Ottawa, February, 1928.- A report is herewith presented on the Hosiery, Knit Goods and Fabric Glove Industries in Canada during the calendar year 1926. It has been necessary to combine statistics for the last two provinces also, in order to prevent disclosure of information concerning individual establishments.

EMPLOYMENT STATISTICS - Cont'd.

Employment by Months.- The number of wage earners employed during each month of the year is shown in Table 5 by sex. The months of highest employment in 1926 were November and December each with a total employment of 15,453 and 15,481 respectively, whilst those of lowest employment were January and February with respective totals of 13,836 and 14,184. The percentage rates of employment by sex were approximately 70 per cent for females and 30 per cent for males. The average employment by months in the tables of this report is the sum of the averages of individual plants based on the months in actual operation and not the average for the calendar year.

Working Time of Plants and Employees.- The operating time of plants in the Dominion is shown in table 6 according to (a) full time, (b) part time and (c) idle, whilst the hours of labour of employees are shown by the number of hours worked per day or shift and per week. The operating time of plants whether on full or part time increased from an average of 281.12 days in 1925 to 285.66 days in 1926, a net gain per plant of 4.54 days. Hours worked by employees show little variation when compared with 1925 when the hours per week totalled 48.94. Those conditions indicate an improvement in labour conditions in the industry during 1926.

Fuel Statistics

The quantity and cost value of the various kinds of fuel used in this section of the industry is given in Table 9 for the calendar year 1926. Out of a total expenditure for all fuel of \$507,959 - coal of all kinds accounted for \$460,973 or 90.75 per cent, coke takes second place with \$20,228 whilst gas occupies third position with \$15,199. The number of boilers installed for all purposes during 1926 was 110 with a boiler horsepower capacity of 11,204.

POWER INSTALLATION

The power installed in the industry is given in Table 10 for the calendar year 1926, by (a) classes of power, (b) number of units in each class and (c) horse power capacity according to manufacturers' rating. Electricity is again the principal motive power employed with a total installation of 1,678 motors generating 10,673 horse power. The total cost of electricity purchased for power and other purposes in 1926 amounted to \$170,503 as compared with an expenditure of \$172,870 in 1925.

SECTION 11. - FABRIC GLOVES

SIZE OF ESTABLISHMENTS

The size of establishments in the Fabric Glove industry, owing to the limited number of plants reporting, and having regard for the divulging of individual statistics, is for these reasons necessarily not so complete as in the hosiery and knit goods industry.

Of the nine establishments reporting in 1926, five concerns had a capital investment of \$50,000 or less whilst the remaining four had a capital exceeding \$100,000 and upwards. The average capital investment in the 9 establishments being \$157,099 as compared with an average for 8 establishments in 1925 of \$140,003. In gross value of production in 1926 five plants had a total output under \$100,000 whilst the remaining four had an output ranging from \$200,000 to under \$1,000,000, the average output per plant being \$144,702 as compared with \$130,410 in 1925.

In the number of persons employed in 1926 five plants had less than 50 employees each whilst the other four had from 100 to under 500 employees per plant, the average for the nine plants being 71 in 1926 as compared with 61 in 1925 for eight plants.

PRODUCTION

The quantity and value of fabric gloves manufactured during the calendar year 1926 is given by provinces in Table 1. There was a marked advance in the value of production over the amount reported for the previous year - the total value in 1925 being \$1,043,280, whilst for the period covered by this report the amount was \$1,302,318, an increase of \$259,038.

CAPITAL INVESTMENT

The capital invested in this section of the industry is shown by provinces for the calendar year 1926 in Table 2. Out of a total capitalization of \$1,413,890 - the province of Ontario contributed \$704,104 or 49.8 per cent.

OTHER EMPLOYMENT STATISTICS

The number of days the establishments were in operation during the calendar year 1926 together with the number of hours per day and per week normally worked by wage-earners is given in table 4. The number of wage-earners employed during the same period is given by sex and by months in Table 5. Employment reached its maximum in September and October with 629, whilst the minimum number reported was 545 in the month of April. The average employment by months in table 5 is the sum of the averages of individual plants based on the months of actual operation and not for the calendar year.
