GENERAL REVIEW OF CLOTHING INDUSTRIES

1958

Published by Authority of
The Honourable Gordon Churchill, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Industry and Merchandising Division

October, 1960
6524-522

Price 50 cents

PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the **Clothing Major Group** are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

A — Annual

Q — Quarterly

M — Monthly

Catalogue number	Title	Price

the Information Services Division, Dominion Bureau of Statistics,
or to the Queen's Printer, Ottawa, Canada.*

EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1958 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1958, are as follows:

Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies

for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

Inventories

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

Value Added by Manufacturing

Figures are computed from value of shipments plus or minus changes in inventories of finished

goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.¹

Standard Industrial Classification

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

Short Forms

Prior to 1949 all manufacturing firms, regardless of size, were required to complete a standard form annually covering all census details, but for later years an effort was made to ease the reporting burden for smaller firms which usually do not maintain regular records in the required detail. A modified or short form was introduced in 1949 asking for the total value of shipments only, or in industries with a large number of small firms, for total value of shipments and quantities and values of a few principal products. Using the ratio of value of shipments in the current year to value of shipments in the base year, 1948, estimates of other census data were made for each plant for inclusion in the regular compilations. In general, the cut-off point for short forms was set at \$50,000 gross value of shipments annually, but there were lower cut-offs for a number of industries in which the small firms accounted for a larger share of total shipments. About 40 per cent of the total number of establishments reported on the modified or short form. They accounted for less than 3 per cent of the total value. In 1958, to establish a new base year, the small firms were again asked to report data on employees, salaries and wages, and other principal statistics together with some detail on material and products.

¹ To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

GENERAL REVIEW OF CLOTHING INDUSTRIES

1958

The clothing manufacturers of Canada enjoyed another good year in 1958, the total value of shipments from their factories, \$748,309,459, being only slightly lower than the record high of \$749,628,477 set in 1957.

Only three of the twelve clothing groups shown in Table 4 reported increased shipments. These were: Women's Factory Clothing, with sales of \$250,457,423 in 1958, a rise of \$5,062,795, or 2.1 per cent, over the 1957 total of \$245,394,628; Children's Factory Clothing, with an increase of \$4,354,196, or 7.1 per cent, from \$61,139,624 in 1957 to \$65,493,820 in 1958; and Women's Clothing Contractors, up by \$369,031, or 4.4 per cent, from \$8,416,634 to \$8,785,665. These gains, however, were not quite big enough to offset the decreases reported by the other nine groups: the Men's Factory Clothing Industry alone dropped \$8,131,761, or 3.0 per cent, from \$272,425,612 in 1957 to \$264,293,851 in 1958.

The commodity breakdown of factory shipments shown in Table 15 includes clothing from all industries. In men's and youth's wear, shipments of suits declined from 1,692,866 in 1957 to 1,675,063 in 1958; those of fine pants and slacks from 3,619,696 to 3,262,401; and those of fine shirts from 759,988 dozen to 626,138 dozen.

In women's wear, blouses, skirts and fur-coats registered declines in 1958. Shipments in this group, with the corresponding 1957 figures in brackets, were: coats 1,578,879 (1,543,494); fur-coats 210,602 (216,276); dresses 12,217,128 (12,194,249); suits 615,301 (611,496); blouses 695,955 dozen (734,306 dozen); and skirts 4,409,507 (4,786,429). Women's seamless nylon hosiery shipments soared from 1,564,231 dozen pairs in 1957 to 2,819,963 dozen pairs in 1958, an increase of 80.3 per cent. On the other hand, plant sales of nylon full-fashioned hosiery dropped from 3,696,387 dozen pairs to 3,072,195 dozen pairs. The total 1958 production of ladies nylon hosiery, 5,892,158 dozen pairs, was 12 per cent higher than the 1957 total of 5,260,618 dozen pairs.

Despite the increase in the dollar volume of shipments by the Children's Factory Clothing groups, there were substantial decreases in all three of the main shipment categories of children's wear in 1958. Shipments of dresses dropped from 4,438,621 in 1957 to 3,469,619 in 1958; those of suits from 129,569 to 112,667; and of coats from 987,207 to 964,572.

Inventories of goods in process and of finished goods held in plants and plant warehouses at the year's end were valued at \$60,353,871. Comparable stocks at the beginning of the year were worth \$61,203,044, or \$849,173 more. Subtraction of the last mentioned sum from the total value of shipments, \$748,309,459, results in an estimated gross value of production of \$747,460,286, which is \$6,929,499, or just less than one per cent lower than the comparable 1957 figure of \$754,389,785.

Employment in the industries declined by 3,374, from 91,114 in 1957 to 87,740 in 1958. Salaries and wages, as may be expected, dropped from

\$218,959,052 in 1957 to \$217,972,885 in the year under review. Over the same period, the total cost of materials used fell from \$398,406,332 to \$389,243,696.

In 1958 reports were received from 2,460 establishments, 90 fewer than in 1957. They were dispersed throughout Canada as follows: Newfoundland 3; Nova Scotia 8; New Brunswick 5; Quebec 1,536; Ontario 671; Manitoba 145; Saskatchewan 8; Alberta 24; and British Columbia 60. Quebec, as always, was the leading province with shipments amounting to \$476,752,105, or 63.7 per cent of the total, and 55,513 employees, or 63.3 per cent of the total number employed. Ontario's clothing firms accounted for shipments worth \$196,457,761 (26.2 per cent) and their employees numbered 23,096 (26.3 per cent).

Principal statistics by economic area, and by industry, are given in Table 5. Again Men's Factory Clothing was the leader in the Atlantic Provinces, although the total value of shipments, \$1,769,225, was 12.2 per cent lower than the 1957 amount of \$2,013,959. Shipments of hats and caps in 1958, at \$759,344, were 17.5 per cent below the previous year's \$920,668.

The leading clothing industry in Quebec was Women's Factory Clothing, with shipments amounting to \$174,733,860. In second place was Men's Factory Clothing, \$143,636,208, followed by Children's Factory Clothing, \$51,439,541 and Fur Goods, \$36,043,358.

In Ontario Men's Factory Clothing led the way, with plant sales worth \$79,501,618 (\$83,363,124 in 1957) followed by Women's Factory Clothing, \$54,840,002 (\$53,614,621 in 1957), Fur Goods \$19,084,164 (\$19,018,641), and Corsets \$13,158,125 (\$12,594,980).

In the Prairie Provinces, Men's Factory Clothing and Women's Factory Clothing were first and second in order of importance, with shipments worth \$34,048,937 and \$15,259,955 respectively. Both were higher in value than the comparable 1957 totals of \$33,996,043 and \$14,149,392.

British Columbia's premier clothing industry, Women's Factory Clothing, reported sales of \$5,511,429, and was closely followed by Men's Factory Clothing at \$5,337,863.

Beginning in 1954, information on the value of year-end inventories at plant and plant warehouses has been collected as part of the Annual Census of Industry. This data was formerly collected by a separate survey. The summarized results for the clothing industries in 1958 will be found in Table 3.

A principal feature of this report is a detailed list of the clothing products shipped by Canadian Manufacturers in 1957 and 1958. Table 15 records total factory shipments and, therefore, includes commodities reported by all firms no matter what their industrial classification.

Table 14C gives details of power installations for these industries for 1958, representing the results of a special survey made every five years.

TABLE 1. Principal Statistics of the Clothing Industries (Textile and Fur), 1945-56 and by Provinces, 1957 and 1958

Alberta	24	1,034	2,587,446	36,563	5,779,046	4,762,962	10,780,849
British Columbia	60	1,442	3,870,053	83,461	5,588,596	5,662,908	11,557,453

¹ Beginning with 1952 the value of factory shipments has been collected instead of the gross value of production.

² Because of insufficient inventory data in 1952 and 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "Value added by manufacture".

TABLE 2. Comparison of Principal Statistics of Clothing Industries (Textile and Fur), 1957 and 1958

Item		1957	1958	+Increase -Decrease

November	122,617	63,039
December	125,703 ¹	50,154

¹ The difference between this figure and the comparable one in Table 13 below is mainly one of method. The monthly figure is obtained by a sample, using a calendar year basis; the annual one includes fiscal year data, where necessary, and is estimated for the smaller firms.

^p Preliminary.

TABLE 13. Inventory in Clothing Industries, Calendar Year End Values, 1957 and 1958¹

Year	Total inventory	Raw materials	Goods in process	Finished products	
				Plant	Warehouse
thousands of dollars					
1957	139,446	76,958	17,438	45,001	49
1958	135,345	74,741	17,067	43,489	48

¹ Data are collected from all manufacturers with an annual gross value of production of over \$50,000 and an estimated adjustment is made to reported totals to allow for firms under this level.

TABLE 14. Monthly Estimates of Sales of Clothing Wholesalers, 1957 and 1958

	1957	1958
thousands of dollars
