SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed or where "a trace" is meant.

EXPLANATORY NOTES

This report is one in a series of about 140 publications which present the results of the 1960 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. Adoption of the revised Standard Industrial Classification for 1960 compilations has necessitated changes in titles of many reports in this annual series. The content of many industries has also been affected (see following note on Industrial Classification).

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1960 are as follows:

Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory; sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level, and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, ware-

housing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc. are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants or reporting companies for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers

and resold without further processing are not included. Values are computed on f.o.b. plant or plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

Inventories

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

Value added by Manufacturing

Figures are computed from value of shipments plus or minus changes in inventories of finished goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.¹

Standard Industrial Classification

The revised Standard Industrial Classification which has been introduced with the 1960 Census of Manufactures provides for a breakdown of the universe into 140 industries arranged in 20 major groups compared with 135 industries in 17 major groups in the old classification which was used in the compilations for the years 1949 to 1959 inclusive. It incorporates changes considered desirable on the basis of experience in using the earlier classification as well as those which take account of changes in the structure of Canadian industries associated with the rapid developments of the past decade. Full details are contained in the Standard Industrial Classification Manual, Catalogue No. 12-501, which is available from either the Queen's Printer or the Dominion Bureau of Statistics. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

Many industries remain unchanged in the new classification but in many instances there have been substantial changes in content because of the shifting of establishments from one industry to another or in re-grouping of establishments. Where

changes have occurred the principal statistics for 1957, 1958 and 1959 have been re-compiled to provide data on a basis comparable with those for 1960.

Short Forms

Between 1949 and 1957, in an effort to ease the reporting burden for smaller firms, a short form was used asking for the total value of shipments only or, in a few cases where losses of detail were significant, for quantities and values of principal products. For purposes of publication, missing data were estimated on the basis of appropriate ratios. In general the cut-off point for these short forms was set at \$50,000 value of shipments. About 40% of the total number of establishments reported on the short form and accounted for less than 3 per cent of the total value of shipments.

In 1958, in order to establish a new base year, the small firms were asked to report all items of principal statistics together with some detail on materials and products.

For the 1959 Census, the short form was used again, but further steps were taken to ease the respondents' burden. First, the general limit for short forms was raised to \$100,000 value of shipments. In addition, a new intermediate form was developed. This form is a shortened version of the long form in that most of the general questions were pared down and the detailed lists of materials and products were limited to the more important items. The general limits for firms in this category were set at between \$100,000-\$500,000 value of shipments, but in the case of both the short and intermediate forms there were lower cut-offs for a number of industries in which the smaller firms accounted for a larger share of total shipments. On the other hand, limits were raised where this could be done without a significant loss of coverage. On most of the short forms for 1959, in addition to total value of shipments, data on principal products were requested. In a few industries, where loss of employment and earnings data were considered too large because of higher cut-offs, a question on total payroll was placed on the short form. This practice was followed again in 1960.

The intermediate and long forms provide complete data for the compilation of all elements of principal industry statistics and the details of materials and products. The one-page short form, although containing data on principal products and total value of shipments, does not request information on other elements of principal statistics such as value of inventories, materials, fuel and electricity and, in most cases, employment and salaries and wages, nor does it contain detailed data on volume and value of materials used. For purposes of compiling aggregates of principal statistics by industry and by geographic location, the missing data for each establishment were estimated for 1959 by using, in general, ratios based on the change in the value of shipments between 1958 and 1959. The proportion of the estimated data was generally less than 5 per cent of the total in each category of principal statistics.

¹ To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

MEN'S CLOTHING INDUSTRY

1960

SECTION 1. MEN'S CLOTHING FACTORIES

For the 1960 survey, the Bureau implemented a revised Standard Industrial Classification one of the results of which was minor revisions to this industry as a scrutiny of the revised Principal Statistics for the years 1957 to 1959, inclusive (Table 1), will show. Because of these revisions, it has not been possible to publish the 1959 factory shipment data on the revised basis for the industry. However, in all cases the 1959 data shown in this section of the report refer to the revised figures. The industry continues to be defined as comprising those "Establishments primarily engaged in manufacturing suits, coats, trousers, overcoats, shirts, underwear, work clothing, sheep-lined coats, sportswear and men's furnishings and leather clothing on their own account".

Shipments by the factories of the Men's Clothing Factories industry in 1960 were valued at \$261,278,917, a decrease of 0.4 per cent from the \$262,244,947 worth of goods shipped in 1959. Taking into account the changes during the year in inventories of goods in process and of finished goods, the estimated value of production amounted to \$263,437,794 for 1960.

The number of persons on the payrolls was down somewhat 28,737 in the year under review as against 29,363 in 1959, a drop of 2.1 per cent. Salary and wage payments were slightly lower, declining to \$76,189,722 from \$76,452,174 the previous year. Materials and supplies used in manufacture cost \$144,683,906, a fall of less than one per cent below the comparable 1959 figure of \$145,901,918.

In 1960 there were 509 firms in the industry, 8 fewer than the year before. These were distributed as follows: Newfoundland 1; Nova Scotia 5; Quebec 286; Ontario 139; Manitoba 51; Saskatchewan 1; Alberta 9; and British Columbia 17. The heaviest concentration of establishments occurs in Montreal and Toronto. In 1960 the former area accounted for 38.6 per cent of the total shipments and for 28.6 per cent of the employment. The Toronto firms were responsible for 16.1 per cent of the shipments and for 19.0 per cent of the employment.

The Men's Clothing Factories Industry is divided along commodity lines into seven more or less distinct sections, principal statistics for which are shown in Table 4. Since no valid com-

parison is available for the revised 1959 data, only 1960 value of factory shipments are shown in Tables 4 and 5.

In the year under review 1,584,005 men's suits worth \$56,080,581 were shipped by the industry. All wool suits accounted for the lion's share of these totals, the figures for 1960 being 1,235,044 suits valued at \$47,933,737. Factory sales of men's overcoats and topcoats were 500,520 with a value of \$14,164,788. Shipments of men's fine pants and slacks numbered 3,512,739 with a value of \$21,662,063 while boys' fine pants numbered 2,112,682 with a value of \$5,894,226 in the year under review. For full details of products shipped in 1960 see Table 6. No 1959 data are given for the reasons mentioned previously.

Table 7 and Table 8 contain the imports and exports data, respectively, of clothing and furnishings. It should be noted that respective class numbers are given for the commodities imported and exported for those persons who are interested in the further details that are published in the "Trade of Canada Imports" and "Trade of Canada Exports" (see Tables 7 and 8) bulletins.

The opportunity has now been taken to include two new tables to this report for 1960. Table 13 gives the principal statistics of the industry, classified by number of employees per establishment, for the years 1957 and 1960; and Table 14 shows the principal statistics according to type of ownership for the same two years. As in previous reports, Table 12 shows the breakdown of these same statistics by shipment size. It should be noted that only 1957 and 1960 data are shown in Tables 12, 13 and 14, inclusive, for the reasons cited previously.

Note on 1961—While the 1961 Census of Industry Survey, at the time of preparing this report, had just been started, data from other sources within the Bureau indicate the level of activity was slightly higher in 1961 than in the previous year. Based on a monthly sample survey, shipments of both clothing factories and of clothing contractors are estimated to have totalled \$276,991,000, an increase of 0.7 per cent from the 1960 figure. Similarly, the 1961 retail sales of men's clothing, covering both domestic and imported products, were running about two per cent higher than in 1960 on a dollar volume basis.

Division	Montreal		Toronto		Canada	
	Em- ployees	Value of shipments	Em- ployees	Value of shipments	Em- ployees	Value of shipments
	No.	\$	No.	\$	No.	\$

¹ Book value of all manufacturing inventories held at plant and plant warehouses.

² The opening inventory for 1959 differs from the closing inventory published for 1958 because of the inclusion of new firms and the removal of figures for firms which did not operate during 1959.

TABLE 3. Comparison of Principal Statistics, 1959 and 1960

Items		1959	1960	+Increase -Decrease
Establishments reporting	No.	517	509	- 8
Supervisory and office employees:				
Total	"	4,196	3,945	- 251
Male	"	2,496	2,407	- 89
Female	"	1,700	1,538	- 162
Total salaries	\$	19,259,617	19,100,977	- 158,640
Production workers:				
Monthly average	No.	25,167	24,792	- 375
Male	"	7,766	7,470	- 296
Female	"	17,401	17,322	- 79
Total wages	\$	57,192,557	57,088,745	- 103,812
Cost of fuel and electricity	\$	998,861	1,008,339	+ 9,478
Cost of materials used	\$	145,901,918	144,683,906	- 1,218,012
Value of factory shipments	\$	262,244,947	261,278,917	- 966,030

Note: Profits or losses cannot be estimated from Census figures as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

TABLE 4. Principal Statistics of the Various Sections Comprising the Men's Clothing Factories, 1960

Items		Establishments whose principal products were			
		Suits and overcoats	Trousers and separate garments	Zippered short jackets and work pants	Overalls and work shirts

Supervisory and office employees:					
Total	"	1,780	251	543	312
Male	"	1,174	152	328	170
Female	"	606	99	215	142
Total salaries	\$	8,593,900	1,225,438	2,724,083	1,666,549
Production workers:					
Monthly average	No.	9,457	1,756	4,338	3,019
Male	"	4,565	398	1,075	417
Female	"	4,892	1,358	3,263	2,602
Total wages	\$	25,081,714	3,665,292	9,409,736	6,023,871
Cost of fuel and electricity	\$	353,362	77,321	204,761	131,639
Cost of materials used	\$	51,706,222	11,907,474	26,350,947	16,525,868
Value of factory shipments	\$	99,078,917	19,767,112	45,075,171	29,153,586
		Fine shirts		Men's furnishing goods, other	Men's neckwear
Establishments reporting	No.	60		52	25
Supervisory and office employees:					
Total	"	713		197	149
Male	"	382		122	79
Female	"	331		75	70
Total salaries	\$	3,192,849		872,528	825,630
Production workers:					
Monthly average	No.	4,432		1,213	577
Male	"	631		265	119
Female	"	3,801		948	458
Total wages	\$	9,130,037		2,476,018	1,302,077
Cost of fuel and electricity	\$	166,823		49,232	25,201
Cost of materials used	\$	28,008,656		5,873,527	4,311,212
Value of factory shipments	\$	48,217,417		11,790,977	8,195,737

Note: The classification of a firm is determined by its products of chief value. For example, a firm whose factory shipments comprise \$100,000 worth of suits and overcoats, and \$35,000 worth of overalls and work shirts is placed in the "Suits and overcoats" section, whereas a firm shipping \$25,000 worth of fine shirts and \$10,000 worth of men's neckwear would be placed in the "Fine shirts" section.

Amount received for custom work	—		1,768,022	
Total value of factory shipments	—		261,278,917	

¹ Since less than three establishments reported boys' garments in this classification, it has been necessary to include the figures for "Boys" with those for "Men's and youths".

² Less than three establishments, included in "All other products".

Note: The statistics published in this report include only those manufacturers whose principal item of production is men's factory clothing. Statistics relating to these specific products, however, are not to be regarded as representing Canadian totals as they are also included to some extent in the Women's Factory Clothing and other industries. For total figures reference should be made to the "Alphabetical List of Commodities" which is shown as an appendix to the annual report entitled "General Review of the Clothing Industries" (Cat. No. 34-211).

Statistics covering materials used are not collected in detail. The total cost is shown by provinces in Table 1 and by industry in Table 4

¹ The number of production workers, by months, was collected only for establishments generally reporting value of shipments of \$400,000 and over.

² The number of production workers, by quarters, was collected only for establishments generally reporting value of shipments between \$100,000 and \$400,000.

³ For establishments generally reporting value of shipments of less than \$100,000, no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.

SECTION 2. MEN'S CLOTHING CONTRACTORS, 1960

Although the Bureau has adopted a revised Standard Industrial Classification for the 1960 survey, there has been no change in this industry as can be seen from the scrutiny of the Principal Statistics in Table 13. The Men's Clothing Contractors industry comprises the custom firms engaged in the activities as defined in Section 1 of this report, i.e. those establishments not manufacturing on their account.

The gross value of work performed by this industry in 1960 amounted to \$13,823,971, an increase of 5.4 per cent over the 1959 total of \$13,115,332. The number of employees increased by 219, or 4.4 per cent, from 4,910 to 5,129 in 1960, and the salary and wage payments rose from \$9,751,442 to \$10,174,934, an increase of 4.3 per cent.

In this industry the main material, fabrics, is supplied by the firms for which the clothing is being made. The contractors supply principally thread, buttons, etc. In 1960, the cost of materials supplied by the contractors amounted to \$1,171,222, a decrease of 8.3 per cent from the previous year's outlay of \$1,276,343.

The industry in 1960 was comprised of 141 establishments, 126 of which were in Quebec, 14 in Ontario and 1 in New Brunswick. The concentration of men's factory clothing establishments in Montreal leads, naturally, to an equally heavy concentration of men's clothing contractors in that particular area. The work performed by the contractors in Montreal amounted to \$6,710,838, or 48.5 per cent of the Dominion total. The same firms accounted for 39.0 per cent of the employees and for 49.1 per cent of the industry's salary and wage payments.

Average for all establishments			1,269	3,573

¹ The number of production workers, by months, was collected only for establishments generally reporting gross value of work performed of \$100,000 and over.

² The number of production workers, by quarters, was collected only for establishments generally reporting gross value of work performed between \$25,000 and \$100,000.

³ For establishments generally reporting gross value of work performed of less than \$25,000, no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.

**TABLE 20. Principal Statistics of Men's Clothing Contractors, grouped by Shipment Size
1959 and 1960**

Size of shipments	Estab- lish- ments	Em- ployees	Salaries and wages	Cost at factory of fuel and electricity	Cost at factory of material used	Value of work performed
