THE HAT AND CAP INDUSTRY IN CANADA, 1941.

In 1941 reports were received from 168 establishments whose principal output consisted of hats and caps and hat and cap makers' materials. These establishments had a production valued at \$19,055,205, they employed 5,644 persons, paid out in salaries and wages the sum of \$6,011,476 and expended \$9,600,183 for materials. Capital invested amounted to \$10,295,761.

The hat and cap industry is mainly centered in Quebec and Ontario, Quebec, with 74 establishments in 1941 accounted for over 43 per cent of the capital invested, 49 per cent of the persons employed, 47 per cent of the salaries and wages paid and almost 47 per cent of the gross value of production. Ontario with 77 establishments in the same year, reported nearly 47 per cent of the capital, 43 per cent of the persons given employment, nearly 46 per cent of the amount paid out in salaries and wages and over 45 per cent of the gross value of all production in the industry.

A general improvement throughout the hat and cap industry continued during 1941. The gross value of production increased by \$3,241,544 or over 20 per cent, 500 more persons were given employment, an increase of over 9 per cent, and the payroll also expanded to the extent of \$767,329 or almost 15 per cent. The cost of materials increased by \$1,660,766 or over 20 per cent. **Capital invested increased** by \$1,999,000 or over 24 per cent, the increase being due chiefly to an increase in the working capital.

In the hat and cap industry as a whole "women's wool felt hats" with a value of \$3,228,169 was the most important item of production in 1941. This was followed by "men's fur felt hats" with \$2,168,351, "women's straw hats" \$2,120,582, "women's fur felt hats" \$1,636,844, "cloth caps" \$1,477,088 and "uniform caps" \$1,205,099. These items represented approximately 62 per cent of the total production for the industry. There was a decrease in the output of uniform caps, while moderate increases were reported in the production of women's felt hats and men's cloth caps. The output of men's felt hats was slightly higher, there being a drop in fur felt and an increase in wool felt hats. For details of production see Table 4.

Statistics covering materials used in the industry are not collected in detail. Therefore, only the total cost is shown.

Of the 4,637 wage-earners employed by the hat and cap industry in 1941, males numbered 2,008 and females 2,629. Maximum employment was reached in September with 5,008 employed while the minimum number was 4,028 in December.
