THE MEN'S FACTORY CLOTHING INDUSTRY

1951

SECTION I. MEN'S FACTORY CLOTHING, 1951

The gross value of production of the men's factory clothing industry in 1951 was \$238,661,331, a monetary increase of \$12,002,274 or 5 per cent over the \$226,659,057 reported in 1950. The production of the suit and overcoat division of the industry increased from \$104,125,536 in 1950 to \$110,228,038 in the year under review. There were increases in other divisions of the industry classified as windbreakers and work pants, overalls and work shirts, fine shirts and other men's wear. There were decreases in the sections classified as trousers and separate garments, and neckwear. In Montreal the gross value of the industry's production rose from \$91,378,541 in 1950 to \$95,765,414 in 1951 while in Toronto production advanced from \$46,497,523 to \$49,806,994.

The men's factory clothing industry experienced marked fluctuations in 1951 as it had in the previous year. During the last quarter of 1950 there was a pronounced buying movement in the industry inspired by the fear of shortages and by the needs of accelerated defence. In anticipation of increased demand the wholesale and retail trades began building up their inventories which reached unusual levels in the first part of 1951. Employment in April reached a new high level but soon afterwards the industry declined significantly. The swollen inventories, the decline of retail clothing sales, a diversion of consumer expenditure to the consumers' durables field and increased imports all played a part. Furthermore, the seasonal decline was greater than in the previous two years and the usual seasonal upswing from August to November was replaced by a slight downswing. This slump in the clothing industry has not been reflected in any over-all reduction in clothing prices; the clothing component of the cost-of-living index, which stood at 187.1 on January 1, 1951, rose to 215.5 by the following December.

The men's factory clothing industry in 1951 consisted of 577 establishments distributed provincially as follows: Quebec 347, Ontario 150, Manitoba 39, British Columbia 19, Alberta 9, Nova Scotia 7, Newfoundland 4, New Brunswick 1 and Saskatchewan 1. The industry was largely centred in Montreal and Toronto which accounted for 61 per cent of total output, the production of the two cities being 40 per cent and 21 per cent respectively.

The gross value of production of \$238,661,331 in 1951 represented a value added by manufacture of \$106,308,266 compared with a value added by manufacture of \$103,346,165 in 1950. The cost of materials was up from \$122,603,415 in 1950 to \$131,612,306 in 1951. Average employment fell slightly from 32,853 in 1950 to 32,732 in 1951 while salaries and wages advanced from \$59,301,388 in 1950 to \$62,316,166 in the year under review.

In the Men's Factory Clothing Industry there are seven more or less distinct divisions as regards the nature of the products manufactured. These divisions are not, however, all inclusive and a certain amount of overlapping occurs. The classification of an establishment is, therefore, determined by its principal products. For example, a firm whose production is composed of \$100,000 worth of suits and overcoats, and \$35,000 worth of overalls and work shirts is placed in the "suits and overcoats" section; whereas a firm producing \$25,000 worth of fine shirts and \$10,000 worth of men's neckwear would be placed in the "fine shirts", section. These divisions together with the number of persons employed and the value of products manufactured in 1951 are given in the table following:

1. Since less than three establishments reported boys' garments in this classification, it has been necessary to include the figures for Boys' with those for Men's and Youths'.

2. Less than three establishments, included in "All other Products".

Note: The statistics published in this report include only those manufacturers whose principal item of production is men's factory clothing. Statistics relating to these specific products, however, are not to be regarded as representing the total Canadian production as they are also included to some extent in the Women's Factory Clothing and other industries. For the total Canadian production reference should be made to the "Alphabetical List of Products Manufactured in Canada" which is shown as an appendix to all annual reports on the "Manufacturing Industries of Canada".

Statistics covering materials used are not collected in detail. The total cost is shown by provinces in Table 1 and by industry in Table 4.
