## PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the **Clothing** Major Group are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

**A** - Annual

**Q** - Quarterly

**M** - Monthly

Catalogue number	Title	Price
34-211	General Review of the Clothing Industries (A) .....	.50
34-212	Corset Industry (A) .....	.25
34-213	Fur Goods and Fur Dressing Industries (A) .....	.50
34-214	Hat and Cap Industry (A) .....	.50
34-216	Men's Factory Clothing Industry (A) .....	.50
34-217	Women's and Children's Factory Clothing Industries (A) .....	.75
34-218	Miscellaneous Clothing Industries (A) .....	.50
-----		
34-215	Hosiery and Knitted Goods Industries (A) .....	.50
34-201	General Review of Textile Mills (A) .....	.50

## SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- <sup>p</sup> preliminary figures.
- <sup>r</sup> revised figures.

## EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1959 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1959 are as follows:

### Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

### Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

### Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

### Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

### Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

### Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

### Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or

plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

### **Inventories**

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

### **Value Added by Manufacturing**

Figures are computed from value of shipments plus or minus changes in inventories of finished goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.<sup>1</sup>

### **Standard Industrial Classification**

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

### **Short Forms**

Between 1949 and 1957, in an effort to ease the reporting burden for smaller firms, a short form was used asking for the total value of shipments only or, in a few cases where losses of detail were significant, for quantities and values of principal products. For purposes of publication, missing data were estimated on the basis of appropriate ratios. In general the cut-off point for these short forms was set at \$50,000 value of shipments. About 40% of the total number of establishments reported on the short form and accounted for less than 3 per cent of the total value of shipments.

In 1958, in order to establish a new base year, the small firms were asked to report all items of principal statistics together with some detail on materials and products.

<sup>1</sup> To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

For the 1959 Census, the short form was used again, but further steps were taken to ease the respondents' burden. First, the general limit for short forms was raised to \$100,000 value of shipments. In addition, a new intermediate form was developed. This form is a shortened version of the long form in that most of the general questions were pared down and the detailed lists of materials and products were limited to the more important items. The general limits for firms in this category were set at between \$100,000-\$500,000 value of shipments, but in the case of both the short and intermediate forms there were lower cut-offs for a number of industries in which the smaller firms accounted for a larger share of total shipments. On the other hand, limits were raised where this could be done without a significant loss of coverage. On most of the short forms for 1959, in addition to total value of shipments, data on principal products were requested. In a few industries, where loss of employment and earnings data were considered too large because of higher cut-offs, a question on total payroll was placed on the short form.

The intermediate and long forms provide complete data for the compilation of all elements of principal industry statistics and the details of materials and products. The one-page short form, although containing data on principal products and total value of shipments, does not request information on other elements of principal statistics such as value of inventories, materials, fuel and electricity and, in most cases, employment and salaries and wages, nor does it contain detailed data on volume and value of materials used. For purposes of compiling aggregates of principal statistics by industry and by geographic location, the missing data for each establishment were estimated for 1959 by using, in general, ratios based on the change in the value of shipments between 1958 and 1959. The proportion of the estimated data was generally less than 5 per cent of the total in each category of principal statistics.

The general request for the principal items of products on the short form for 1959 permitted a fairly complete compilation of the detailed quantities and values of commodity shipments. In the case of the detailed quantities and values of materials, fuel and electricity, however, and the monthly distribution of production workers, only the totals of data actually reported on the intermediate and long forms are contained in published reports and no attempt was made as in past years to estimate the generally small proportion of individual totals represented by detailed items omitted from the short forms.

The new approach has relieved an additional 12,000 establishments from filling out the regular long form. Establishments now receiving the short form number in excess of 20,000 and account for more than 54 per cent of the total number of establishments and a little more than 3 per cent of the total value of shipments.

# THE WOMEN'S AND CHILDREN'S FACTORY CLOTHING INDUSTRIES

1959

## SECTION I. THE COMBINED WOMEN'S AND CHILDREN'S FACTORY CLOTHING INDUSTRIES, 1959

Section I of this report presents the overall statistics for The Combined Women's and Children's Factory Clothing Industries. The three other sections deal separately with the component industries, which are: Section II. The Women's Factory Clothing Industry; Section III. The Children's Factory Clothing Industry; and Section IV. The Women's and Children's Clothing Contractors Industry. The developments within these industries are noted in their respective sections, and a list of firms reporting to each industry may be found at the end of each section.

The value of products shipped by women's and children's clothing manufacturers in 1959 was \$330,564,028, an increase of \$14,612,785, or 4.6 per cent, over the preceding year's total of \$315,951,243. The absolute gain was greater in the case of the Women's Industry, \$10,118,181, than in the Children's Industry, \$4,494,604. However, in terms of percentages the increases were 4.0 in the former industry and 6.9 in the latter. Employment in the combined industries was up by 1.2 per cent, from 33,542 in 1958 to 33,962 in 1959. Salary and wage payments also rose, from \$85,450,543 to \$89,912,235 in the current year, an increase of 5.2 per cent. The cost of materials and supplies used was higher by 5.3 per cent, rising from \$169,149,542 in 1958 to \$178,136,744 in the year under review.

In the combined industries in 1959 there were 814 reporting establishments, 32 fewer than the year before. These firms were distributed as follows: Nova Scotia 1; New Brunswick 1; Quebec 536; Ontario 217; Manitoba 31; Saskatchewan 2; Alberta 7; and British Columbia 19. The heaviest concentrations of plants were in Montreal and Toronto, the two cities accounting for 81.4 per cent of the employment and for 83.4 per cent of the total value of factory shipments. Montreal continued to lead in both fields, with 21,204 employees and shipments valued at \$218,738,320, or 62.4 and 66.2 per cent of the Canada total, respectively. Toronto accounted for 6,445 employees and \$57,047,042 worth of shipments, 19.0 and 17.3 per cent, respectively. The standing of the two cities with regard to the number of persons employed and the value of factory sales, by sections, is given in the table at the top of the following page.

The Women's and Children's Factory Clothing Industries are divided along commodity lines into six divisions, the principal statistics for which are presented in Table 2. Decreases from 1958 in the value of goods shipped were reported by both (a)

other outerwear and (b) lingerie. The value of factory shipments for all six divisions, with the comparable 1958 figures in brackets, were: women's dresses \$91,642,775 (\$86,118,766); children's clothing \$69,988,424 (\$65,493,820); women's coats and suits \$58,431,389 (\$54,382,085); skirts, blouses, slacks and jackets \$54,696,015 (\$48,972,820); lingerie \$38,527,737 (\$40,129,788); and other outerwear \$17,277,688 (\$20,854,014). The biggest increase, \$5,723,195, or 11.7 per cent, occurred in the skirts, blouses, slacks and jackets section. The decreases in shipments of other outerwear and lingerie amounted to \$3,576,326 (17.1 per cent) and \$1,602,051 (4.0 per cent), respectively.

Women's and Misses' rayon and rayon mixture dresses regained their predominant commodity position in 1959 with shipments of 4,193,022 garments valued at \$36,702,520. Last year's leading product, women's and misses' wool coats, was close behind with factory sales of 1,422,975 pieces worth in total \$36,045,150. For further details of factory shipments see Table 3.

In the 1959 survey, a special breakdown was introduced which requested the shipments of women's and misses' regular coats, dresses (excluding house-dresses) and blouses by price range at the manufacturing level. This new enquiry covered the combined industries: the new data will be found in Table 3B. It should be noted that only those shipments of these three commodities on which price data was obtained have been so presented, the residual shipments being shown as "undistributed by price range" in all cases.

Imports of clothing and furnishings increased by 32.2 per cent, from \$33,378,417 in 1958 to \$44,131,713 in 1959. Over the same two-year period exports rose by 36.8 per cent from \$1,378,696 to \$1,885,500. The revised presentation of the import data, Table 4, and the revision to the 1958 estimated value of clothing purchases by Canadians returning from other countries should both be noted.

**Note on 1960.**—While the Census of Industry Survey for 1960 is still quite incomplete, data from other sources in the Bureau indicate no change at the manufacturing level. Based on a monthly sample survey, the value of factory shipments for the combined industries is estimated to have been the same as in 1959. There was an estimated increase of one per cent in the retail sales of women's and children's clothing during 1960.

## THE TEXTILES INDUSTRIES

<sup>1</sup> Commencing with 1952 the gross value of production was replaced by value of factory shipments.<sup>2</sup> Principal Statistics for 1949 and later are not comparable with earlier years due to adoption of the Standard Industrial Classification in 1949.<sup>3</sup> Because of insufficient inventory data in 1952 and 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "Value added by manufacture."

Note: Profits and losses cannot be estimated from Census figures as no data are collected for certain expense items such as interest, rent, depreciation, taxes, insurance, advertising, etc.

TABLE 2. Comparison of Principal Sections of the Women's and Children's Factory Clothing Industries, 1958 and 1959

	Estab- lish- ments	Em- ployees	Salaries and wages	Cost at factory of materials and supplies used	Value of factory shipments
	number		dollars		
Women's coats and suits:

Amount received for custom work .....			—	80,226
<b>Total value of all products</b> .....			—	<b>330,564,028</b>

<sup>1</sup> Since less than three establishments reported children's garments in this classification, it has been necessary to include the figures for Children's with those for Women's and Misses'.

<sup>2</sup> Less than three establishments. Figures are included with "All other articles of women's and children's wear".

Note: The items of women's wear, etc. enumerated in the above table do not necessarily represent Canadian totals as many of them are also manufactured in other industries. For total figures reference should be made to the Appendix to annual report entitled *General Review of the Manufacturing Industries of Canada*. Statistics covering materials used are not collected in detail. The total cost is shown by provinces in Table 1.

<sup>1</sup> Since less than three establishments reported children's garments in this classification, it has been necessary to include the figures for Children's with those for Women's and Misses'.

<sup>2</sup> Less than three establishments. Figures are included with "All other articles of women's and children's wear".

Note: The items of women's wear, etc. enumerated in the above table do not necessarily represent Canadian totals as many of them are also manufactured in other industries. For total figures reference should be made to the Appendix to annual report entitled *General Review of the Manufacturing Industries of Canada*. Statistics covering materials used are not collected in detail. The total cost is shown by provinces in Table 1.

Average for establishments reporting quarterly detail .....			1,124	3,992
Average estimated for small establishments <sup>3</sup> .....			183	759
Average for all establishments .....			6,373	23,485

<sup>1</sup> The number of production workers, by months, was collected only for establishments generally reporting value of shipments of \$300,000 and over, in The Women's Factory Clothing Industry and \$200,000 and over in The Children's Factory Clothing Industry.

<sup>2</sup> The number of production workers, by quarters, was collected only for establishments generally reporting value of shipments between \$100,000 and \$300,000 in The Women's Factory Clothing Industry and between \$100,000 and \$200,000 in The Children's Factory Clothing Industry.

<sup>3</sup> For establishments generally reporting value of shipments of less than \$100,000 no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.

<sup>2</sup> Establishments generally reporting value of shipments between \$100,000 and \$300,000, in The Women's Factory Clothing Industry and between \$100,000 and \$200,000 in The Children's Factory Clothing Industry.

<sup>3</sup> Establishments generally reporting value of shipments of less than \$100,000.

... Figures not appropriate or not applicable.

## SECTION II. THE WOMEN'S FACTORY CLOTHING INDUSTRY, 1959

The Women's Factory Clothing Industry in 1959 made shipments amounting to \$260,575,604 f.o.b. plant, \$10,118,181 or 4.0 per cent higher than the \$250,457,423 worth of goods shipped in 1958. Employment was greater, rising from 25,676 to 25,842 in the current year. Salary and wage payments also rose, from \$68,469,880 in 1958 to \$71,694,239 in the year under review, an increase of \$3,224,359, or 4.7 per cent. The total cost of materials and supplies used in 1959, at \$137,934,277, was \$5,445,675, or 4.1 per cent, above the 1958 similar cost of \$132,488,602.

In 1959 this industry consisted of 634 establishments, 26 fewer than the year before. Their provincial distribution was: Nova Scotia 1; New Brunswick 1; Quebec 400; Ontario 179; Manitoba 25; Saskatchewan 2; Alberta 7; and British Columbia 19. The location of 378 and 159 plants, respectively, in Montreal and Toronto indicates the extent of concentration in those two cities. Montreal itself accounted for 61.5 per cent of the employment, and for 65.8 per cent of the total value of factory shipments.

The industry is comprised of five more or less distinct sections. The value of factory shipments from each of these segments in 1959 was, with the corresponding 1958 figures in brackets: dresses, \$91,642,775 (\$86,118,766); coats and suits \$58,431,389 (\$54,382,035); skirts, blouses, slacks and jackets \$54,696,015 (48,972,820); lingerie

\$38,527,737 (\$40,129,788); and other outerwear \$17,277,688 (\$20,854,014). From the foregoing it may readily be seen that the "dresses" section is much the largest with shipments amounting to 35.2 per cent of the grand total. Montreal, the centre of Canada's dress industry, reported sales of \$75,284,252, or 82.1 per cent of all the shipments of dresses.

Table 14A gives, in as much detail as is possible and permissible, information on the industry's commodities. It will be seen that substantial quantities of children's garments are made by the Women's Factory Clothing Industry. It will also be noted that statistics for a number of classifications cannot be given separately, because there are too few producers. There is a similar situation in the Children's Factory Clothing Industry (see Table 22A). By combining the data of the two industries it has been found possible to publish detail in many more instances. These combined statistics are to be found in Table 3A.

Exports of women's clothing are not large in relation to the domestic market. Imports, on the other hand, represent a sizeable share of this market. Canadian trade classifications do not generally separate women's from children's clothing. For this reason, imports and exports of these two commodities are shown together in Section I, Tables 4 and 5.

TABLE 8. Principal Statistics of the Women's Factory Clothing Industry, 1938 - 59

<sup>1</sup> Commencing with 1952 the gross value of production was replaced by value of factory shipments.

<sup>2</sup> Principal statistics for 1949 and later are not comparable with 1948 and earlier years because of the reclassification of "Embroidery hemstitching, etc." to "Miscellaneous textile goods".

<sup>3</sup> Because of insufficient inventory data in 1952 and 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "Value added by manufacture".

Note: Profits and losses cannot be estimated from Census figures as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

TABLE 9. Comparison of Principal Statistics, 1958 and 1959

	1958	1959	+Increase -Decrease

<sup>1</sup> Book value of all manufacturing inventories held at plant and plant warehouses.

<sup>2</sup> The opening inventory for 1959 differs from the closing inventory published for 1958 because of the inclusion of new firms and the removal of figures for firms which did not operate during 1959.

Amount received for custom work .....			—	64,187
<b>Total value of all products .....</b>			—	<b>260,575,604</b>

<sup>1</sup> Since less than three establishments reported children's garments in this classification, it has been necessary to include the figures for Children's with those for Women's and Misses'.

<sup>2</sup> Less than three establishments and included with "All other articles of women's and children's wear".

Note: The items of women's wear, etc. enumerated in the above table do not necessarily represent Canadian totals, as many of them are also manufactured in other industries. For total figures reference should be made to the Appendix to annual report entitled *General Review of the Manufacturing Industries of Canada*. Statistics covering materials used are not collected in detail. The total cost is shown by Provinces in Table 8.

<b>Total value of all products .....</b>			-	<b>250, 457, 423</b>

<sup>1</sup> Since less than three establishments reported children's garments in this classification, it has been necessary to include the figures for Children's with those for Women's and Misses'.

<sup>2</sup> Less than three establishments and included with "All other articles of women's and children's wear".

**Note:** The items of women's wear, etc. enumerated in the above table do not necessarily represent Canadian totals, as many of them are also manufactured in other industries. For total figures reference should be made to the Appendix to annual report entitled *General Review of the Manufacturing Industries of Canada*. Statistics covering materials used are not collected in detail. The total cost is shown by Provinces in Table 8.

TABLE 15. Employees and their Earnings, by Provinces, 1959

September .....	4,270	14,482	980	3,190
October .....	3,850	14,232		
November .....	3,579	13,563		
December .....	3,977	12,957	851	2,890
Average for establishments reporting monthly detail .....			3,985	13,959
Average for establishments reporting quarterly detail .....			920	2,946
Average estimated for small establishments <sup>3</sup> .....			168	582
Average for all establishments .....			5,073	17,487

<sup>1</sup> The number of production workers, by months, was collected only for establishments generally reporting value of shipments of \$300,000 and over.

<sup>2</sup> The number of production workers, by quarters, was collected only for establishments generally reporting value of shipments between \$100,000 and \$300,000.

<sup>3</sup> For establishments generally reporting value of shipments of less than \$100,000, no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.

TABLE 17. Principal Statistics of the Women's Factory Clothing Industry, grouped according to Size of Establishments, 1959

Establishments having factory shipments of	Estab-lish-ments	Em-ployees	Earnings	Cost of fuel and electricity used	Cost at works of materials used	Selling value of factory shipments

## SECTION III. THE CHILDREN'S FACTORY CLOTHING INDUSTRY, 1959

The Children's Factory Clothing Industry in 1959 continued its expansion, new records being established in both employment and output. Factory shipments during the year reached a total value of \$69,988,424, which was 6.9 per cent above the previous high of \$65,493,820 reported in 1958. Employment rose by 3.2 per cent, from 7,866 in 1958 to 8,120 in 1959. Salary and wage payments of \$18,217,996 in the year under review, were 7.3 per cent higher than the preceding year's \$16,980,663. The cost of materials used was also the highest ever, being up by 9.7 per cent to \$40,202,467 from the \$36,660,940 reported the year before.

In 1959 there were 180 establishments in this industry, six less than in 1958. These plants were confined to Quebec, with 136; Ontario, with 38; and Manitoba, 6. Three cities accounted for the bulk of this business. Montreal's 111 establishments shipped goods with a value of \$47,178,674, or 67.4 per cent of the total for the whole of the Dominion;

Toronto was responsible for \$6,897,193, or 9.8 per cent; and Winnipeg for \$2,408,611, or 3.4 per cent.

Table 22A gives, in as much detail as is possible and permissible, information on the industry's commodities. It will be seen that substantial quantities of women's garments are made by the Children's Factory Clothing Industry. It will also be noted that statistics for a number of classifications cannot be given separately, because there are too few producers. There is a similar situation for children's garments in the Women's Factory Clothing Industry. By combining the data of the two industries it has been found possible to publish details in many more instances. These combined statistics are given in Table 3A.

Canadian trade classifications do not generally separate women's from children's clothing. For this reason imports and exports of the two commodities are shown together in Section I, Tables 4 and 5.

TABLE 18. Principal Statistics of the Children's Clothing Industry, 1939-59

	Estab- lish- ments	Em- ployees	Salaries and wages	Cost at factory of fuel and electricity	Cost at factory of materials and supplies used	Value added by manufacture	Gross value of production <sup>1</sup>

Manitoba.....	6	293	692,144	10,813	1,046,281	1,374,855	2,408,611

<sup>1</sup> Commencing with 1952, the gross value of production was replaced by value of factory shipments.

<sup>2</sup> Because of insufficient inventory data in 1952 and 1953 these figures have been calculated from value of factory shipments and are, therefore only approximations to true "Value added by manufacture".

Note: Profits and losses cannot be estimated from Census figures as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

TABLE 19. Comparison of Principal Statistics, 1958 and 1959

<b>Canada .....</b>	<b>6,870,135</b>	<b>1,879,537</b>	<b>2,510,700</b>	<b>11,260,372</b>
Closing:				
Quebec .....	6,192,015	1,439,241	2,207,446	9,838,702
Ontario .....	1,240,199	417,619	820,818	2,478,636
Manitoba .....	428,248	87,777	79,760	595,785
<b>Canada .....</b>	<b>7,860,462</b>	<b>1,944,637</b>	<b>3,108,024</b>	<b>12,913,123</b>

<sup>1</sup> Book value of all manufacturing inventories held at plant and plant warehouses.

<sup>2</sup> The opening inventory for 1959 differs from the closing inventory published for 1958 because of the inclusion of new firms and the removal of figures for firms which did not operate during 1959.

Average estimated for small establishments <sup>3</sup> .....			15	177
Average for all establishments .....			1,300	5,998

<sup>1</sup> The number of production workers, by months, was collected only for establishments generally reporting value of shipments of \$200,000 and over.

<sup>2</sup> The number of production workers, by quarters, was collected only for establishments generally reporting value of shipments between \$100,000 and \$200,000.

<sup>3</sup> For establishments generally reporting value of shipments of less than \$100,000, no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.

## SECTION IV. WOMEN'S AND CHILDREN'S CLOTHING CONTRACTORS, 1959

In 1959 this industry was comprised of 144 establishments, of which 131 were in Quebec; 12 in Ontario; and 1 in Manitoba. The gross value of the work performed by these clothing contractors, \$9,727,430, was 10.7 per cent above the comparable 1958 figure of \$8,785,665. Employment was provided for 3,805 persons, 107 or 2.9 per cent more than the 3,698 workers reported in 1958. Salary and wage payments of \$6,813,462 in 1959 were 7.9 per cent higher than the preceding year's disbursements of \$6,314,947. The cost of materials, supplied by the contractors themselves and consisting mostly of thread, buttons, etc., amounted to

\$813,367, an increase of 13.9 per cent over the \$714,018 spent in 1958.

The majority of women's and children's clothing firms are to be found in Montreal. It follows, therefore, that there should be a heavy concentration of clothing contractors in the same area. The value of the work performed by the contractors of this city in 1959 amounted to \$6,087,109, or 62.6 per cent of the total. They also accounted for 53.0 per cent of all employees, and for 61.2 per cent of the salary and wage payments within the whole industry.

TABLE 26. Principal Statistics, Representative Years, 1950-59

Average for all establishments .....			565	3,170

<sup>1</sup> The number of production workers, by months, was collected only for establishments generally reporting gross value of work performed of \$50,000 and over.

<sup>2</sup> The number of production workers, by quarters, was collected only for establishments generally reporting gross value of work performed between \$25,000 and \$50,000.

<sup>3</sup> For establishments generally reporting gross value of work performed of less than \$25,000, no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.
