.7 per cent from the 1955 figure. A considerable part of this increase is attributable to firmer prices for cotton yarns and cotton fabrics in 1956,

TABLE 1. Location of Mills of Cotton Textile Group of Industries, 1955

Province	Cotton yarn and cloth	Cotton thread	Miscellaneous cotton goods	All cotton textile mills
		Nu	mber	
Canada	50	11	15	76
Nova Scotia	1	_	_	1

Statistics for 1949 and subsequent years are compiled in accordance with Standard Industrial Classification whereas compilations in 1948 and prior years were compiled on "chief component material" classification.
 Beginning with 1953 the value of factory shipments has been collected instead of the gross value of production.
 Because of insufficient inventory data in 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "value added by manufacture".

Note: Profits or losses cannot be estimated from Census figures as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

TABLE 3. Inventories¹, 1955

	Raw materials and supplies	Goods in process	Finished goods of own manufacture	Total
Opening: ²	\$	\$	\$	\$

Closing: Quebec Ontario Other provinces	10, 383, 673 6, 566, 116 505, 919	13, 093, 863 4, 923, 005 140, 011	18, 247, 925 8, 074, 244 361, 555	41,725,461 19,563,365 1,007,485
Canada	17, 455, 708	18, 156, 879	26, 683, 724	62, 296, 311

Book value of all manufacturing inventories held at plant and plant warehouses.
 The opening inventory for 1955 differs from the closing inventory published for 1954, because of the inclusion of new firms and the removal of figures for firms which did not operate during 1955.

TABLE 4. Factory Shipments Made by the Cotton Textile Group of Industries, 1955

^{1.} Figures for 1955 are preliminary

SECTION 2. THE COTTON YARN AND CLOTH INDUSTRY, 1955

A total of \$229,68*,041 worth of goods was anlipped from the factories of Canadian cotton yarn and cloth manufacturers in 1955. This amount represents an increase of 18 per cent over the previous year's total of \$194,691,131. Allowing for an increase during the year of \$1,252,374 in finished goods inventory held at plant and plant warehouses, the value of production in 1955 amounted to \$230,936,415, a rise of 19.3 per cent above the \$193,653,715 worth of production reported in 1954.

Increased activity is indicated in other terms as well. The number of persons employed by the industry rose by 8.4 per cent, from 19,865 in 1954 to 21,537 in 1955, and their earnings by 14.1 per cent, from \$49,447,295 in the earlier year to \$56,411,050 in the later. A 25.5 per cent increase in material costs from \$119,204,720 to \$149,561,429 accompanied the expanded production.

The number and provincial distribution of establishments was the same as the year before. They numbered 50 and were located as follows: Ontario 26, Quebec 21, Nova Scotia 1, New Brunswick 1 and British Columbia 1. Quebec accounted for 64 per cent of both the industry's shipments and its employment.

Factory shipments of broadwoven fabrics, the industry's leading commodity, increased to 439,684,077 lineal yards valued at \$132,798,556 from the 367,281,213 lineal yards worth \$112,615,068 reported in 1954. These fabrics were responsible for 58 per cent of the value of total factory shipments by the industry in both years. In 1955 all cotton broadwoven fabrics were shipped to the extent of 435,342,596 yards having a selling value

at the factory of \$123,938,214. Of this quantity, grey cotton fabrics were responsible for 229,168,347 yards valued at \$54,144,870. These grey fabrics, however, included 138,035,281 yards valued at \$28,614,875 which went to other mills for processing into printed and dyed cotton fabrics, etc. Other cotton broadwoven fabrics consisted of 37,575,547 yards bleached and 95,922,208 yards piece dyed with the remaining 75,749,137 yards being printed, painted, yarn and stock dyed. Other items which went to make up the broadwoven fabric total were rayon fabrics, paper-maker's felts, draperies and upholstering materials.

In 1955 tire fabric shipments amounted to 30,896,266 pounds worth \$25,776,150 as against 26,981,597 pounds worth \$22,274,686 in 1954. Sales yarn shipments were valued at \$38,729,719 compared with \$31,962,968 the previous year.

The industry's main material is raw cotton which was consumed to the extent of 177,414,371 pounds at a cost of \$62,150,632 in 1955 compared with 151,815,871 pounds at a cost of \$52,663,331 in 1954. Purchased cotton yarn consumption amounted to 9,840,553 pounds valued at \$6,173,595 compared with 10,984,563 pounds valued at \$6,853,627 a year earlier. Domestic grey cotton fabrics not made by plant reporting were used to the extent of 138,035,281 yards worth \$28,614,875 and imported grey fabrics consumed totalled 18,158,786 yards worth \$5,115,539.

Further detail of products shipped and materials used is to be found in Tables 15 and 17 of this report.

1. Other provinces include: Ontario, 26 establishments; New Brunswick, 1 establishment; Nova Scotia, 1 establishment; British Columbia, 1 establishment.
2. Beginning with 1953 the value of factory shipments has been collected instead of the gross value of production.
3. Because of insufficient inventory data in 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "value added by manufacture".

Book value of all manufacturing inventories held at plant and plant warehouses.
 Where the opening inventory for 1955 differs from the closing inventory published for 1954 it is because of the inclusion of new firms and the removal of figures for firms which did not operate during 1955.

SECTION 3. THE COTTON THREAD INDUSTRY, 1955

The cotton thread industry is confined to the provinces of Ontario and Quebec. In 1955 there were 3 establishments in the first province and 8 in the second for a total of 11, three less than in the previous year.

Factory shipments by the industry had a value f.o.b. factory of \$9,861,986, a figure 7.6 per cent above the \$9,166,618 worth of products shipped in 1954. Employment was somewhat higher than a year earlier, 939 compared with 867, with salary and wage payments increasing to \$2,274,593 from \$2,155,673. The cost of materials used in manufacture rose to \$5,098,589 in 1955 from \$4,669.465 in 1954.

Thread is the only significant product in the industry and accounts for practically all of the output. Factory shipments of this commodity were valued at \$9,831,699 in 1955 compared with the \$9,156,648 worth produced in 1954.

Cotton and synthetic yarns are the principal materials used. In 1955, 3,162,350 pounds costing \$4,334,391 were consumed as against 2,783,804 pounds at a cost of \$3,956,956 in the previous year.

1. Beginning with 1953 the value of factory shipments has been collected instead of the gross value of production. 2. Because of insufficient inventory data in 1953, this figure has been calculated from value of factory shipments and is, therefore, only an approximation to true "value added by manufacture."

Note: Profits or losses cannot be estimated from Census figures as no data are collected for certain expense items such as interest, rent, depreciation, taxes, insurance, advertising, etc.

TABLE 22. Inventories 1, 1955

SECTION 4. MISCELLANEOUS COTTON GOODS INDUSTRY, 1955

Factory shipments by this third member of the cotton group of industries in 1955 had a value f.o.b. plant of \$8,499,301 which compares with the \$7,556,873 worth of goods shipped by the industry in the previous year. Employment showed a slight decrease over the two years from 627 in 1954 to 622 in 1955 which was accompanied by a fall in salaries and wages paid from \$1,949,775 to \$1,800,369. Materials consumed in manufacture cost \$5,042,036 in 1955 as against \$4,507,793 in 1954.

The industry was comprised of 15 establishments in 1955, the same number as the year before. Seven of these were located in Quebec, 6 in Cntario and 2 in British Columbia. Factory shipments by the Ontario establishments were valued at \$5,219,802 or 61 per cent of the industry's total. They also accounted for 68 per cent of its employment.

Many of the articles produced by this industry cannot be separately specified without divulging information concerning the operation of individual establishments. Batt, batting and wadding, including automobile batts, with shipments valued at \$3,667,172 was the most important commodity.

Cotton felt which was shipped to the value of \$1,241,216 ranked second in importance. Shipments of waste cotton and flock amounted to.\$1,095,460 and wool and other waste to \$563,214. The balance was made up of such items as jute and jute padding, cotton yarn, sisal padding, wipers and rags, and a number of miscellaneous products.

Of the materials used, cotton waste amounted to 21,678,678 pounds valued at \$2,320,006. Cotton and wool waste mixed was consumed to the extent of 8,189,607 pounds valued at \$633,986. Cotton linters consumed were valued at \$219,525 and rags, clippings, millends, etc. at \$365,896. Other materials used consisted of burlap, cheese cloth, felt, sisal, chemicals, etc.

Seven of the fifteen establishments, each with factory shipments in excess of \$500,000, accounted for \$6,929,505 or 82 per cent of total shipments and with 508 employees these same firms also accounted for 82 per cent of total employment. Employment in the industry varied from a high of 608 wage-earners in June to a low of 473 in December.

1. In 1949 the Miscellaneous Cotton Goods Industry was reconstituted in accordance with the Standard Industrial Classification adopted in that year. The new Industry is not comparable with the old.

2. Beginning with 1952 the value of factory shipments has been collected instead of gross value of production.

3. Because of insufficient inventory data in 1952 and 1953 these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "value added by manufacture".

TABLE 27. Inventories 1, 1955

	Raw materials and supplies	Goods in process	Finished goods of own manufacture	Total
	\$	\$	\$	\$
Opening: ²				
Ontario	727, 859	29, 181	145, 877	902, 917

Closing:				
Ontario	907, 975	41,968	158, 205	1, 108, 148
Quebec	240, 120	_	124, 069	364, 189
British Columbia	16, 446		1, 179	17, 625
Canada	1, 164, 541	41, 968	283, 453	1, 489, 962

 Book value of all manufacturing inventories held at plant and plant warehouses.
 Where the opening inventory differs from the closing inventory published for 1954, it is because of the inclusion of new firms and the removal of figures for firms which did not operate during 1955.
