THE WOMEN'S FACTORY CLOTHING INDUSTRY IN CANADA, 1934

In 1934 reports were received from 577 establishments engaged primarily in the manufacture of women's factory clothing and ready-to-wear garments which was an increase of 37 over the number reporting in 1933.

This industry is composed of 5 divisions, so closely allied as to make it impracticable to treat each one as a separate industry. The divisions comprise (1) women's factory clothing, (2) ladies' and children's wear, (3) women's neckwear and fancy goods, (4) embroideries, and trimmings and (5) laces, tapes and bindings. The principal statistics of all these divisions are contained in table 4.

Due to the increase of 37 in the number of firms reporting and the improvement which continued throughout 1934, there was an increase of \$6,997,268 in the gross value of production over the amount recorded for the previous year. The capital investment rose from \$18,132,022 in 1933 to \$19,389,407 in 1934, an increase of \$1,257,385. The total number of employees rose from 15,264 in 1933 to 17,000, an increase of 1,736. The total payroll also expanded to the extent of \$1,762,153. Additional expense amounting to \$4,588,604 was incurred in the cost of materials used, whilst the value added by manufacture showed an increase of \$2,408,664 over the two year period. The following table shows the variations in the principal statistics, by provinces, in comparison with the year 1933.
