THE FUR GOODS INDUSTRY, 1957

The gross value of shipments from Canadian fur goods manufacturers in 1957 was \$62,187,649 an increase of 1.7 per cent over the \$61,126,085 reported in 1956. The "net" value, or value added by manufacture after deduction of the cost of materials, fuel and electricity and consideration of the changes in inventory of finished goods and goods in process, was \$23,503,600.

There were 540 plants in operation, an increase of 3.4 per cent from the 522 reporting in 1956. Employment was afforded to 4,736 persons, an increase of 1.8 per cent over the 4,651 persons re-

ported in the previous year and salaries and wages paid showed an increase of 6.1 per cent, being \$15,034,446 as compared with \$14,165,957. The cost of materials was almost unchanged, being \$39,044,908 in 1956 and \$38,988,557 in 1957.

Ladies fur coats, jackets and boleros were the principal products shipped, totalling 204,627 valued at \$47,685,570, a decrease of 0.9 per cent in number but an increase in value as compared with the 206,390 garments valued at \$47,168,636 shipped in the previous year.

¹ Figures for "Value added by manufacture" are obtained by subtracting cost of materials used and cost of fuel and electricity from value of production. In 1952 and 1953 value of shipments was used since the value of production could not be ascertained. In 1954 and 1955 value of production was computed by using the value of shipments plus or minus the increase or decrease in finished goods inventory. For 1956 and 1957 the change in goods in process inventory was also taken into account.

² Figures for 1952, and later years represent value of factory shipments.

¹ The opening inventory for 1957 does not necessarily agree with the closing inventory for 1956 because of changes in the composition of the industry, such as the addition of new establishments, the disappearance of old ones or the transfer of establishments between industries for statistical purposes. The figure for value added in 1956 does not need to be altered because of such changes in the composition of the industry.

¹ For the years 1917-1923 cost of fuel only is shown.

² Figures for "Value added by manufacture" are obtained by subtracting cost of materials used and cost of fuel and electricity from value of production. In 1952 and 1953 value of shipments was used since the value of production could not be ascertained. In 1954 and 1955 value of production was computed by using the value of shipments plus or minus the increase or decrease in finished goods inventory. For 1956 and 1957 the change in goods in process inventory was also taken into account.

³ Figures for 1952 and later years represent value of factory shipments.
