DEPARTMENT OF TRADE AND COMMERCE  
 DOMINION BUREAU OF STATISTICS  
 GENERAL MANUFACTURES BRANCH  
 OTTAWA - CANADA

Dominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)  
 Acting Chief, General Manufactures Branch: A. Cohen, B.Com.

ADVANCE REPORT ON THE TEXTILE INDUSTRIES OF CANADA, 1933.

The production of textiles and textile products constitutes an important branch of the Canadian manufacturing production. In gross value of products the textile group ranked third, in number of employees it came first and in salaries and wages paid second, while in the amount of capital invested it ranked only fifth. The importance of this group of industries is also shown by the fact that they contributed 14 per cent to the total value of production and furnished employment to 22 per cent of the persons engaged in manufacturing, while the amount paid in salaries and wages totalled over 17 per cent. The textile industries provide employment for a large number of female workers. Out of a total of 120,885 female employees engaged in the manufacturing industries of Canada, 57,767 or 48 per cent are found in this group.

In 1933 reports were received from 2,151 establishments with a capital investment in fixed and current assets of \$322,312,247. They furnished employment to 106,235 persons who were paid \$80,695,813 in salaries and wages and produced goods with a selling value at the factory of \$294,715,248. The materials used cost \$144,584,507 and the value added by manufacture totalled \$150,130,741. The leading industries of this group with their value of production and number of employees are given in the table below.

|   | Number of Employees | Value of Production |
|---|---------------------|---------------------|
| Hosiery and knitted goods .....         | 17,159              | \$40,997,210        |
| Cotton yarn and cloth .....             | 16,095              | 51,179,628          |
| Clothing, factory, women's .....        | 15,264              | 44,535,823          |
| Dyeing, cleaning and laundry work ..... | 10,528              | 15,239,981          |
| Furnishing goods, men's .....           | 8,189               | 19,082,571          |
| Clothing, factory, men's .....          | 7,969               | 26,622,689          |
| Silk .....                              | 7,801               | 22,754,969          |
| Woollen cloth .....                     | 5,542               | 15,993,114          |

According to table 2 which gives the principal statistics of the group as a whole, it will be observed that in 1920, during a period of inflated values of raw materials and manufacturing costs, the value of production reached its peak. A considerable decline occurred the following year, but from then on the industry slowly and steadily resumed its upward climb until it reached its second peak in 1929 when all the items in the principal statistics with the exception of cost of materials and gross value of production attained the highest levels in the history of the industry. With the depression of 1930, however, the trend of production in both volume and value has been downward, the low point being reached in 1932. In 1933 a slight recovery took place.

PRINCIPAL STATISTICS FOR 1933 COMPARED WITH 1932. - For the group as a whole there were increases of \$20,303,512 or 7.4 per cent in the gross value of production, \$719,185 or .2 per cent in the capital invested, \$15,115,769 or 11.7 per cent in the cost of materials used, \$5,187,743 or 3.6 per cent in the value added by manufacture and 4,119 or 4 per cent in the number of persons employed. The payment for salaries and wages were, however, \$2,122,131 or 2.6 per cent lower.

ADVANCE REPORT ON THE TEXTILE INDUSTRIES OF CANADA, 1933.

As shown in the table below considerable gains were made by the cotton textile, woollen textile, dyeing and finishing of textiles and silk industries. The knitted goods industry, however, continued to decline, reductions being recorded in all the items of the principal statistics with the exception of materials used. The garment trades, although reporting increases in the materials used and gross value of production, employed fewer persons with a resulting drop in the salary and wage payments, while the capital employed was also lower. Dyeing and cleaning of garments and miscellaneous textile industries also reported declines in almost all the items of the principal statistics.

Variation in Principal Statistics of the Textile Group of Industries in 1933 as Compared with 1932, by Groups.

| Groups   | Capital<br>Invested | Em-<br>ployees | Salaries<br>and Wages | Cost of<br>Materials<br>Used | Gross<br>Value of<br>Production | Value<br>added by<br>Manufacture |
|--|---------------------|----------------|-----------------------|------------------------------|---------------------------------|----------------------------------|

| Silk, artificial silk and<br>products .....    | + 2,171,458         | + 765          | + 381,667             | - 62,562                     | + 2,890,126                     | + 2,952,688 <sup>b</sup>         |
| Dyeing and finishing of<br>textile goods ..... | + 939,456           | + 102          | + 50,651              | + 584,836                    | + 637,701                       | + 52,865                         |
| Knitted goods .....                            | - 3,043,060         | - 457          | - 851,482             | + 148,983                    | - 2,228,674                     | - 2,377,657                      |
| Garment trades .....                           | - 1,695,551         | + 2,130        | - 1,119,563           | + 2,956,082                  | + 2,189,228                     | - 766,854                        |
| Miscellaneous textiles .....                   | - 860,567           | - 92           | - 268,950             | + 48,148                     | - 290,887                       | - 339,035                        |
| Dyeing, cleaning and laundry<br>work .....     | - 1,311,303         | - 642          | - 1,138,052           | - 187,940                    | - 2,062,798                     | - 1,874,858                      |
| TOTAL TEXTILE INDUSTRIES .                     | + 719,185           | + 4,119        | - 2,122,131           | + 15,115,769                 | + 20,303,512                    | + 5,187,743                      |

For the Dominion as a whole, the textile group of industries experienced some measure of recovery in 1933. This was not, however, shared by all provinces. The province of Quebec made the greatest advances, the value of production increasing by \$12,634,823 and the number of employees by 3,247. Ontario reported an increase of \$7,218,968 in the value of production and 1,349 in the number of wage-earners. Slight advances were also made by Nova Scotia and New Brunswick, while the Western provinces continued in a slightly downward direction.

ADVANCE REPORT ON THE TEXTILE INDUSTRIES OF CANADA, 1933.

Variations in the principal statistics by provinces are shown in the table below.

Variation in Principal Statistics of the Textile Group of Industries in % as Compared with 1932, by Provinces.

| British Columbia and Yukon ..... | - 586,346        | - 145          | - 246,565             | - 27,061                     | - 355,082    | - 328,021                       |                                  |
| CANADA .....                     | + 719,185        | + 4,119        | - 2,122,131           | + 15,115,769                 | + 20,303,512 | + 5,187,743                     |                                  |

PROVINCIAL DISTRIBUTION OF THE TEXTILE INDUSTRIES. - The 2,151 establishments engaged in the production of textiles and textile products were located by provinces as follows: Prince Edward Island 3, Nova Scotia 45, New Brunswick 35, Quebec 877, Ontario 923, Manitoba 101, Saskatchewan 19, Alberta 41, British Columbia and the Yukon Territory 107. The table following shows the percentage distribution for 1932 and 1933 of the capital invested, number of employees and gross value of production. It will be observed that in 1933 91.7 per cent of the capital, 90.8 per cent of the employees and 92 per cent of the value of products were reported by firms in Ontario and Quebec, with Quebec leading Ontario to some extent. The dyeing, cleaning and laundry industry is included in the textile group and if this were omitted concentration of the textile industries in Ontario and Quebec would be even more marked.

Table 5 shows the principal statistics for 1933 by economic areas. In the Maritime Provinces, the production of cotton yarn and cloth with an output valued at \$3,414,369 was the leading industry. This was followed by hosiery and knitted goods with a production valued at \$1,990,978. These two industries, therefore, accounted for 70 per cent of the output and 61 per cent of the employees.

In Quebec, the total value of the output was \$143,812,971. Cotton yarn and cloth headed the list with an output valued at \$36,290,195. Next in order of valuation of production was women's factory clothing with \$25,219,155, followed by men's factory clothing with \$16,475,440, natural and artificial silk \$15,563,612 and hosiery and knitted goods \$11,168,926. The aggregate value of production of these five industries was \$104,717,328 or 73 per cent of the total for the province. These industries also employed 68 per cent of the total number of employees.

In Ontario, the production of hosiery and knitted goods was the dominant industry in 1933, on the basis of both the value of production and number of employees, the output being valued at \$27,131,568 and the employees totalling 11,087. Next in order comes women's factory clothing with a value of production of \$17,116,389, woollen cloth \$11,789,332, cotton yarn and cloth \$11,475,064 and men's factory clothing \$9,164,305. These five leading industries accounted for \$76,676,658 or 60 per cent of the output of textiles and textile products in Ontario, and also employed 62 per cent of all the employees engaged in producing textiles and textile products.

In the Prairie Provinces, the cotton and jute bag industry was the most important one in 1933, the output being valued at \$2,672,247. This was closely followed by men's furnishing goods industry which had a production valued at \$2,667,482. Dyeing, cleaning and laundry work came third with an output valued at \$2,450,204, while women's factory clothing ranked fourth with \$1,727,367. The output of these four industries amounted to \$9,517,300 or 86 per cent of the total for the Prairie Provinces.

The dyeing, cleaning and laundry industry is the most important in British Columbia and the Yukon Territory, with a value of work performed amounting to \$1,718,844

ADVANCE REPORT ON THE TEXTILE INDUSTRIES OF CANADA, 1933.

or 38 per cent of the total production for the province which was valued at \$4,520,669. The output of men's furnishing goods amounted to \$467,219 and of women's factory clothing \$420,614. The textile industry of the Yukon Territory consists of two laundries which are grouped with those of British Columbia in order to avoid disclosing information of individual establishments.

**VALUE OF PRODUCTION.** — By referring to table 4(b) it will be observed that in 1933 the cotton yarn and cloth industry had the highest value of production, displacing the hosiery and knitted goods industry which led in this regard in 1932. This table also gives the principal statistics for all industries.

Since the main items of production in some industries are also produced as secondary ones in others, it is not always possible, therefore, in reviewing a report on an industry to obtain the complete Canadian production of specific articles. In the women's factory clothing industry, for instance, the report for which is compiled from the statistics of firms whose principal production consists of factory clothing and ready-to-wear apparel for women, articles of men's wear, men's furnishings, etc., are also manufactured as by-products. Similarly, articles of women's apparel will be found to be important, though secondary articles of production, in the men's factory clothing, the men's furnishing goods, hosiery and knitted goods, silk and other industries.

A separate table (No. 7), has been compiled showing the total Canadian production of all articles produced by manufacturers of textiles and textile products. This is excepted, of course, in instances where the publishing of these figures would disclose the operations of individual establishments.

**VOLUME OF PRODUCTION.** — The index of the physical volume of production of textiles and textile products shows an increase of 26.2 per cent since 1923. The following table illustrates the variations in the volume of production of the major textile groups of industries between the years 1923 and 1933. The main feature revealed by this table is the tremendous advance made in the production of natural and artificial silk, the volume increasing by 805.8 per cent during this period.<sup>1</sup> The peak of production for the textile group as a whole was reached in 1928 when the index stood at 135.3. This was also the peak year for most of the groups, the only exceptions being miscellaneous textiles and dyeing, cleaning and laundry work whose peak of production was not reached until 1929.

Some marked changes in the volume of production took place since 1928. For the group as a whole, the index dropped from 135.3 to 126.2, cotton textiles from 135.6 to 128.5, woollen textiles from 118.5 to 116.4, hosiery and knitted goods from 135.4 to 128.1, garment trades from 130.7 to 109.8, while miscellaneous textiles dropped from 127.0 in 1929 to 87.6 in 1933 and dyeing, cleaning and laundry work from 145.9 to 125.7. The production of natural and artificial silk was the only major industry to record an increase in the volume of production. With the exception of 1924 when there was a slight decrease in the volume of production, increases were recorded each year. In 1933 the index stood at 905.8.

EMPLOYEES, SALARIES AND WAGES. - In the last few years the trend of employment in the textile industries has been downward, the low point being reached in 1932. In 1933, however, an improvement took place. The peak year, from an employment standpoint was 1929 with 115,620 employees and a salary and wage bill of \$105,896,237. Of the number employed that year, 10,026 were salaried employees who were paid \$19,555,354 in salaries and 105,594 were wage-earners in receipt of \$86,340,883 in wages. In 1932 when employment was at its lowest, the number of employees totalled 102,116 with a salary and wage bill of \$82,817,944. Salaried employees numbered 10,557 and wage-earners 91,559, while payments for salaries amounted to \$18,955,951 and for wages \$63,861,993. In 1933 the number employed rose to 106,235, the salaried employees numbering 11,019 and the wage-earners 95,216, while payments amounted to \$80,695,813, \$18,180,261 for salaries and \$62,515,552 for wages.

The increase in the number of salaried employees between 1929 and 1933 is due to the following changes made in the instructions accompanying the schedule.

- Prior to 1931, owners who were working as ordinary wage-earners, such as small bakers, reported themselves as wage-earners. In 1931, however, all such owners were required to report themselves as salaried employees.
- In 1931, travelling salesmen who were attached to the plant and devoted all or the greater part of their time in selling the products of that plant were included with salaried employees. Prior

ADVANCE REPORT ON THE TEXTILE INDUSTRIES OF CANADA, 1933.

The high proportion of female wage-earners in the textile industries is of interest. As shown in table 1, all the manufacturing industries of Canada in 1933 provided employment to 100,300 female wage-earners, while in the textile industries employment was furnished to 54,244 or 54.1 per cent of the total. This naturally is reflected in the lower average annual wage paid in the textile group of industries where the average in 1933 was \$657 in comparison with an average wage of \$826 for all other groups. In the textile group, the average declined from \$818 in 1929 to \$657 in 1933, and the average salary from \$1,955 to \$1,650 in the same period.

In table 13 it will be observed that the monthly employment of wage-earners is fairly steady in these industries, there being no marked variations. As a rule the spring and fall months show maximum employment. In 1933 the peak was reached in October when 102,795 wage-earners were employed, while January with 85,714 wage-earners was the month of lowest employment.

**CAPITAL INVESTMENT.** - The year 1929 saw the largest capital investment in the textile group of industries with a total of **\$383,153,797**, made up of fixed capital, covering land, buildings, fixtures, plant equipment, tools, etc., amounting to **\$193,841,995** and liquid or working capital, consisting of materials on hand, stocks in process, fuel and miscellaneous supplies, finished products at their inventory value, cash, bills and accounts receivable, prepaid insurance and other prepaid expenses, etc., amounting to **\$189,311,802**. By referring to table 10, it will be observed that the amount represented by fixed capital was larger in 1930, 1931 and 1932 than in 1929, with corresponding decreases of working capital in those years, but that the total amount of capital invested declined from **\$383,153,797** in 1929 to **\$352,344,073** in 1931 and **\$321,593,062** in 1932. This difference in values may be explained by the fact that in the last several years the textile industry has renovated its plants to a great extent. Worn out and obsolete machinery has been scrapped and replaced by new and up-to-date equipment. New buildings have been erected where necessary, and older ones overhauled with the result that all buildings and equipment were placed in a state of high efficiency. This materially increased their value, and also of course the amount of fixed capital invested in them. In 1933 the total capital investment amounted to **\$322,312,247** which was a slight increase over the previous year. The investment in fixed assets was, however, **\$7,272,447** lower, due mainly to the current charges for depreciation.

With regard to working capital, the reduced cost of raw materials, the lower prices prevailing for finished merchandise and the decline in the cost of manufacture had tended to reduce the value of the stocks of raw materials and finished products carried on hand. Then too, buying by retailers had been reduced to a minimum with a consequent reduction of bills and accounts receivable. All these factors tended to reduce the value of liquid or working capital held by the industry. In 1933 the working capital was about **\$8,000,000** less than the previous year.

**COST OF MATERIALS AND VALUE ADDED BY MANUFACTURE.** - The value added by manufacture is obtained by deducting the cost of all materials used from the gross value of production. This difference represents the value added to the raw and other materials by labour, and it is this value which the manufacturer uses to pay for the labour itself, the other overhead expenses and to provide his profits. In 1932, the gross value of production of textiles and textile products was **\$274,411,736** and the cost of all materials used in their manufacture amounted to **\$129,468,738**. The value, therefore, left to the manufacturer for labour and other expenses and his profits was **\$144,942,998**.

ADVANCE REPORT ON THE TEXTILE INDUSTRIES OF CANADA, 1933.

The figures for 1933 were: gross value of production \$294,715,248, cost of materials used \$144,584,507 and the value added by manufacture to pay salaries, wages and other expenses and provide profits was \$150,130,741.

In 1933 the laid down cost at the factory of the materials used was \$144,584,507, an increase of \$15,115,769 or 11.7 per cent as compared with 1932. For the cotton textile group the increase was 34.2 per cent, woollen textiles 37.4 per cent, hosiery and knitted goods .8 per cent, garment trades 5.3 per cent and miscellaneous textiles .3 per cent. The dyeing, cleaning and laundry industry, however, reported a drop of 11.8 per cent and the silk industry a drop of .8 per cent. A comparison of the cost of materials used in 1932 and 1933, showing the actual ~~and~~ percentage variation, is given in table 9.

**POWER EQUIPMENT.** - Table 17 shows the power equipment used in the textile group from 1924 to 1933 inclusive, with the year 1933 shown in detail by industries. It will be noted that electric motors are fast becoming the most important motive power. In 1924 out of a total primary power installation of 8,322 units with a horse power rating of 139,482 there were 7,864 electric motors driven by purchased power and generating 81,208 horse-power. In 1933 there were installed 33,831 units of primary power with a rated capacity of 215,907 horse-power, and included in these were 33,457 electric motors operated by purchased power with a rating of 157,225 horse-power. Also, in addition to these motors there were in 1933, 2,001 motors with a rating of 18,587 horse-power operated by power generated in the factory, making a total number of 35,458 motors operating with a horse-power capacity of 175,812. Other equipment in 1933 consisted of 234 steam engines with a horse-power capacity of 23,613 and 107 hydraulic turbines and water wheels with a capacity of 32,842 horse-power. The power employed in each industry composing the group is shown in detail in the above mentioned table for 1933.

**CONSUMPTION OF FUEL AND ELECTRICITY.** - The cost of all fuel consumed in the textile industry in 1933 was \$3,327,628, while the bill for electricity amounted to \$2,812,505, making a total of \$6,140,133. Bituminous coal constituted the most important item, there having been consumed 452,780 tons costing \$2,625,895, this amounting to 79.0 per cent of the total cost of all fuel. 30,519 tons of anthracite worth \$167,843 were also used so that the total coal bill amounted to \$2,793,738 or 83.9 per cent of the total cost. Fuel oil is being used in increasing quantities, and in 1933, 4,180,574 gallons were consumed costing \$254,365. For 1932 the amount was 2,987,222 gallons worth \$176,684. In some sections of Canada the use of natural gas is increasing to a considerable extent also.

**IMPORTS AND EXPORTS.** - Imports of fibres, textiles and textile products in 1933 were valued at \$70,275,087, an increase of \$1,326,062 over the 1932 valuations. Imports from the United Kingdom were valued at \$30,987,402, from the United States \$25,394,166 and from other countries \$13,893,519. Imports from the United Kingdom were \$3,806,415 higher in 1933, while from the United States they were \$123,580 lower and from other countries the value of the imports decreased by \$2,356,773.

Imports of cotton and its manufactures had the highest valuation of \$24,967,375 in 1933, the wool group was next in order with \$18,233,575, silk \$7,280,549, flax, hemp and jute and their manufactures \$6,644,258, mixed textile products \$6,625,150, other fibres and their products \$3,750,988 and artificial silk \$2,773,192. Details by countries for 1932 and 1933 are shown in table 19.

ADVANCE REPORT ON THE TEXTILE INDUSTRIES OF CANADA, 1933.

Exports of fibres, textiles and textile products were valued at \$7,046,253 in 1933, which represents an increase of \$2,231,643 or 46.5 per cent. Exports to the United States accounted for \$1,478,281 of the increase, the United Kingdom for \$560,572 and other countries \$192,790. Exports to the United States were greater than to the United Kingdom being valued at \$2,407,718 as against \$1,799,169 for the latter. Exports to other countries were valued at \$2,839,366.
