## PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the **Clothing** Major Group are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

**A – Annual**

**Q – Quarterly**

**M – Monthly**

## SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- ... figures not appropriate or not applicable.
- nil or zero.

## EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1959 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1959 are as follows:

### Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

### Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

### Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

### Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

### Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

### Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

### Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or

plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

### **Inventories**

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

### **Value Added by Manufacturing**

Figures are computed from value of shipments plus or minus changes in inventories of finished goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.<sup>1</sup>

### **Standard Industrial Classification**

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

### **Short Forms**

Between 1949 and 1957, in an effort to ease the reporting burden for smaller firms, a short form was used asking for the total value of shipments only or, in a few cases where losses of detail were significant, for quantities and values of principal products. For purposes of publication, missing data were estimated on the basis of appropriate ratios. In general the cut-off point for these short forms was set at \$50,000 value of shipments. About 40% of the total number of establishments reported on the short form and accounted for less than 3 per cent of the total value of shipments.

In 1958, in order to establish a new base year, the small firms were asked to report all items of principal statistics together with some detail on materials and products.

<sup>1</sup> To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

For the 1959 Census, the short form was used again, but further steps were taken to ease the respondents' burden. First, the general limit for short forms was raised to \$100,000 value of shipments. In addition, a new intermediate form was developed. This form is a shortened version of the long form in that most of the general questions were pared down and the detailed lists of materials and products were limited to the more important items. The general limits for firms in this category were set at between \$100,000-\$500,000 value of shipments, but in the case of both the short and intermediate forms there were lower cut-offs for a number of industries in which the smaller firms accounted for a larger share of total shipments. On the other hand, limits were raised where this could be done without a significant loss of coverage. On most of the short forms for 1959, in addition to total value of shipments, data on principal products were requested. In a few industries, where loss of employment and earnings data were considered too large because of higher cut-offs, a question on total payroll was placed on the short form.

The intermediate and long forms provide complete data for the compilation of all elements of principal industry statistics and the details of materials and products. The one-page short form, although containing data on principal products and total value of shipments, does not request information on other elements of principal statistics such as value of inventories, materials, fuel and electricity and, in most cases, employment and salaries and wages, nor does it contain detailed data on volume and value of materials used. For purposes of compiling aggregates of principal statistics by industry and by geographic location, the missing data for each establishment were estimated for 1959 by using, in general, ratios based on the change in the value of shipments between 1958 and 1959. The proportion of the estimated data was generally less than 5 per cent of the total in each category of principal statistics.

The general request for the principal items of products on the short form for 1959 permitted a fairly complete compilation of the detailed quantities and values of commodity shipments. In the case of the detailed quantities and values of materials, fuel and electricity, however, and the monthly distribution of production workers, only the totals of data actually reported on the intermediate and long forms are contained in published reports and no attempt was made as in past years to estimate the generally small proportion of individual totals represented by detailed items omitted from the short forms.

The new approach has relieved an additional 12,000 establishments from filling out the regular long form. Establishments now receiving the short form number in excess of 20,000 and account for more than 54 per cent of the total number of establishments and a little more than 3 per cent of the total value of shipments.

# THE MEN'S FACTORY CLOTHING INDUSTRY

1959

## SECTION 1. MEN'S FACTORY CLOTHING

Shipments by the factories of the Men's Clothing Industry in 1959 were valued at \$260,485,879, a decrease of 1.4 per cent from the \$264,293,851 worth of goods shipped in 1958. Taking into account the changes during the year in inventories of goods in process and of finished goods, the estimated value of production amounted to \$262,763,045, an increase of less than one per cent over the previous year's \$262,112,101.

The number of persons on the payrolls was down considerably, 29,209 this year as against 29,969 in 1958, but the salary and wage payments were 2.7 per cent higher rising to \$76,011,271 from \$74,013,879 the previous year. Materials and supplies used in manufacture cost \$144,990,401 in 1959, an increase of less than one per cent over the comparable 1958 figure of \$144,479,417.

In 1959 there were 513 firms in the industry, 33 fewer than the year before. These were distributed as follows: Newfoundland 1; Nova Scotia 5; Quebec 288; Ontario 140; Manitoba 49; Saskatchewan 1; Alberta 9; and British Columbia 20. The heaviest concentrations of establishments occurs in Montreal and Toronto. In 1959 the former area accounted for 39.1 per cent of the total shipments and for 28.6 per cent of the employment. The Toronto firms were responsible for 17.4 per cent of the shipments and for 20.4 per cent of employment.

The Men's Factory Clothing Industry is divided along commodity lines into seven more or less distinct sections, principal statistics for which are shown in Table 4. Three of these divisions reported small increases in 1959 in the value of factory shipments. In "men's neckwear" the value of sales rose by 1.2 per cent, to \$8,210,707 from \$8,115,821. In "fine shirts" the value of shipments, \$46,725,857, was 0.4 per cent higher than the comparable 1958 total of \$46,539,410. The increase in sales of "windbreakers and work pants" was even smaller, 0.3 per

cent, the actual value being \$40,330,719 as opposed to \$40,211,997 the previous year. Shipments of suits and overcoats were fractionally lower at \$101,261,698 compared to \$101,940,249 in 1958. Statistics on employment and value of shipments for the aforementioned seven divisions in 1959 for Montreal, Toronto and Canada are given in the table at the bottom of this page.

In the year under review 1,648,588 men's suits worth \$56,577,461 were shipped by the industry 1.6 per cent fewer and 3.0 per cent lower in total value than the 1,675,063 suits worth \$58,315,802 sold in 1958. All-wool suits accounted for the lion's share of these totals, the figures for 1959 being 1,305,757 suits valued at \$49,382,173. Factory sales of men's overcoats and topcoats in 1959, at 523,304 with a value of \$15,028,333, were 7.0 and 5.1 per cent higher, respectively, in quantity and value than the 488,910 coats worth \$14,304,234 sold in 1958. Shipments of men's fine pants and slacks in 1959 were higher than in the preceding year, 3,376,089 pairs valued at \$20,949,951 compared to 3,282,583 pairs valued at \$20,563,903. However, factory sales of boys' fine pants and slacks declined to 1,680,428 pairs worth \$4,732,969 from 2,037,288 pairs worth \$5,533,937 in 1958. For full details of products shipped in 1959 and 1958 see Tables 6A and 6B, respectively, of this report.

**Note on 1960**—While the 1960 Census of Industry Survey, at the time of preparing this report, had just been started, data from other sources within the Bureau indicate the level of activity was slightly lower in 1960 than in the previous year. Based on a monthly sample survey, shipments of both clothing factories and of clothing contractors are estimated to have totalled \$280,299,000, a decrease of 1.4 per cent from the 1959 figure. On the other hand, the 1960 retail sales of men's clothing, covering both domestic and imported products, were running about one per cent higher in 1959 on a dollar volume basis.

<sup>1</sup> Commencing with 1952 the gross value of production was replaced by value of factory shipments.<sup>2</sup> Because of insufficient inventory data in 1952 and 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "Value added by manufacture".

<sup>1</sup> Book value of all manufacturing inventories held at plant and plant warehouses.

<sup>2</sup> The opening inventory for 1959 differs from the closing inventory published for 1958 because of the inclusion of new firms and the removal of figures for firms which did not operate during 1959.

TABLE 3. Comparison of Principal Statistics, 1958 and 1959

Items	1958	1959	+Increase -Decrease
Establishments reporting ..... No.	546	513	- 33
Supervisory and office employees:			
Total ..... "	4,036	4,172	+ 136
Male ..... "	2,477	2,476	+ 1
Female ..... "	1,559	1,696	+ 137
Total salaries ..... \$	17,854,433	19,123,277	+1,268,844
Production workers:

Total wages .....	\$ 26,038,932	3,652,230	8,219,410	7,069,751
Cost of fuel and electricity .....	\$ 367,014	76,876	180,483	136,174
Cost of materials used .....	\$ 52,895,618	11,366,828	23,934,823	19,998,446
Value of factory shipments .....	\$ 101,261,698	19,304,002	40,330,719	35,436,043
		Fine shirts	Men's furnishing goods, other	Men's neckwear
Establishments reporting ..... No.		59	41	27
<b>Supervisory and office employees:</b>				
Total .....		896	148	157
Male .....		417	94	86
Female .....		479	54	71
Total salaries .....		\$ 3,362,167	652,264	795,966
<b>Production workers:</b>				
Monthly average ..... No.		4,164	947	617
Male .....		578	188	125
Female .....		3,586	759	492
Total wages .....		\$ 8,718,869	1,906,041	1,282,761
Cost of fuel and electricity .....		\$ 173,928	35,546	24,323
Cost of materials used .....		\$ 27,777,452	4,834,330	4,182,904
Value of factory shipments .....		\$ 46,725,857	9,216,853	8,210,707

**Note:** The classification of a firm is determined by its products of chief value. For example, a firm whose factory shipments comprise \$100,000 worth of suits and overcoats, and \$35,000 worth of overalls and work shirts is placed in the "Suits and overcoats" section, whereas a firm shipping \$25,000 worth of fine shirts and \$10,000 worth of men's neckwear would be placed in the "Fine shirts" section.

<sup>1</sup> Since less than three establishments reported boys' garments in this classification, it has been necessary to include the figures for "Boys" with those for "Men's and youths".

<sup>2</sup> Less than three establishments, included in "All other products".

**Note:** The statistics published in this report include only those manufacturers whose principal item of production is men's factory clothing. Statistics relating to these specific products, however, are not to be regarded as representing Canadian totals as they are also included to some extent in the Women's Factory Clothing and other industries. For total figures reference should be made to the "Alphabetical List of Commodities" which is shown as an appendix to the annual report entitled "General Review of Clothing".

Statistics covering materials used are not collected in detail. The total cost is shown by provinces in Table 1 and by industry in Table 4.

Average estimated for small establishments <sup>3</sup> .....			209	441
Average for all establishments.....			7,703	17,334

<sup>1</sup> The number of production workers, by months, was collected only for establishments generally reporting value of shipments of \$400,000 and over.

<sup>2</sup> The number of production workers, by quarters, was collected only for establishments generally reporting value of shipments between \$100,000 and \$400,000.

<sup>3</sup> For establishments generally reporting value of shipments of less than \$100,000, no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.

## SECTION 2. MEN'S CLOTHING CONTRACTORS, 1959

The gross value of work performed by this industry in 1959 amounted to \$13,115,332, an increase of 4.0 per cent over the 1958 total of \$12,611,279. The number of employees decreased by 40, from 4,950 to 4,910 in 1959, but salary and wage payments rose from \$9,392,482 to \$9,751,442, an increase of 3.8 per cent.

In this industry the main material, fabrics, is supplied by the firms for which the clothing is being made. The contractors supply principally thread, buttons, etc. In 1959 the cost of materials supplied by the contractors amounted to \$1,276,343, an in-

crease of 7.1 per cent over the previous year's outlay of \$1,191,810.

The Industry in 1959 was comprised of 136 establishments, 120 of which were in Quebec, 15 in Ontario and 1 in New Brunswick. The concentration of men's factory clothing establishments in Montreal leads, naturally, to an equally heavy concentration of men's clothing contractors in that particular area. The work performed by the contractors of this city amounted to \$6,237,681, or 47.6 of the Dominion total. The same people accounted for 40.4 per cent of the employees and for 49.0 per cent of the industry's salary and wage payments.

TABLE 17. Production Workers, by Months, 1959

	Establishments reporting monthly detail <sup>1</sup>		Establishments reporting quarterly detail <sup>2</sup>	
	Male	Female	Male	Female
January .....	854	2,242	—	—
February .....	870	2,348	—	—
March .....	896	2,334	396	873
April .....	882	2,366	—	—
May .....	868	2,332	—	—
June .....	849	2,320	385	854
July .....	870	2,321	—	—
August .....	903	2,463	—	—
September .....	905	2,461	415	907
October .....	889	2,408	—	—
November .....	886	2,285	—	—
December .....	859	2,032	367	827
Average for establishments reporting monthly detail .....			879	2,326
Average for establishments reporting quarterly detail .....			394	870
Average estimated for small establishments <sup>3</sup> .....			25	115
Average for all establishments .....			1,298	3,311

<sup>1</sup> The number of production workers, by months, was collected only for establishments generally reporting gross value of work performed of \$100,000 and over.

<sup>2</sup> The number of production workers, by quarters; was collected only for establishments generally reporting gross value of work performed between \$25,000 and \$100,000.

<sup>3</sup> For establishments generally reporting gross value of work performed of less than \$25,000, no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.

TABLE 18. Consumption of Fuel and Electricity, 1959

Kind	Quantity	Cost at plant	
		\$	
<b>1. Establishments reporting commodity detail:<sup>1</sup></b>			
Bituminous coal—From Canadian mines .....	ton	212	3,635
Anthracite coal .....	"	375	6,153
