WOMEN'S FACTORY CLOTHING INDUSTRY IN CANADA, 1929.

Other Employment Statistics (Cont'd.)

The number of hours worked per day in the month of highest employment and the standard working hours per week are shown by provinces in Table 6(b). It should be noted that whilst the statistics relating to hours of labour in columns 1, 2 and 3 are based on figures compiled for the month of highest employment, those in columns 4 and 5 represent the total and average of standard weekly hours of labour for the number of establishments reporting to the Bureau. For this reason the relation between daily and weekly hours of labour is to some extent impaired. The average daily hours of labour on the above basis was for the Dominion 8.6, whilst the average standard weekly hours worked out at 45.9 per plant.
