Industry and Merchandising Division

January, 1962  
6524-522

Price 30 cents

## PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the **Clothing** Major Group are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

	A — Annual	Q — Quarterly	M — Monthly	
Catalogue number	Title			Price
34-211	General Review of the Clothing Industries (A) .....			.50
34-212	Corset Industry (A) .....			.25

## SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.

## EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1959 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1959 are as follows:

### Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

### Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

### Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

### Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

### Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

### Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

### Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or

plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

### **Inventories**

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

### **Value Added by Manufacturing**

Figures are computed from value of shipments plus or minus changes in inventories of finished goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.<sup>1</sup>

### **Standard Industrial Classification**

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

### **Short Forms**

Between 1949 and 1957, in an effort to ease the reporting burden for smaller firms, a short form was used asking for the total value of shipments only or, in a few cases where losses of detail were significant, for quantities and values of principal products. For purposes of publication, missing data were estimated on the basis of appropriate ratios. In general the cut-off point for these short forms was set at \$50,000 value of shipments. About 40% of the total number of establishments reported on the short form and accounted for less than 3 per cent of the total value of shipments.

In 1958, in order to establish a new base year, the small firms were asked to report all items of principal statistics together with some detail on materials and products.

<sup>1</sup> To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

For the 1959 Census, the short form was used again, but further steps were taken to ease the respondents' burden. First, the general limit for short forms was raised to \$100,000 value of shipments. In addition, a new intermediate form was developed. This form is a shortened version of the long form in that most of the general questions were pared down and the detailed lists of materials and products were limited to the more important items. The general limits for firms in this category were set at between \$100,000-\$500,000 value of shipments, but in the case of both the short and intermediate forms there were lower cut-offs for a number of industries in which the smaller firms accounted for a larger share of total shipments. On the other hand, limits were raised where this could be done without a significant loss of coverage. On most of the short forms for 1959, in addition to total value of shipments, data on principal products were requested. In a few industries, where loss of employment and earnings data were considered too large because of higher cut-offs, a question on total payroll was placed on the short form.

The intermediate and long forms provide complete data for the compilation of all elements of principal industry statistics and the details of materials and products. The one-page short form, although containing data on principal products and total value of shipments, does not request information on other elements of principal statistics such as value of inventories, materials, fuel and electricity and, in most cases, employment and salaries and wages, nor does it contain detailed data on volume and value of materials used. For purposes of compiling aggregates of principal statistics by industry and by geographic location, the missing data for each establishment were estimated for 1959 by using, in general, ratios based on the change in the value of shipments between 1958 and 1959. The proportion of the estimated data was generally less than 5 per cent of the total in each category of principal statistics.

The general request for the principal items of products on the short form for 1959 permitted a fairly complete compilation of the detailed quantities and values of commodity shipments. In the case of the detailed quantities and values of materials, fuel and electricity, however, and the monthly distribution of production workers, only the totals of data actually reported on the intermediate and long forms are contained in published reports and no attempt was made as in past years to estimate the generally small proportion of individual totals represented by detailed items omitted from the short forms.

The new approach has relieved an additional 12,000 establishments from filling out the regular long form. Establishments now receiving the short form number in excess of 20,000 and account for more than 54 per cent of the total number of establishments and a little more than 3 per cent of the total value of shipments.

# GENERAL REVIEW OF CLOTHING INDUSTRIES

1959

The total value of shipments by the clothing manufacturers of Canada amounted to \$765,817,930 as opposed to the 1958 total of \$748,309,459. This is also a new record high, surpassing the previous 1957 total of \$749,628,477.

Ten out of the twelve clothing groups shown in Table 4 reported increased shipments, the two exceptions being Men's Factory Clothing which dropped from \$264,293,851 in 1958 to \$260,485,879 in 1959, and Oiled and Waterproofed Clothing which fell from \$3,350,529 to \$2,751,068 over the same period. The main increases were in Women's Factory Clothing with sales of \$260,575,604, a rise of \$10,118,181 or 4.0 per cent over the 1958 total of \$250,457,423; Children's Factory Clothing with an increase of \$4,494,604 or 6.9 per cent, from \$65,493,820 in 1958 to \$69,988,424 in 1959; and in Corsets, up by \$2,179,430 or 7.0 per cent, from \$31,211,587 to \$33,391,017.

The commodity breakdown of factory shipments shown in Table 15 includes clothing from all industries. In men's and youth's wear, shipments of suits declined very slightly from a revised 1958 total of 1,679,870 to 1,675,491 in 1959; those of fine pants and slacks increased from 3,282,583 (revised) to 3,376,089; and those of fine shirts also increased from 626,138 dozen to 669,102 dozen.

In women's wear, only shipments of fur coats (excluding jackets, boleros, etc.) declined in 1959. Shipments in this group, with the corresponding 1958 figures in brackets, were: coats 1,595,786 (1,578,879); fur coats 114,377 (124,760); dresses 12,632,566 (12,217,128); suits 616,190 (615,301); blouses 754,382 dozen (695,955 dozen); and skirts 4,624,790 (4,409,507). Women's seamless nylon hosiery shipments rose from 2,819,963 dozen pairs in 1958 to 3,816,790 dozen pairs in 1959, an increase of 35.3 per cent and a continuation of the trend previously recorded. On the other hand, plant sales of nylon full-fashioned hosiery again dropped, from 3,072,195 dozen pairs to 2,343,782 dozen pairs. The total 1959 shipments of ladies nylon hosiery, 6,160,572 dozen pairs, were 4.6 per cent higher than the 1958 total of 5,892,158 dozen pairs.

The increase in the dollar volume of shipments by the Children's Factory Clothing group was reflected in the 1959 dress shipments, 4,099,967, as opposed to 3,469,619 in the previous year. Shipments of coats were, however, 964,572 in 1958 and 913,573 in 1959; and those of suits also dropped from 112,687 to 69,832.

Inventories of goods in process and of finished goods held in plants and plants warehouses at the year's end were valued at \$65,162,266. Comparable stocks at the beginning of the year were worth \$59,518,691, or \$5,643,575 less. The addition of this last mentioned sum to the total value of shipments, \$765,817,930, results in an estimated gross

value of production of \$771,461,505, which is \$24,001,219 or about 3.0 per cent higher than the comparable 1958 figure of \$747,460,286.

Employment in the industries declined very slightly by 62, from 87,740 in 1958 to 87,678 in 1959. On the other hand, salaries and wages increased slightly from \$217,972,885 in 1958 to \$227,512,941 in the year under review. Over the same period and in line with the increased value of production, the total cost of materials used rose from \$389,243,696 to \$401,131,919.

In 1959 reports were received from 2,359 establishments, 101 fewer than in 1958. They were dispersed throughout Canada as follows: Newfoundland 2; Nova Scotia 8; New Brunswick 4; Quebec 1,473; Ontario 645; Manitoba 137; Saskatchewan 9; Alberta 23; and British Columbia 58. Quebec, as always, was the leading province with shipments amounting to \$490,263,261, or 64.0 per cent of the total; and with 55,322 employees, or 63.1 per cent of the total number employed. Ontario's clothing firms accounted for shipments worth \$197,948,933 (25.8 per cent) and their employees numbered 23,210 (26.5 per cent).

Principal statistics by economic area, and by industry, are given in Table 5. Again Men's Factory Clothing was the leader in the Atlantic Provinces, although the total value of shipments, \$1,505,613, was 14.9 per cent lower than the 1958 amount of \$1,769,225.

The leading clothing industry in Quebec was Women's Factory Clothing, with shipments amounting to \$181,618,664 (\$174,733,860 in 1958). In second place was Men's Factory Clothing, \$141,852,048 (\$143,636,208); followed by Children's Factory Clothing, \$56,060,262 (\$51,439,541); and Fur goods, \$36,671,496 (\$36,043,358).

In Ontario Men's Factory Clothing led the way, with plant sales worth \$77,026,892 (\$79,501,618 in 1958) followed by Women's Factory Clothing, \$56,557,236 (\$54,840,002), Fur Goods \$19,518,668 (\$19,084,164), and Corsets \$14,050,732 (\$13,158,125).

In the Prairie Provinces, Men's Factory Clothing and Women's Factory Clothing were first and second in order of importance, with shipments worth \$34,339,373 and \$16,721,034 respectively. Both were higher in value than the comparable 1958 totals of \$34,048,937 and \$15,259,955.

In British Columbia, the Men's Factory Clothing with sales of \$5,761,953 (\$5,511,429 in 1958), took over first place from the Women's Factory Clothing with shipments of \$5,433,838 (\$5,511,429).

A principal feature of this report is a detailed list of the clothing products shipped by Canadian Manufacturers in 1958 and 1959. Table 15 records total factory shipments and, therefore, includes commodities reported by all firms no matter what their industrial classification.

**TABLE 1. Principal Statistics of the Clothing Industries (Textile and Fur), 1945-57 and by Provinces, 1958 and 1959**

Year and province	Estab- lish- ments	Em- ployees	Salaries and wages	Cost at factory of fuel and electricity	Cost at factory of materials used	Value added by manufacture	Gross value of production <sup>1</sup>

<sup>1</sup> Beginning with 1952 the value of factory shipments has been collected instead of the gross value of production.

<sup>2</sup> Because of insufficient inventory data in 1952 and 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "Value added by manufacture".

TABLE 2. Comparison of Principal Statistics of Clothing Industries (Textile and Fur), 1958 and 1959

Item	1958	1959	4Increase -Decrease

<sup>1</sup> Book value of all manufacturing inventories held at plant and plant warehouses.<sup>2</sup> The opening inventory for 1959 differs from the closing inventory published for 1958 because of the inclusion of new firms and the removal of figures for firms which did not operate during 1959.

**TABLE 4. Principal Statistics of the Industries composing the Clothing Groups (Textile and Fur), 1958 and 1959**

Industry	Estab- lish- ments	Em- ployees	Salaries and wages	Cost at factory of fuel and electricity	Cost at factory of materials used	Value added by manufacture	Value of factory shipments
	number				dollars

TABLE 7. Production Workers, by Months, 1959

Months	Establishments reporting monthly detail (long forms) <sup>1</sup>		Establishments reporting quarterly detail (intermediate forms) <sup>1</sup>	
	Male	Female	Male	Female
January .....	16,643	43,966		
February .....	16,887	45,031		
March .....	16,875	44,820	3,458	9,643
April .....	16,284	43,987		
May .....	16,087	43,555		
June .....	16,323	43,410	3,245	9,193
July .....	16,781	43,296		
August .....	17,204	45,255		
September .....	17,183	45,623	3,570	9,912
October .....	16,730	45,142		
November .....	16,132	43,503		
December .....	16,330	41,123	3,203	8,500
Average for establishments reporting monthly detail .....			16,653	44,097
Average for establishments reporting quarterly detail .....			3,398	9,264
Average estimated for small establishments (short forms) <sup>1</sup> .....			685	1,940
Average for all establishments .....			20,736	55,301

<sup>1</sup> The type of form used by industry, based on the value of shipments by size groups, is given below:

Industry	Value of shipments, size groups and type of form		
	Short form	Intermediate form	Long form
	Less than	From - to	More than
Men's women's and children's clothing:			
Clothing, children's factory .....	\$100,000	\$100,000-200,000	\$200,000
Clothing, men's factory .....	100,000	100,000-400,000	400,000
Clothing, women's factory .....	100,000	100,000-300,000	300,000
Clothing contractors, men's .....	25,000	25,000-100,000	100,000
Clothing contractors, women's .....	25,000	25,000-50,000	50,000
Miscellaneous clothing:			
Corsets .....	100,000	100,000-500,000	500,000
Fur dressing and dyeing .....	200,000	-	200,000
Fur goods .....	25,000	25,000-100,000	100,000
Gloves and mittens, fabric .....	50,000	-	50,000
Hats and caps .....	50,000	50,000-200,000	200,000
Oiled and waterproofed clothing .....	200,000	-	200,000
Clothing, n.e.s. ....	50,000	50,000-150,000	150,000

August .....	112.2
September .....	119.7
October .....	111.0
November .....	104.7
December .....	98.1

**Note:** The content and make-up of these production indexes are noted in D.R.S. Reference Paper 61-502. From 1954 onwards, the data are subject to possible revision.

TABLE 12. Monthly Inventories and Shipments of Clothing Industries, 1958 and 1959

Year or month	Inventories	Shipments
thousands of dollars		
1958		
January .....	146,357	51,309
February .....	145,354	64,207
March .....	139,862	71,939
April .....	137,913	63,393
May .....	137,637	53,793
June .....	146,008	44,980
July .....	148,962	48,592
August .....	144,965	73,908
September .....	134,331	81,335
October .....	131,117	78,670
November .....	131,454	64,251
December .....	135,345	50,805
1959 <sup>1</sup>		
January .....	136,097	53,167
February .....	136,588	68,187
March .....	134,211	74,167
April .....	132,884	66,026
May .....	133,892	56,424
June .....	142,966	50,379
July .....	143,130	50,577
August .....	140,730	74,894
September .....	133,967	83,425
October .....	126,970	76,288
November .....	128,712	66,856
December .....	136,119 <sup>1</sup>	48,882

<sup>1</sup> The difference between this figure and the comparable one in Table 13 below is mainly one of method. The monthly figure is obtained by a sample, using a calendar year basis; the annual one includes fiscal year data, where necessary, and is estimated for the smaller firms.

TABLE 13. Inventory in Clothing Industries, Calendar Year End Values, 1958 and 1959<sup>1</sup>

Year	Total inventory	Raw materials	Goods in process	Finished products	
				Plant	Warehouse
	thousands of dollars				
1958 .....	135,345	74,741	17,067	43,489	48
1959 .....	143,461	78,003	18,087	47,371	—

<sup>1</sup> Data are collected from all manufacturers with an annual gross value of production of over \$50,000 and an estimated adjustment is made to reported totals to allow for firms under this level.

TABLE 14. Monthly Estimates of Sales of Clothing Wholesalers, 1958 and 1959

	1958	1959
thousands of dollars		
January .....	4,074	4,938
February .....	5,659	5,919
March .....	7,355	7,934
April .....	6,833	7,630
May .....	6,374	7,268
June .....	5,687	6,726
July .....	5,044	4,737
August .....	7,421	7,406
September .....	8,943	10,265
October .....	9,763	9,154
