DOMINION BUREAU OF STATISTICS  
GENERAL MANUFACTURES DIVISION  
OTTAWA - CANADA

Dominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.).  
Acting Chief, General Manufactures Division: A. Cohen, B.Com.

THE SILK INDUSTRY IN CANADA, 1933.

The silk industry in Canada is divided into two distinct branches--real silk and artificial silk--but, owing to the fact that the manufacture of the latter is largely concentrated in a few establishments, it is necessary to combine these statistics in order to avoid disclosing individual information. It is also necessary to show production on rather broad lines, and some individual items cannot be shown at all but have to be grouped with others, or under "all other products" if the disclosure of individual figures is to be avoided.

The striking progress made by this industry since the collection of statistics in 1917 is shown in table 1, and we are able to state that the year 1933 saw further improvement, all the principal statistics showing an increase, with the exception of the cost of raw and other materials used which showed a small decrease amounting, however, to only \$62,562. Since 1917 the gross value of production has increased over 959 per cent, capital investment over 1358 per cent, number of employees over 946 per cent, the amount of salaries and wages paid them almost 1564 per cent, the cost of raw and other materials over 931 per cent and the value added by manufacture also increased by about 975 per cent over this period.

In 1933 the gross value of production was \$22,754,969, an increase over the 1932 figures of \$2,890,126 or 14.5 per cent, while the physical volume increased from 392.4 in 1932 to 456.1 in 1933 or 16.2 per cent. The amount of capital investment was \$30,192,870, an increase of \$2,171,458 or 7.8 per cent, employment was furnished to 7,801 salaried employees and wage-earners which was an increase of 765 persons or 10.9 per cent over the number furnished with employment in 1932, while \$6,138,532 was paid out in salaries and wages which represented an increase of \$381,667 or 6.6 per cent. The cost of raw and other materials used, amounting to \$7,795,542, decreased by \$62,562 or .8 per cent, while the value added by manufacture, amounting to \$14,959,427, showed a gain of \$2,952,688 or 24.6 per cent.

The following table illustrates, by provinces, the actual variations in the principal statistics in 1933 as compared with 1932.

Province	Capital Invested	Em- ployees	Salaries and Wages	Cost of Materials Used	Gross Value of Production	Value added by Manufacture
	\$	No.	\$	\$	\$	\$
CANADA.	/ 2,171,458	/ 765	/ 381,667	- 62,562	/ 2,890,126	/ 2,952,688
Quebec . . . .	/ 1,682,851	/ 605	/ 297,913	- 67,073	/ 1,718,623	/ 1,785,696
Ontario . . . .	/ 488,607	/ 160	/ 83,754	/ 4,511	/ 1,171,503	/ 1,166,992

In 1933 reports were received from 29 establishments, an increase of 5 over the number reporting the previous year. The increase occurred in the province of Quebec where 20 establishments were located in comparison with 15 in 1932, the remaining 9 being located in Ontario. These two provinces accounted for all manufacturing

THE SILK INDUSTRY IN CANADA, 1933.

activities in the silk industry. The following table shows the percentage distribution of the principal statistics in the two provinces in 1932 and 1933.

Province	Capital Invested		Em- ployees		Salaries and Wages		Cost of Materials Used		Gross Value of Production		Value added by Manufacture	
	1932	1933	1932	1933	1932	1933	1932	1933	1932	1933	1932	1933

CANADA.	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

The principal items of production in 1933 were fabrics of real silk, artificial silk and real and artificial silk mixed, their combined production in 1933 amounting to 26,425,919 yards worth \$14,289,639 which represented 62.8 per cent of the total value of production. The corresponding figures for 1932 were 21,141,985 yards valued at \$12,586,237 63.3 per cent of the total. The 1933 production of real silk fabrics was 7,406,119 yards with a selling value at the factory of \$4,145,295 or an average price of 56 cents per yard. The corresponding price in 1932 was 63.3 cents per yard. The production of all artificial silk fabrics in 1933 was 13,872,887 yards with a factory selling value of \$6,629,403 or an average price of 47.8 cents per yard, and this 1932 price was 46.7 cents per yard. Real and artificial silk mixtures to the extent of 5,146,913 yards were produced with a selling value of \$3,514,941 or an average price per yard of 68.3 cents, the average price in 1932 being 73.9 cents. The production of real and artificial silk yarns, threads, embroidery, etc., amounted to 4,935,077 pounds worth \$5,203,161 in 1933 as against an output of 5,357,388 pounds valued at \$4,221,060 in 1932.

The principal single item of materials consumed in both 1932 and 1933 was raw silk, and in the latter year this consumption amounted to 1,460,474 pounds costing \$2,579,013. The corresponding consumption in 1932 was 1,709,905 pounds valued at \$3,524,044. Yarns of all kinds were used to the extent of 2,857,425 pounds costing \$2,188,642 and the 1932 figures were 1,259,349 pounds costing \$1,039,174. Chemicals of all kinds and dyes were used to the extent of \$1,953,419 in 1932 and \$1,911,531 in 1933. These items are shown in detail in table 4 of the report.

The amount of capital invested in the industry in 1933, \$30,192,870, showed an increase of \$2,171,458 over 1932. This was fully accounted for in the cash, bills and accounts receivable and prepaid expenses account which increased from \$4,995,065 in 1932 to \$7,288,385 in 1933.

By referring to table 6 it will be observed that the bulk of production, capital investment and employment is accounted for by five and six establishments. In the case of production, five establishments had an output valued at \$15,826,992 or 69.6 per cent of the total value of production. Six establishments supplied \$24,090,892 of the total amount of capital investment or 79.8 per cent of the total, while five establishments furnished employment to 5,184 persons or 66.5 per cent of the total number given employment.

In 1933 the average number of wage-earners showed an increase of 703 over 1932 and 1,461 over 1931. In 1933 December with 7,906 wage-earners was the month of maximum employment, while March with 6,534 was the minimum one. In 1932 September with 6,558 wage-earners was the maximum month, while January with 6,027 was the minimum.

THE SILK INDUSTRY IN CANADA, 1933.

Imports of real and artificial silk and their manufactures showed a further decline in 1933, the value in that year being \$10,053,741 as against a valuation of \$12,638,021 in 1932. Imports of real silk were \$7,280,549 in 1933 and \$9,690,664 in 1932; of artificial silk \$2,773,192 in 1933 and \$2,947,357 in 1932. The United States supplied the largest proportion of real silk articles, our purchases from that country amounting to \$5,117,007 out of a total of \$7,280,549 in 1933 and \$6,122,890 out of a total of \$9,690,664 in 1932. Of artificial silk our largest purchases were made from the United Kingdom, these amounting to \$1,377,115 out of a total of \$2,773,192 in 1933 and \$1,558,345 out of a total of \$2,947,357 in 1932.

Owing to a customs reclassification of manufactures of silk, it is not possible to make an equitable comparison of exports for the years 1932 and 1933. All exports of real and artificial silk manufactures are shown in detail in table 14.
