PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the **Clothing** Major Group are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1958 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1958, are as follows:

Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies

for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

Inventories

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

Value Added by Manufacturing

Figures are computed from value of shipments plus or minus changes in inventories of finished

goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.¹

Standard Industrial Classification

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

Short Forms

Prior to 1949 all manufacturing firms, regardless of size, were required to complete a standard form annually covering all census details, but for later years an effort was made to ease the reporting burden for smaller firms which usually do not maintain regular records in the required detail. A modified or short form was introduced in 1949 asking for the total value of shipments only, or in industries with a large number of small firms, for total value of shipments and quantities and values of a few principal products. Using the ratio of value of shipments in the current year to value of shipments in the base year, 1948, estimates of other census data were made for each plant for inclusion in the regular compilations. In general, the cut-off point for short forms was set at \$50,000 gross value of shipments annually, but there were lower cut-offs for a number of industries in which the small firms accounted for a larger share of total shipments. About 40 per cent of the total number of establishments reported on the modified or short form. They accounted for less than 3 per cent of the total value. In 1958, to establish a new base year, the small firms were again asked to report data on employees, salaries and wages, and other principal statistics together with some detail on material and products.

¹ To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

THE MEN'S FACTORY CLOTHING INDUSTRY

1958

SECTION I. MEN'S FACTORY CLOTHING, 1958

Shipments by the factories of The Men's Clothing Industry in 1958 were valued at \$264,293,851, a decrease of 3.0 per cent from the \$272,425,612 worth of goods shipped in 1957. Taking into account the changes during the year in inventories of goods in process and of finished goods, the estimated value of production amount to \$262,112,101, a drop of 4.6 per cent from the previous year's \$274,675,082.

The lowered level of activity within the industry was also apparent in the employment and materials figures. The number of employees was down by 6.4 per cent, from 32,024 in 1957 to 29,969 in 1958, and the payroll was lower by 4.0 per cent, from \$77,124,466 in 1957 to \$74,013,879 in the year under review. Materials and supplies used in manufacture cost \$144,479,417 in 1958, a decrease of 5.3 per cent from the comparable 1957 figure of \$152,560,645.

The industry was comprised of 546 firms in 1958, thirteen fewer than the year before. They were distributed as follows: Newfoundland 2; Nova Scotia 5; New Brunswick 1; Quebec 303; Ontario 153; Manitoba 51; Saskatchewan 1; Alberta 9; and British Columbia 21. A heavy concentration of establishments occurs in Montreal and Toronto, the industry's two principal centres. In 1958, Montreal accounted for 30.1 per cent of employment and 38.7 per cent of factory shipments; Toronto for 21.0 per cent of employment and 18.2 per cent of shipments.

The Men's Factory Clothing Industry is divided along commodity lines into seven more or less distinct sections, principal statistics for which are shown in Table 4. Three of these divisions recorded increases in 1958 in the value of factory shipments. The largest gain was reported by the other men's wear section, \$10,499,840 as against \$9,093,154 in 1957, an increase of 15.5 per cent. Factory sales of men's neckwear increased by 10.5 per cent to \$8,115,821 from \$7,265,143 the previous year, whilst shipments of windbreakers and work pants were up by 2.2 per cent, from \$39,363,078 in 1957 to \$40,211,997 in 1958. Sales of suits and overcoats, by far the largest of the sections, were down by

\$6,076,906, or 5.6 per cent, from \$108,017,155 in 1957 to \$101,940,249 in 1958. Statistics on employment and value of shipments for the aforementioned seven divisions in 1958 for Montreal, Toronto and Canada are given in the table at the bottom of this page.

In the current year 1,675,063 men's suits worth \$58,315,802 were shipped by the industry, 1.1 per cent fewer and 1.3 per cent lower in total value than the 1,692,866 suits worth \$59,108,984 sold in 1957. All-wool suits accounted for a major share of these totals, the figures for 1958 being 1,259,283 suits valued at \$49,634,435. Shipments of boys' suits, 188,605 worth \$2,102,959, were lower by 11.4 and 7.4 per cent, respectively, than the 212,866 suits worth \$2,272,156 shipped the previous year. Factory sales of men's overcoats and topcoats in 1958, at 488,910 with a value of \$14,304,234, were down very substantially from the 684,955 coats worth \$18,639,605 sold in 1957. Shipments of men's fine pants and slacks in 1958 were lower than in the preceding year, 3,282,583 pairs valued at \$20,563,903 compared to 3,629,890 pairs with a value of \$21,490,669. On the other hand, factory sales of boys' fine pants and slacks jumped from 1,825,050 to 2,037,288 pairs in 1958, and the aggregate value from \$5,184,662 to \$5,533,937. For full details of products shipped in 1958 and 1957 see Tables 6A and 6B, respectively, of this report.

Table 12 gives details of power installations for this industry for 1958, representing the results of a special survey made every five years.

Note on 1959.—While the 1959 Census of Industry, at the time of preparing this report, had just been started, data from other sources within the Bureau indicate the level of activity was slightly higher in 1959 than in the previous year. Based on a monthly sample survey, shipments of both clothing factories and clothing contractors are estimated to have totalled \$284,199,000, an increase of 2.0 per cent over the 1958 figure. This manufacturing activity was associated with an increase of about three and a half per cent in the retail sales of men's clothing in 1959.

¹ Commencing with 1952 the gross value of production was replaced by value of factory shipments.² Because of insufficient inventory data in 1952 and 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "Value added by manufacture".

¹ Since less than three establishments reported boys' garments in this classification, it has been necessary to include the figures for "Boys'" with those for "Men's and youths".

² Less than three establishments, included in "All other products".

Note: The statistics published in this report include only those manufacturers whose principal item of production is men's factory clothing. Statistics relating to these specific products, however, are not to be regarded as representing Canadian totals as they are also included to some extent in the Women's Factory Clothing and other industries. For total figures reference should be made to the "Alphabetical List of Commodities" which is shown as an appendix to the annual report entitled "General Review of Clothing".

Statistics covering materials used are not collected in detail. The total cost is shown by provinces in Table 1 and by industry in Table 4.

¹ The number of production workers by months was generally collected only for establishments reporting value of shipments of \$100,000 and over. For smaller establishments, only the number employed during the last pay period of May 1958, was collected

² The average for establishments generally reporting shipments of less than \$100,000 was estimated by using average annual earnings data from the large establishments in conjunction with reported payrolls for the small establishments.

SECTION 2. CLOTHING CONTRACTORS, MEN'S, 1958

The gross value of work performed by this industry in 1958 amounted to \$12,611,279, a decrease of \$632,753, or 4.8 per cent, from the 1957 total of \$13,244,032. The number of employees and the salary and wage payments both decreased by 3.7 per cent from 1957 to 1958, the former from 153 to 145, and the latter from \$9,751,211 to \$9,392,482.

In this industry the main material, fabrics, is supplied by the firms for which the clothing is being made. The contractors themselves supply principally thread, buttons, etc. In 1958 the cost of materials supplied by the contractors amounted to \$1,191,810,

a decrease of 13.8 per cent from the previous year's \$1,383,156.

The industry in 1958 was comprised of 145 establishments, of which 130 were in Quebec, 14 in Ontario and 1 in New Brunswick. There is, naturally, a concentration of clothing contractors in Montreal where the greatest number of men's factory clothing establishments is to be found. The work performed by the contractors of this city amounted to \$6,434,819, or 51.0 per cent of the total. The same people accounted for 42.3 per cent of the employees and for 51.7 per cent of the industry's salary and wage payments.
