PRODUCTION, SHIPMENTS  
AND STOCKS ON HAND OF SAWMILLS  
EAST OF THE ROCKIES

JANUARY, 1957

PRODUCTION, EXPÉDITIONS  
ET STOCKS EN MAINS DES SCIERIES  
A L'EST DES ROCHEUSES

JANVIER 1957

Returns from 1,028 sawmill operators were compiled for January, these mills accounting for 61.55 per cent of the total output east of the Rockies in 1954. From these returns, preliminary estimates for all mills in the provinces covered have been prepared.

According to these calculations, the production of sawn lumber, east of the Rockies (excluding sawn ties) amounted to 184,551 M ft. b.m. in January, as compared with 124,821 M ft. the previous month and with 195,717 M ft. in January 1956.

Page 4 gives the final estimates of Canadian production of sawn lumber by provinces and by months, for 1955, and revised estimates for 1956.

Table 1 gives a comparative summary of the production of reporting operators, the estimated production of all operators, and shipments and stocks on hand of reporting operators. This table shows the reported production in January registered an increase of 59.84 per cent over the previous month but a decrease of 5.41 per cent from January 1956, while estimated production of all operators increased 47.85 per cent over December 1956 but decreased 5.71 per cent from January 1956. Shipments of reporting operators totalled 115,001 M ft. in January 1957 as compared with 98,363 M ft. in December 1956, an increase of 16.91 per cent and reported stocks on hand at the end of January 1957 amounted to 421,349 as compared with 431,639 M ft. on the last day of December 1956, a decrease of 2.38 per cent.

Prepared in the Forestry Section  
Industry and Merchandising Division.

Division de l'industrie et du commerce

Tables 2 to 5 give the production, shipments and stocks on hand of the mills reporting only. It is to be noted that all these figures may cover different mills from month to month and also that quantities for shipments and stocks on hand sometimes include lumber purchased for resale by certain mills.

The 345 mills which reported sawing in January produced 111,575 M ft. of softwoods and 12,763 M ft. of hardwoods. This compared with 288 mills reporting the production of 69,710 M ft. of softwoods and 8,075 M ft. of hardwoods in December. Details by provinces and species are given in Table 2.

Shipments during January were reported by 449 operators, as compared with 433 in December. Particulars of shipments are given in Table 3. It is to be noted, however, that the first destination only is given and that some of the lumber shipped to wholesalers and exporters will eventually be reshipped to other provinces or exported. Similarly, much of the lumber shipped to wholesalers and retailers will eventually be used by building contractors, manufacturers and others.

Table 4 gives details of sawmill lumber stocks by provinces and by species, separating lumber sold but not shipped and lumber unsold. Stocks by species are further separated by grades, and unsold stocks are classified by thicknesses. Stocks at the end of January reported by 279 mills amounted to 421,349 M ft. of which 255,211 M ft. were sold and 166,138 M ft. unsold.

Table 5 shows the number of operators reporting, by provinces, and also the percentage of the sample to the 1954 production of all mills in the provinces covered.

NOTE: Tables 1 to 5 of this survey deal with production in all provinces east of the Rockies (except Newfoundland), shipments from sawmills in those provinces to the various domestic and foreign markets and to the various classes of customers, and stocks of sawn lumber on hand in sawmill yards at the end of the month. This survey is restricted to mills having an annual output of 500,000 or more feet board measure except in Prince Edward Island where it also includes mills in the 200 to 499 M ft. class. Sawmills in the 500,000 feet and over class accounted for 81.95 per cent of the total production of sawn lumber in 1954, in the eight provinces covered.

Les tableaux 2 à 5 donnent la production, les expéditions, et les stocks des seules scieries qui font rapport. Il faut remarquer que tous ces chiffres peuvent s'appliquer parfois à des moulins différents d'un mois à l'autre et que les chiffres des expéditions et des stocks en mains comprennent parfois du bois acheté par certains moulins pour revente.

Les 345 moulins qui ont rapporté du sciage en janvier ont produit 111,575 M p. de bois tendre et 12,763 M p. de bois dur. Pour décembre, 288 scieries ont rapporté la production de 69,710 M p. de bois tendre et 8,075 M p. de bois dur. Les détails par province et par essence paraissent au tableau 2.

Les expéditions en janvier ont été déclarées par 449 exploitants, comparativement à 433 pour décembre, et paraissent en détail au tableau 3. A noter, cependant, que la première destination seulement est indiquée et qu'une partie du bois expédié aux grossistes et exportateurs sera éventuellement ré-expédiée à d'autres provinces ou exportée. De même une grande partie du bois expédié aux grossistes et aux détaillants sera ultimement utilisée par les entrepreneurs en construction, les manufacturiers et d'autres.

Les stocks de bois aux mains des scieries par province et par essence, paraissent en détail au tableau 4, distinction étant faite entre le bois vendu mais non expédié et le bois non vendu. Les stocks par essence sont de plus séparés selon la qualité et les stocks non vendus sont classifiés selon l'épaisseur. Les stocks déclarés à la fin de janvier par 279 moulins s'élèvent à 421,349 M p. dont 255,211 M p. vendus et 166,138 non vendus.

Le tableau 5 donne le nombre d'exploitants faisant rapport, par province et aussi le pourcentage de l'échantillon en fonction de la production de toutes les scieries dans les provinces concernées pour 1954.

NOTA: Les tableaux 1 à 5 de ce relevé portent sur la production de bois scié dans toutes les provinces à l'est des Rocheuses, (sauf Terre-Neuve), sur les expéditions des scieries de ces provinces aux divers marchés domestiques et étrangers et aux diverses catégories de clients, et sur les stocks de bois scié, en mains dans les cours des scieries à la fin du mois. Ce relevé est limité aux scieries dont la production annuelle est de 500,000 pieds ou plus, mesure de planche, sauf dans le cas de l'Ile-du-Prince-Edouard où il comprend aussi les scieries produisant de 200 à 499 M p. Les scieries dont la production atteignait ou dépassait 500,000 pieds ont contribué en 1954, 81.95 pour cent de la production totale de bois scié dans les huit provinces en question.
