Price 50 cents

PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the **Clothing** Major Group are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

A - Annual

Q - Quarterly

M - Monthly

Catalogue number	Title	Price
34 - 211	General Review of the Clothing Industries (A)50
34 - 212	Corset Industry (A)25
34 - 213	Fur Goods and Fur Dressing Industries (A)50
34 - 214	Hat and Cap Industry (A)50
34 - 216	Men's Factory Clothing Industry (A)50
34 - 217	Women's and Children's Factory Clothing Industries (A)75
34 - 218	Miscellaneous Clothing Industries (A)50

34 - 215	Hosiery and Knitted Goods Industries (A)50
34 - 201	General Review of Textile Mills (A)50
34 - 202	Awning, Tent and Sail Industry (A)50
34 - 203	Cordage, Rope and Twine Industry (A)50
34 - 204	Cotton and Jute Bag Industry (A)50
34 - 205	Cotton Textile Industries (A)50

65 - 004	Trade of Canada - Exports (M)	per year 7.50
65 - 007	Trade of Canada - Imports (M)	per year 7.50

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Information Services Division, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1958 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1958, are as follows:

Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies

for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

Inventories

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

Value Added by Manufacturing

Figures are computed from value of shipments plus or minus changes in inventories of finished

goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.¹

Standard Industrial Classification

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

Short Forms

Prior to 1949 all manufacturing firms, regardless of size, were required to complete a standard form annually covering all census details, but for later years an effort was made to ease the reporting burden for smaller firms which usually do not maintain regular records in the required detail. A modified or short form was introduced in 1949 asking for the total value of shipments only, or in industries with a large number of small firms, for total value of shipments and quantities and values of a few principal products. Using the ratio of value of shipments in the current year to value of shipments in the base year, 1948, estimates of other census data were made for each plant for inclusion in the regular compilations. In general, the cut-off point for short forms was set at \$50,000 gross value of shipments annually, but there were lower cut-offs for a number of industries in which the small firms accounted for a larger share of total shipments. About 40 per cent of the total number of establishments reported on the modified or short form. They accounted for less than 3 per cent of the total value. In 1958, to establish a new base year, the small firms were again asked to report data on employees, salaries and wages, and other principal statistics together with some detail on material and products.

¹ To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.

THE FUR GOODS INDUSTRY, 1958

The value of shipments by The Fur Goods Industry in 1958 was \$61,124,191, a decrease of \$1,063,458, or 1.7 per cent, from the \$62,187,649 reported in 1957. When the change in inventories of goods in process and finished goods was taken into account, the estimated value of production in the year under review was \$61,169,837, less than one per cent below the comparable 1957 figure of \$61,531,555.

The industry consisted of 493 firms employing 4,326 production workers, both 8.7 per cent below the 1957 figures of 540 plants with 4,736 employees.

Salary and wage payments, at \$14,932,862 in 1958 were, however, only slightly below the 1957 total payroll of \$15,034,446. Materials and supplies used by the industry in the current year cost \$37,667,750, a decrease of 3.4 per cent from the \$38,988,557 spent by the firms in 1957.

Ladies' fur coats, jackets and boleros were the main products shipped, totalling 196,685 valued at \$44,860,443 as against comparable 1957 shipments of 204,627 valued at \$47,685,570, a decline of 3.9 per cent in quantity and of 5.9 per cent in total value.

¹ Figures for "Value added by manufacture" are obtained by subtracting cost of materials used and cost of fuel and electricity from value of production. In 1952 and 1953 value of shipments was used since the value of production could not be ascertained. In 1954 and 1955 value of production was computed by using the value of shipments plus or minus the increase or decrease in finished goods inventory. For 1956 and later years the change in goods in process inventory was also taken into account.

² Figures for 1952, and later years represent value of factory shipments.

³ Fuel only.

⁴ Newfoundland, 1; New Brunswick, 1; Alberta, 7.

December	1,863	1,181					
Average²					1,980	1,228	3,208

¹ The number of production workers by months was generally collected only for establishments reporting value of shipments of \$50,000 and over. For smaller establishments, only the number employed during the last pay period of May, 1958, was collected.

² The average for establishments generally reporting shipments of less than \$50,000 was estimated by using average annual earnings data from the large establishments in conjunction with reported payrolls for the small establishments.

TABLE 6. Opening¹ and Closing Inventories, 1958

Province	Raw materials and supplies		Goods in process		Finished goods		Total	
	Opening	Closing	Opening	Closing	Opening	Closing	Opening	Closing
	dollars							
Quebec	5,108,602	5,408,342	1,036,772	1,018,862	3,097,050	3,372,008	9,242,424	9,799,212
Ontario	2,479,184	2,589,150	539,251	525,637	1,964,743	1,862,913	4,983,178	4,977,700
Manitoba	628,352	695,427	136,176	135,663	310,602	324,881	1,075,130	1,155,971
Saskatchewan	76,859	77,039	20,915	12,250	142,853	117,750	240,627	207,039
British Columbia	73,910	70,990	3,478	3,966	103,669	79,176	181,057	154,132
Other provinces ²	66,950	54,550	19,660	19,345	81,091	29,455	167,701	103,350
Canada	8,433,857	8,895,498	1,756,252	1,715,723	5,700,008	5,786,183	15,890,117	16,397,404

¹ The opening inventory for 1958 does not necessarily agree with the closing inventory for 1957 because of changes in the composition of the industry, such as the addition of new establishments, the disappearance of old ones or the transfer of establishments between industries for statistical purposes. The figure for value added in 1957 does not need to be altered because of such changes in the composition of the industry.

² Newfoundland, New Brunswick and Alberta.

TABLE 10. Consumption of Fuel and Electricity, 1958

	Quantity	Cost value at factory
		\$
1. Establishments reporting commodity detail: ¹		
Bituminous coal	ton 441	6,717
Anthracite coal	" 42	1,205
Gasoline	Imp. gal. 243,226	103,220
Fuel oil	" 194,900	33,362
Natural gas	M cu. ft. 1,317	835
Other fuel	—	800
Electricity purchased	kwh. 6,798,042	129,525
2. Establishments not reporting commodity detail: ¹		
Total cost of fuel	17,673
Electricity purchased	23,170
3. All establishments:		
Total cost of fuel	163,812
Total cost of electricity	152,695
Total cost of fuel and electricity	316,507

¹ Data on the quantity and value of the different kinds of fuel and on the quantity of electricity purchased were generally not collected for establishments reporting value if shipments of less than \$50,000. Only the total cost of fuel and the total cost of electricity were collected for these establishments.

THE FUR DRESSING INDUSTRY, 1958

Receipts for sales and work done by The Fur Dressing Industry in 1958 amounted to \$5,508,408, a substantial decrease of 12.6 per cent from the sum of \$6,299,336 received in 1957. There were 14 plants in operation, two less than the previous year. Employment declined by 14.3 per cent, from 1,059 in 1957 to 908 in 1958. Total salaries and wages paid by the industry, \$2,924,699, were 13.6 per cent below the 1957 payments of \$3,385,428.

The cost of chemicals, dyes and other materials used was down by 28.3 per cent, from \$1,248,961 in 1957 to \$895,585 in 1958. The number of skins treated, 8,305,294, was 7.3 per cent below the 8,960,044 reported in 1957. Muskrat accounted for the largest share of the North American skins treated, 3,799,537, or 45.7 per cent of the grand total. In imported pelts, the 735,264 Jap mink and China weasel skins treated accounted for 8.8 per cent of all types of skins processed.

TABLE 1. Principal Statistics, Canada, Calendar Years, 1917-56 and by Provinces, 1957 and 1958

Quebec	9	632	2,045,176	86,200	692,240	3,198,103	3,969,638
Other provinces	5 ⁵	276	879,523	26,349	203,345	1,324,383	1,538,770

¹ For the years 1917-23 cost of fuel only is shown.

² Figures for "Value added by manufacture" are obtained by subtracting cost of materials used and cost of fuel and electricity from value of production. In 1952 and 1953 value of shipments was used since the value of production could not be ascertained. In 1954 and 1955 value of production was computed by using the value of shipments plus or minus the increase or decrease in finished goods inventory. For 1956 and later years the change in goods in process inventory was also taken into account.

³ Figures for 1952 and later years represent value of factory shipments.

⁴ Manitoba, 2; Alberta, 1; and British Columbia, 1.

⁵ Ontario, 1; Manitoba, 2; Alberta, 1; and British Columbia, 1;

TABLE 2. Number of Fur Skins Treated, Canada, 1956-58

Kind	1956	1957	1958
Badger	12	23	130
