THE MEN'S FACTORY CLOTHING INDUSTRY

1950

SECTION 1 - MEN'S FACTORY CLOTHING, 1950

The gross value of production of the men's factory clothing industry in 1950 was \$226,659,057, a gain of \$5,957,798 or 2.7 per cent over the \$220,701,259 reported in 1949. The production of the suit and overcoat division of the industry increased from \$101,677,823 in 1949 to \$104,125,536 in the year under review. There were increases in the other divisions of the industry classified as trousers and separate garments, windbreakers and work pants, overalls and work shirts and neckwear. There were decreases in the sections classified as fine shirts and other men's wear. In Montreal the gross value of the industry's production rose from \$88,255,646 in 1949 to \$91,378,541 in 1950 while in Toronto production advanced from \$46,049,568 to \$46,497,523.

During 1950, while the industry was sensitive to difficult market conditions, there was a healthy expansion of the industry's productive capacity. New centres of production of men's and boy's clothing have opened up in Winnipeg, Saskatoon, Edmonton, Vancouver and other cities and although Quebec and Ontario remain predominant, production in other provinces is on the increase. While the industry expanded its productive capacity during the years of World War II, there has been a vast change since the end of the war through the erection of many new plants specially designed for the production of clothing and this normal growth has emphasized both quality and economy of production. The industry has encountered difficulties due to devaluation and the extraordinary rise in the cost of cloth, trimmings and findings.

The men's factory clothing industry in 1950 consisted of 566 establishments distributed provincially

as follows: Quebec 341, Ontario 148, Manitoba 36, British Columbia 18, Alberta 9, Nova Scotia 7, Newfoundland 5, New Brunswick 1 and Saskatchewan 1. The industry was largely centred in Montreal and Toronto which accounted for 60.8 per cent of total output, the production of the two cities being 40.3 per cent and 20.5 per cent respectively.

The gross value of production of \$226,659,057 in 1950 represented a value added by manufacture of \$103,346,165 compared with a value added by manufacture of \$98,546,341 in 1949. The cost of materials was up from \$121,485,389 in 1949 to \$122,603,415 in 1950. Employment showed a drop from 33,298 in 1949 to 32,853 in 1950 while salaries and wages advanced from \$57,343,483 in 1949 to \$59,301,388 in the year under review.

In the Men's Factory Clothing Industry there are seven more or less distinct divisions as regards the nature of the products manufactured. These divisions are not, however, all inclusive and a certain amount of overlapping occurs. The classification of an establishment is, therefore, determined by its principal products. For example, a firm whose production is composed of \$100,000 worth of suits and overcoats, and \$35,000 worth of overalls and work shirts is placed in the "suits and overcoats" section; whereas a firm producing \$25,000 worth of fine shirts and \$10,000 worth of men's neckwear would be placed in the "fine shirts", section. These divisions together with the number of persons employed and the value of products manufactured in 1950 are given in the table following:

1. Since less than three establishments reported boys' garments in this classification, it has been necessary to include the figures for Boys' with those for Men's and Youths'.

2. Less than three establishments, included in "All other Products".

Note: The statistics published in this report include only those manufacturers whose principal item of production is men's factory clothing. Statistics relating to these specific products, however, are not to be regarded as representing the total Canadian production as they are also included to some extent in the Women's Factory Clothing and other industries. For the total Canadian production reference should be made to the "Alphabetical List of Products Manufactured in Canada" which is shown as an appendix to all annual reports on the "Manufacturing Industries of Canada".

Statistics covering materials used are not collected in detail. The total cost is shown by provinces in Table 1 and by industry in Table 4.
