GOVERNMENT OF CANADA

## THE TEXTILE INDUSTRIES

1947

DOMINION BUREAU OF STATISTICS  
DEPARTMENT OF TRADE AND COMMERCE

---

Published by Authority of the Rt. Hon. C. D. Howe  
Minister of Trade and Commerce

---

This report is a part of the annual Census of Industry and Merchandising  
prepared in the General Manufactures Section of the  
Dominion Bureau of Statistics, Ottawa

REPORT ON THE TEXTILE INDUSTRIES, 1947.

In 1947, for the first time, the output of the textile group of industries reached the billion dollar mark. The huge demand for textiles and textile products for civilian use obtaining at war's end had proved sufficiently great to maintain the group at a high level of production in the immediate postwar year, 1946, and to sustain it at this exceptional level in this second year. Although great strides were made toward meeting the unprecedented demand, some products were still in scarce supply at the end of the year and the mills still had a large volume of orders on hand. Throughout the year textile manufacturers continued to increase their productive facilities by modernizing or extending existing plants.

Relating the textile industries to other divisions of Canadian manufacturing it may be observed that in 1947 in gross value of products it ranked fifth with 10.5 per cent, and in salaries and wages paid it came third with 12.9 per cent. It is interesting to note, also, that the textile industries provide employment for a large number of female workers. Out of a total of 275,095 female employees engaged in the manufacturing industries of Canada in 1947, 98,045 or 35.6 per cent were found in this group.

In 1947 reports were received from 3,216 establishments. They furnished employment to 176,065 persons who were paid \$268,104,889 in salaries and wages, and produced goods with a selling value at the factory of \$1,062,041,265. The materials used cost \$560,634,708 and the value added by manufacture totalled \$488,983,044.

In the tables immediately following are given employment and gross value of production totals for the leading industries of the group for the years 1939, 1942, 1946 and 1947. The order of presentation is established by the gross value of production in 1947.

Number of Employees

	<u>1939</u> No.	<u>1942</u> No.	<u>1946</u> No.	<u>1947</u> No.
Women's factory clothing ...	20,270	26,328	29,963	30,969

REPORT ON THE TEXTILE INDUSTRIES, 1947.

Principal Statistics for 1947 compared with 1946. - As compared with 1946 the group as a whole showed increases of \$173,382,322 or 19.5 per cent in the gross value of production, 11,328 or 6.9 per cent in the number of persons employed and \$100,970,487 or 22.0 per cent in the cost of materials used. Salaries and wages paid were greater by \$40,086,566 or 17.6 per cent, and there was an increase in the value added by manufacture of \$70,719,379 or 16.9 per cent.

Tables 2 and 4(a) present provincial and group totals for the years 1946 and 1947.

Provincial Distribution of the Textile Industries. - The provinces of Ontario and Quebec dominate in the field of textile manufacturing. In 1947, Quebec accounted for 54.8 per cent of the gross value of production and 55.2 per cent of the employment given. The comparable percentages for Ontario were 37.5 and 37.5.

Table 5 shows the principal statistics for 1947 by economic areas. In the Maritime Provinces cotton yarn and cloth, with an output valued at \$7,733,166, was the leading industry. This was followed by hosiery and knitted goods with a production valued at \$6,001,389, and men's factory clothing, \$2,950,669. These three industries accounted for 63.5 per cent of the output and 66.6 per cent of the employees.

In Quebec, the total value of the output was \$582,389,476. Women's factory clothing headed the list with an output valued at \$123,177,572. Next in order of production was cotton yarn and cloth, \$111,477,647, followed by men's factory clothing, \$108,220,280, synthetic textiles and silk, \$56,965,970, hosiery and knitted goods, \$53,154,805. The aggregate value of production of these five industries was \$452,996,274 or 77.8 per cent of the total for the province and they employed 76.3 per cent of the total number of employees.

In Ontario, the production of hosiery and knitted goods was the dominant textile industry in 1947 on the basis of the value of production which totalled \$66,109,634. Men's factory clothing came second with \$55,045,777. Next in order were women's factory clothing \$47,939,332, cotton yarn and cloth \$39,061,618, and woollen cloth \$38,613,188. These five leading industries accounted for \$246,769,549 or 61.9 per cent of the Ontario total, and employed 67.5 per cent of the total employees.

In the Prairie Provinces the men's factory clothing industry, with a production value of \$15,057,374, occupied first place. Following were bags, cotton and jute, \$12,047,882 and women's factory clothing \$10,527,739. The output of these three industries amounted to \$37,632,995 or 87.4 per cent of the total for the three provinces.

In British Columbia the output of women's factory clothing amounted to \$2,612,988, men's factory clothing, \$1,891,933, and woollen cloth, \$1,162,204.

Value of Production. - By referring to Table 4(b) it will be observed that in 1947 the women's factory clothing industry had the highest value of production. This table also gives the principal statistics for all industries.

REPORT ON THE TEXTILE INDUSTRIES, 1947.

Since the main items of production in some industries are also produced as secondary ones in others, it is not always possible in reviewing a report on an industry to obtain the complete Canadian production of specific articles. In the women's factory clothing industry, for instance, the report for which is compiled from the statistics of firms whose principal production consists of factory clothing and ready-to-wear apparel for women, articles of men's wear, men's furnishings, etc., are also manufactured as by-products. Similarly, articles of women's apparel will be found to be important, though secondary articles of production, in the men's factory clothing, silk and other industries.

A separate table (No. 6), has been compiled showing the total Canadian production of all articles produced by manufacturers of textiles and textile products. This is excepted, of course, in instances where the publishing of figures would disclose the operations of individual establishments.

Employment, Salaries and Wages. - In 1947 the textile industries gave employment to 78,020 males and 176,065 females, or a total of 176,065 persons. The payroll amounted to \$268,104,889.

There were 20,668 salaried employees, who received the sum of \$59,753,126. Of these, 12,830 were males and 7,838 females.

Wage-earners to the number of 155,397 received \$208,351,763. The total included 65,190 males and 90,207 females. In this latter connection, it should be noted that the large number of females employed in the textile industries tends to produce lower average earnings per person when compared with the earnings in other industries. The peak employment of wage-earners was reached in October with 158,790 recorded. July, with 150,883, was the month of lowest employment.

Table 15(a), Page 51, shows that during the last week of November male wage-earners earned on the average 80.0 cents per hour. The average wage received amounted to \$36.08 for an average of 45.1 hours of work. The comparable figures for female wage-earners for the same week were 56.6 cents per hour, \$22.30 per week and 39.4 hours. Table 15(a), together with Tables 15(b) and 15(c), was prepared from data collected by the Employment Section of Dominion Bureau of Statistics from firms having 15 or more employees.

For footnotes (1), (2) and (3), see page 6.

Note: Since 1936 the textile industries do not include "dyeing, cleaning and laundry work", and all figures have, therefore, been revised in accordance with this change. Statistics published prior to 1936 are for this reason not comparable with those contained in the present report.

(1) Between 1925 and 1930 the average annual employment of wage-earners was obtained by summing the averages of individual plants, based on the number of months in actual operation, but in 1931 a change was made to the old method, whereby the aggregate of the monthly figure is divided by twelve. However, the effect of this change of method is evident in seasonal industries only.

(2) In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of materials and the cost of fuel and electricity from the gross value of the products. However, figures for electricity are not available prior to 1924, and the net value as shown for 1917 and 1920 was arrived at by the old method of subtracting only the cost of materials used.

(3) Information on capital not collected since 1943.

NOTE: Profits or losses cannot be estimated from Census figures as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.
